# Contents

1. **A Short History of Controlled Drug Release and an Introduction** ................................................................. 1  
   Alexander T. Florence

2. **The Organization of the Gut and the Oral Absorption of Drugs: Anatomical, Biological and Physiological Considerations in Oral Formulation Development** ................................................... 27  
   Clive G. Wilson

3. **Controlling Drug Release in Oral Product Development Programs: An Industrial Perspective** ....................... 49  
   Luigi G. Martini and Patrick J. Crowley

4. **Animal Model Systems Suitable for Controlled Release Modeling** ............................................................. 71  
   Steven C. Sutton and Philip L. Smith

5. **In Vitro Testing of Controlled Release Dosage Forms During Development and Manufacture** .......................... 91  
   Michael J. Rathbone and James M. Butler

6. **Oral Controlled Delivery Mechanisms and Technologies** .............. 109  
   Hossein Omidian, Shahin Fesharaki, and Kinam Park

7. **Drug–Polymer Matrices for Extended Release** ........................................... 131  
   Sandip B. Tiwari, James DiNunzio, and Ali Rajabi-Siahboomi

8. **Ion-Exchange Approaches to Controlling Drug Release** ............... 161  
   Der-Yang Lee, Timothy Kutch, and Rick S. Chan

9. **Pulsatile Delivery for Controlling Drug Release** ....................... 179  
   Sumalee Thitinan and Jason T. McConville
10 Ordered Mesoporous Silica for the Delivery of Poorly Soluble Drugs .......................................................... 203
Michiel Van Speybroeck, Randy Mellaerts, Johan Adriaan Martens, Pieter Annaert, Guy Van den Mooter, and Patrick Augustijns

Paolo Colombo, Gaia Colombo, and Christine Cahyadi

12 Extrudable Technologies for Controlling Drug Release and Absorption ........................................................................ 239
Daniel Bar-Shalom, Matthew Roberts, and James L. Ford

13 Coated Multiparticulates for Controlling Drug Release .............. 257
Brigitte Skalsky and Sven Stegemann

14 Capsules as a Delivery System for Modified-Release Products ...... 277
Sven Stegemann

15 Lipids in Oral Controlled Release Drug Delivery ..................... 299
Ben J. Boyd, Tri-Hung Nguyen, and Anette Müllertz

16 Buccal Drug Delivery ........................................................................ 329
Michael A. Repka, Li-lan Chen, and Rick S. Chan

17 Controlling Release by Gastroretention ........................................ 361
Mark D. Coffin and Matthew D. Burke

18 Drug Delivery to the Colon .............................................................. 385
Abdul W. Basit and Emma L. McConnell

About the Editors ........................................................................... 401

Index .................................................................................................. 403
Controlled Release in Oral Drug Delivery
Wilson, C.G.; Crowley, P.J. (Eds.)
2011, XIV, 414 p., Hardcover
ISBN: 978-1-4614-1003-4
