Preface vii
Acknowledgments ix

1. INTRODUCTION 1
   1.1 Driver Assistance Systems 2
   1.2 Active Stability Control Systems 2
   1.3 Ride Quality 4
   1.4 Technologies for Addressing Traffic Congestion 5
      1.4.1 Automated highway systems 6
      1.4.2 “Traffic-friendly” adaptive cruise control 6
      1.4.3 Narrow tilt-controlled commuter vehicles 7
   1.5 Emissions and Fuel Economy 9
      1.5.1 Hybrid electric vehicles 10
      1.5.2 Fuel cell vehicles 11

References 11
# 2. LATERAL VEHICLE DYNAMICS

## 2.1 Lateral Systems Under Commercial Development

1. **Lane departure warning**
2. **Lane keeping systems**
3. **Yaw stability control systems**

## 2.2 Kinematic Model of Lateral Vehicle Motion

## 2.3 Bicycle Model of Lateral Vehicle Dynamics

## 2.4 Motion of Particle Relative to a Rotating Frame

## 2.5 Dynamic Model in Terms of Error with Respect to Road

## 2.6 Dynamic Model in Terms of Yaw Rate and Slip Angle

## 2.7 From Body Fixed to Global Coordinates

## 2.8 Road Model

## 2.9 Chapter Summary

Nomenclature

References

# 3. STEERING CONTROL FOR AUTOMATED LANE KEEPING

## 3.1 State Feedback

## 3.2 Steady State Error from Dynamic Equations

## 3.3 Understanding Steady State Cornering

1. **Steering angle for steady state cornering**
2. **Can the yaw-angle error be zero?**
3. **Is non-zero yaw angle error a concern?**

