

Contents

1	Introduction	1
1.1	Reaction-Diffusion Systems	1
1.2	The Gierer-Meinhardt System for Hydra	4
1.3	Turing's Diffusion-Driven Instability	5
1.4	Amplitude Equations and Order Parameters	9
1.5	Analytical Methods for Spiky Patterns	9
2	Existence of Spikes for the Gierer-Meinhardt System in One Dimension	13
2.1	Symmetric Multi-spike Solutions: A Rigorous Proof of Existence	14
2.2	Asymmetric Multi-spike Solutions: A Formal Derivation	15
2.3	Existence of Symmetric and Asymmetric Multiple Spikes: A Unified Rigorous Approach	17
2.3.1	Some Preliminaries	22
2.3.2	Study of the Approximate Solutions	25
2.3.3	The Liapunov-Schmidt Reduction Method	29
2.3.4	The Reduced Problem	32
2.4	Clustered Multiple Spikes	35
2.5	Notes on the Literature	39
3	The Nonlocal Eigenvalue Problem (NLEP)	41
3.1	A Basic Theorem for $\tau = 0$	41
3.2	The Method of Continuation	50
3.3	Hopf Bifurcation	51
3.4	The Method of Hypergeometric Functions	57
3.5	Notes on the Literature	70
4	Stability of Spikes for the Gierer-Meinhardt System in One Dimension	71
4.1	Symmetric Multiple Spikes: Stability	71
4.1.1	Large Eigenvalues	73
4.1.2	Small Eigenvalues	76

4.1.3	The Spectrum of the Matrices \mathcal{B} and \mathcal{M}	85
4.2	Notes on the Literature	88
5	Existence of Spikes for the Shadow Gierer-Meinhardt System	91
5.1	The Shadow Gierer-Meinhardt System	91
5.2	The Existence Proof	93
5.2.1	Technical Analysis	93
5.2.2	The Liapunov-Schmidt Reduction Method	100
5.2.3	The Reduced Problem: A Finite-Dimensional Maximisation Problem	103
5.2.4	The Completion of the Existence Proof	104
5.3	Notes on the Literature	105
6	Existence and Stability of Spikes for the Gierer-Meinhardt System in Two Dimensions	107
6.1	Symmetric Multiple Spikes: Existence	107
6.1.1	The Amplitudes of the Peaks	109
6.1.2	Reduction to Finite Dimensions	113
6.1.3	The Reduced Problem	121
6.2	Symmetric Multiple Spikes: Stability	124
6.2.1	Large Eigenvalues	126
6.2.2	Small Eigenvalues	131
6.3	Asymmetric Multiple Spikes: Existence	136
6.3.1	Analysing the Algebraic System for the Amplitudes	139
6.3.2	The Reduced Problem	140
6.4	Asymmetric Multiple Spikes: Stability	141
6.4.1	Large Eigenvalues	142
6.4.2	Small Eigenvalues	146
6.5	Notes on the Literature	147
7	The Gierer-Meinhardt System with Inhomogeneous Coefficients	149
7.1	Precursors	149
7.1.1	Results on Existence and Stability	150
7.1.2	Numerical Computations	156
7.2	Discontinuous Diffusivities	157
7.2.1	Existence and Stability of Interior Spike	158
7.2.2	A Spike near the Jump Discontinuity of the Inhibitor Diffusivity	163
7.2.3	Numerical Simulations	169
7.3	Notes on the Literature	172
8	Other Aspects of the Gierer-Meinhardt System	175
8.1	The Gierer-Meinhardt System with Finite Diffusivity	175
8.1.1	Some Properties of the Function w_L	178
8.1.2	Nonlocal Eigenvalue Problems	185
8.1.3	Extensions to Higher Dimensions	191

8.2	The Gierer-Meinhardt System with Large Reaction Rates	193
8.2.1	Construction of the Steady State	196
8.2.2	Stability	199
8.2.3	Large Eigenvalues	200
8.2.4	Small Eigenvalues	209
8.3	The Gierer-Meinhardt System with Robin Boundary Conditions .	214
8.3.1	Study of the NLEP	219
8.3.2	Eigenvalue Estimates	232
8.3.3	Numerical Simulations	239
8.4	The Gierer-Meinhardt System on Manifolds	241
8.4.1	Introduction	241
8.4.2	The Geometric Setting	242
8.4.3	The Main Results	244
8.5	Notes on the Literature	246
9	The Gierer-Meinhardt System with Saturation	249
9.1	The Parametrised Ground State	251
9.2	Stability of Spikes	255
9.3	Notes on the Literature	261
10	Spikes for Other Two-Component Reaction-Diffusion Systems . . .	263
10.1	The Schnakenberg Model	263
10.2	The Gray-Scott Model	265
10.3	Flow-Distributed Spikes	267
10.4	Notes on the Literature	269
11	Reaction-Diffusion Systems with Many Components	271
11.1	The Hypercycle of Eigen and Schuster	271
11.2	Mutual Exclusion of Spikes	275
11.3	Multiple Activators and Substrates	279
11.4	Exotic Spiky Patterns for a Consumer Chain Model	282
11.5	Notes on the Literature	286
12	Biological Applications	287
12.1	Biological, Chemical and Ecological Applications of Reaction-Diffusion Systems	287
12.2	<i>Hydra</i> : Transplantation of Head	288
12.3	Embryology: Formation of Body Axes for Newt and <i>Drosophila</i> , Segmentation for <i>Drosophila</i>	291
12.4	Pigmentation Patterns on Sea Shells, Fish and Mammals	293
12.5	Patterns on Growing Domains: Stripes on Angelfish and Tooth Formation in Alligators	294
13	Appendix	297
13.1	Sobolev Spaces and Linear Operators	297
13.2	Uniqueness, Nondegeneracy and Spectrum of the Ground State .	299
