Contents

1 Advanced Transport Systems: General ......................... 1
   1.1 Definition ........................................... 1
   1.2 Classification ....................................... 2
      1.2.1 Attributes/Criteria Related to Advanced Components ... 3
      1.2.2 Attributes/Criteria Related to Level of Commercialization .. 4
   1.3 Performances ........................................ 4
      1.3.1 Definition ...................................... 4
      1.3.2 Analyzing, Modeling, and Evaluation ................. 8
   1.4 Composition of the Book ................................ 8
   References ............................................. 9

2 Advanced Transport Systems: Operations and Technologies ...... 11
   2.1 Introduction .......................................... 11
   2.2 Bus Rapid Transit Systems ............................. 12
      2.2.1 Definition, Development, and Use .................. 12
      2.2.2 Analyzing and Modeling Performances ............... 14
      2.2.3 Evaluation ...................................... 40
   2.3 High Speed Tilting Passenger Trains ..................... 42
      2.3.1 Definition, Development, and Use .................. 42
      2.3.2 Analyzing and Modeling Performances ............... 43
      2.3.3 Evaluation ...................................... 61
   2.4 Advanced Subsonic Commercial Aircraft .................. 62
      2.4.1 Definition, Development, and Use .................. 62
      2.4.2 Analyzing and Modeling Performances ............... 63
      2.4.3 Evaluation ...................................... 78
   References ............................................. 79

   3.1 Introduction .......................................... 83
   3.2 Advanced Freight Collection/Distribution Networks .......... 84
      3.2.1 Definition, Development, and Use .................. 84
      3.2.2 Analyzing and Modeling Performances ............... 86
      3.2.3 Evaluation ...................................... 110
3.3 Road Mega Trucks ........................................ 111
   3.3.1 Definition, Development, and Use. ................. 111
   3.3.2 Analyzing and Modeling Performances ............... 112
   3.3.3 Evaluation .......................................... 125
3.4 Long Intermodal Freight Train(s) ....................... 126
   3.4.1 Definition, Development, and Use. ................. 126
   3.4.2 Analyzing Performances ............................ 127
   3.4.3 Modeling Performances ............................. 132
   3.4.4 Evaluation .......................................... 144
3.5 Large Commercial Freight Aircraft ...................... 145
   3.5.1 Definition, Development, and Use. ................. 145
   3.5.2 Analyzing and Modeling Performances .............. 147
   3.5.3 Evaluation .......................................... 161
References .................................................. 162

4 Advanced Transport Systems: Technologies and Environment ... 165
  4.1 Introduction ........................................... 165
  4.2 Advanced Passenger Cars ............................... 167
     4.2.1 Definition, Development, and Use. ............... 167
     4.2.2 Analysis and Modeling Performances ............. 168
     4.2.3 Evaluation ........................................ 185
  4.3 Large Advanced Container Ships ....................... 186
     4.3.1 Definition, Development, and Use. ............... 187
     4.3.2 Analyzing and Modeling Performances ............ 188
     4.3.3 Evaluation ........................................ 214
  4.4 Liquid Hydrogen-Fuelled Commercial Air Transportation ... 216
     4.4.1 Definition, Development, and Use. ............... 216
     4.4.2 Analysis and Modeling Performance ............... 217
     4.4.3 Evaluation ........................................ 228
References .................................................. 229

5 Advanced Transport Systems: Infrastructure, Technologies, Operations, Economics, Environment, and Society/Policy ... 235
  5.1 Introduction ........................................... 235
  5.2 High Speed Transport Systems ......................... 236
     5.2.1 Definition, Development, and Use. ............... 236
     5.2.2 Evaluation ........................................ 274
References .................................................. 275

6 Advanced Transport Systems: Future Concepts ............... 277
  6.1 Introduction ........................................... 277
  6.2 Personal Rapid Transit Systems ....................... 279
     6.2.1 Definition, Development, and Use. ............... 279
