

Contents

Part I Background

1	Notes for a History of Grasping Devices	3
	Marco Ceccarelli	
2	Stiffness Analysis for Grasping Tasks	17
	Giuseppe Carbone	
3	Multibody Dynamics Formulation	57
	Parviz E. Nikravesh	
4	Sensors and Methods for the Evaluation of Grasping	77
	Antonio Morales, Mario Prats and Javier Felip	

Part II Mechanism Design

5	Industrial Grippers: State-of-the-Art and Main Design Characteristics	107
	Penisi Osvaldo Hugo	
6	Robotic Hands and Underactuated Finger Mechanisms	133
	Licheng Wu	
7	Finger Orientation for Robotic Hands	159
	Minzhou Luo	
8	Parallel Wrists for Enhancing Grasping Performance	189
	Massimo Callegari, Luca Carbonari, Giacomo Palmieri and Matteo-Claudio Palpacelli	

Part III Control and Motion Planning

- 9 A Survey on Different Control Techniques for Grasping** 223
Balaguer Carlos, Gimenez Antonio, Jardón Alberto, Cabas Ramiro
and Martinez de la Casa Santiago
- 10 Hardware Control System of Robotic Hands** 247
Zhan Qiang
- 11 Visual Servo Control of Robot Grasping** 269
Theodor Borangiu
- 12 Path Planning for Grasping Tasks** 305
João Carlos Mendes Carvalho and Sezimária F. Pereira Saramago
- 13 Grasp and Motion Planning for Humanoid Robots** 329
Markus Przybylski, Nikolaus Vahrenkamp, Tamim Asfour
and Rüdiger Dillmann

Part IV Applications

- 14 Hardware for Industrial Gripping at SCHUNK
GmbH & Co. KG** 363
Christopher Parlitz
- 15 Grasping in Agriculture: State-of-the-Art
and Main Characteristics** 385
F. Rodríguez, J. C. Moreno, J. A. Sánchez and M. Berenguel
- 16 Microgrippers and their Influence on High Precision
Assembly Processes.** 411
A. Raatz and R. J. Ellwood
- 17 A New Way of Grasping: PARAGRIP—The Fusion
of Gripper and Robot** 433
Tom Mannheim, Martin Riedel, Mathias Hüsing
and Burkhard Corves
- Index** 465