8. ELECTRONIC STABILITY CONTROL 201

8.1 Introduction 201

8.1.1 The functioning of a stability control system 201

8.1.2 Systems developed by automotive manufacturers 203

8.1.3 Types of stability control systems 203

8.2 Differential Braking Systems 204

8.2.1 Vehicle model 204

8.2.2 Control architecture 208

8.2.3 Desired yaw rate 209

8.2.4 Desired side-slip angle 210

8.2.5 Upper bounded values of target yaw rate and slip angle 211

8.2.6 Upper controller design 213

8.2.7 Lower Controller design 217

8.3 Steer-By-Wire Systems 218

8.3.1 Introduction 218

8.3.2 Choice of output for decoupling 219

8.3.3 Controller design 222

8.4 Independent All Wheel Drive Torque Distribution 224

8.4.1 Traditional four wheel drive systems 224

8.4.2 Torque transfer between left and right wheels using a differential 225

8.4.3 Active control of torque transfer to all wheels 226
8.5 Need for Slip Angle Control

8.6 Chapter Summary

Nomenclature

References

9. MEAN VALUE MODELING OF SI AND DIESEL ENGINES

9.1 SI Engine Model Using Parametric Equations

9.1.1 Engine rotational dynamics

9.1.2 Indicated combustion torque

9.1.3 Friction and pumping losses

9.1.4 Manifold pressure equation

9.1.5 Outflow rate $\dot{m}_m$ from intake manifold

9.1.6 Inflow rate $\dot{m}_i$ into intake manifold

9.2 SI Engine Model Using Look-Up Maps

9.2.1 Introduction to engine maps

9.2.2 Second order engine model using engine maps

9.2.3 First order engine model using engine maps

9.3 Introduction to Turbocharged Diesel Engines

9.4 Mean Value Modeling of Turbocharged Diesel Engines

9.4.1 Intake manifold dynamics

9.4.2 Exhaust manifold dynamics

9.4.3 Turbocharger dynamics

9.4.4 Engine crankshaft dynamics
9.4.5 Control system objectives 259

9.5 Lower Level Controller with SI Engines 260

9.6 Chapter Summary 262

Nomenclature 262

References 264

10. DESIGN AND ANALYSIS OF PASSIVE AUTOMOTIVE SUSPENSIONS 267

10.1 Introduction to Automotive Suspensions 267

10.1.1 Full, half and quarter car suspension models 267

10.1.2 Suspension functions 270

10.1.3 Dependent and independent suspensions 271

10.2 Modal Decoupling 273

10.3 Performance Variables for a Quarter Car Suspension 274

10.4 Natural Frequencies and Mode Shapes for the Quarter Car 276

10.5 Approximate Transfer Functions Using Decoupling 278

10.6 Analysis of Vibrations in the Sprung Mass Mode 283

10.7 Analysis of Vibrations in the Unsprung Mass Mode 285

10.8 Verification Using the Complete Quarter Car Model 286

10.8.1 Verification of the influence of suspension stiffness 286

10.8.2 Verification of the influence of suspension damping 288

10.8.3 Verification of the influence of tire stiffness 290

10.9 Half-Car and Full-Car Suspension Models 292
11. ACTIVE AUTOMOTIVE SUSPENSIONS 301

11.1 Introduction 301

11.2 Active Control: Trade-Offs and Limitations 304

11.2.1 Transfer functions of interest 304

11.2.2 Use of the LQR Formulation and its relation to $H_2$-Optimal Control 304

11.2.3 LQR formulation for active suspension design 306

11.2.4 Performance studies of the LQR controller 307

11.3 Active System Asymptotes 313

11.4 Invariant Points and Their Influence on the Suspension Problem 315

11.5 Analysis of Trade-Offs Using Invariant Points 317

11.5.1 Ride quality/ road holding trade-offs 317

11.5.2 Ride quality/ rattle space trade-offs 319

11.6 Conclusions on Achievable Active System Performance 320

11.7 Performance of a Simple Velocity Feedback Controller 321

11.8 Hydraulic Actuators for Active Suspensions 323

11.9 Chapter Summary 325

Nomenclature 326

References 327
## Contents

12. SEMI-ACTIVE SUSPENSIONS 329

12.1 Introduction 329

12.2 Semi-Active Suspension Model 331

12.3 Theoretical Results: Optimal Semi-Active Suspensions 333

12.3.1 Problem formulation 333

12.3.2 Problem definition 335

12.3.3 Optimal solution with no constraints on damping 336

12.3.4 Optimal solution in the presence of constraints 339

12.4 Interpretation of the Optimal Semi-Active Control Law 340

12.5 Simulation Results 342

12.6 Calculation of Transfer Function Plots with Semi-Active Systems 345

12.7 Performance of Semi-Active Systems 347

12.7.1 Moderately weighted ride quality 347

12.7.2 Sky hook damping 349

12.8 Chapter Summary 352

Nomenclature 352

References 353

13. LATERAL AND LONGITUDINAL TIRE FORCES 355

13.1 Tire Forces 355

13.2 Tire Structure 357

13.3 Longitudinal Tire Force at Small Slip Ratios 359
13.4 Lateral Tire Force at Small Slip Angles
13.5 Introduction to the Magic Formula Tire Model
13.6 Development of Lateral Tire Model for Uniform Normal Force Distribution
  13.6.1 Lateral forces at small slip angles
  13.6.2 Lateral forces at large slip angles
13.7 Development of Lateral Tire Model for Parabolic Normal Pressure Distribution
13.8 Combined Lateral and Longitudinal Tire Force Generation
13.9 The Magic Formula Tire Model
13.10 Dugoff’s Tire Model
  13.10.1 Introduction
  13.10.2 Model equations
  13.10.3 Friction circle interpretation of Dugoff’s model
13.11 Dynamic Tire Model
13.12 Chapter Summary
Nomenclature
References
14. TIRE-ROAD FRICTION MEASUREMENT ON HIGHWAY VEHICLES
  14.1 Introduction
    14.1.1 Definition of tire-road friction coefficient
    14.1.2 Benefits of tire-road friction estimation
14.2 Longitudinal Vehicle Dynamics and Tire Model for Friction Estimation

14.2.1 Vehicle longitudinal dynamics
14.2.2 Determination of the normal force
14.2.3 Tire model
14.2.4 Friction coefficient estimation for both traction and braking

14.3 Summary of Longitudinal Friction identification Approach

14.4 Identification Algorithm Design

14.4.1 Recursive least-squares (RLS) identification
14.4.2 RLS with gain switching
14.4.3 Conditions for parameter updates

14.5 Estimation of Accelerometer Bias

14.6 Experimental Results

14.6.1 System hardware and software
14.6.2 Tests on dry concrete road surface
14.6.3 Tests on concrete surface with loose snow covering
14.6.4 Tests on surface consisting of two different friction levels
14.6.5 Hard braking test
14.7 Chapter Summary 422

Nomenclature 423

References 424

15. ROLL DYNAMICS AND ROLLOVER PREVENTION 427

15.1 Rollover Resistance Rating for Vehicles 427

15.2 One Degree of Freedom Roll Dynamics Model 433

15.3 Four Degrees of Freedom Roll Dynamics Model 440

15.4 Rollover Index 444

15.5 Rollover Prevention 448

15.6 Chapter Summary 453

Nomenclature 453

References 455

16. DYNAMICS AND CONTROL OF HYBRID GAS ELECTRIC VEHICLES 457

16.1 Types of Hybrid Powertrains 458

16.2 Powertrain Dynamic Model 461

16.2.1 Dynamic Model for Simulation of a Parallel Gas-Electric Hybrid Vehicle 461

16.2.2 Dynamic Model for Simulation of a Power-Split Hybrid Vehicle 464

16.3 Background on Control Design Techniques for Energy Management 469

16.3.1 Dynamic Programming Overview 469

16.3.2 Model Predictive Control Overview 473
