

Contents

Part I Foundations of Phase Response Analysis

1	The Theory of Weakly Coupled Oscillators	3
	Michael A. Schwemmer and Timothy J. Lewis	
2	Phase Resetting Neural Oscillators: Topological Theory Versus the Real World	33
	Trine Krogh-Madsen, Robert Butera, G. Bard Ermentrout, and Leon Glass	
3	A Theoretical Framework for the Dynamics of Multiple Intrinsic Oscillators in Single Neurons	53
	Michiel W.H. Remme, Máté Lengyel, and Boris S. Gutkin	
4	History of the Application of the Phase Resetting Curve to Neurons Coupled in a Pulsatile Manner	73
	Carmen C. Canavier and Srisairam Achuthan	

Part II Estimation of Phase Response Curves

5	Experimentally Estimating Phase Response Curves of Neurons: Theoretical and Practical Issues	95
	Theoden Netoff, Michael A. Schwemmer, and Timothy J. Lewis	
6	A Geometric Approach to Phase Resetting Estimation Based on Mapping Temporal to Geometric Phase	131
	Sorinel Adrian Oprisan	
7	PRC Estimation with Varying Width Intervals	163
	Daniel G. Polhamus, Charles J. Wilson, and Carlos A. Paladini	
8	Bayesian Approach to Estimating Phase Response Curves	179
	Keisuke Ota and Toru Aonishi	

Part III Cellular Mechanisms of Neuronal Phase Response Properties

- 9 Phase Response Curves to Measure Ion Channel Effects on Neurons** 207
G. Bard Ermentrout, Bryce Beverlin II, and Theoden Netoff
- 10 Cellular Mechanisms Underlying Spike-Time Reliability and Stochastic Synchronization: Insights and Predictions from the Phase-Response Curve** 237
Roberto F. Galán
- 11 Recovery of Stimuli Encoded with a Hodgkin–Huxley Neuron Using Conditional PRCs** 257
Anmo J. Kim and Aurel A. Lazar
- 12 Cholinergic Neuromodulation Controls PRC Type in Cortical Pyramidal Neurons** 279
Klaus M. Stiefel and Boris S. Gutkin
- 13 Continuum of Type I Somatic to Type II Dendritic PRCs; Phase Response Properties of a Morphologically Reconstructed Globus Pallidus Neuron Model** 307
Nathan W. Schultheiss

Part IV Prediction of Network Activity with Phase Response Curves

- 14 Understanding Activity in Electrically Coupled Networks Using PRCs and the Theory of Weakly Coupled Oscillators** 329
Timothy J. Lewis and Frances K. Skinner
- 15 The Role of Intrinsic Cell Properties in Synchrony of Neurons Interacting via Electrical Synapses** 361
David Hansel, Germán Mato, and Benjamin Pfeuty
- 16 A PRC Description of How Inhibitory Feedback Promotes Oscillation Stability** 399
Farzan Nadim, Shunbing Zhao, and Amitabha Bose
- 17 Existence and Stability Criteria for Phase-Locked Modes in Ring Networks Using Phase-Resetting Curves and Spike Time Resetting Curves** 419
Sorinel Adrian Oprisan

18 Phase Resetting Curve Analysis of Global Synchrony, the Splay Mode and Clustering in N Neuron all to all Pulse-Coupled Networks 453
Srisairam Achuthan, Lakshmi Chandrasekaran, and Carmen C. Canavier

19 Effects of the Frequency Dependence of Phase Response Curves on Network Synchronization 475
Christian G. Fink, Victoria Booth, and Michal Zochowski

20 Phase-Resetting Analysis of Gamma-Frequency Synchronization of Cortical Fast-Spiking Interneurons Using Synaptic-like Conductance Injection 489
Hugo Zeberg, Nathan W. Gouwens, Kunichika Tsumoto, Takashi Tateno, Kazuyuki Aihara, and Hugh P.C. Robinson
