

# Contents

<b>Preface</b> .....	vii
<b>Part I Introduction through Examples</b>	
<b>1 Plane Curves</b> .....	3
1.1 Conics .....	3
1.2 Singularities .....	5
1.3 Bézout’s Theorem .....	7
1.4 Cubics .....	9
1.5 Genus 2 and 3 .....	11
1.6 Hyperelliptic Curves .....	14
<b>Part II Sheaves and Geometry</b>	
<b>2 Manifolds and Varieties via Sheaves</b> .....	21
2.1 Sheaves of Functions .....	22
2.2 Manifolds .....	24
2.3 Affine Varieties .....	28
2.4 Algebraic Varieties .....	32
2.5 Stalks and Tangent Spaces .....	35
2.6 1-Forms, Vector Fields, and Bundles .....	41
2.7 Compact Complex Manifolds and Varieties .....	45
<b>3 More Sheaf Theory</b> .....	49
3.1 The Category of Sheaves .....	49
3.2 Exact Sequences .....	53
3.3 Affine Schemes .....	58
3.4 Schemes and Gluing .....	62
3.5 Sheaves of Modules .....	66
3.6 Line Bundles on Projective Space .....	70
3.7 Direct and Inverse Images .....	72
3.8 Differentials .....	76

<b>4</b>	<b>Sheaf Cohomology</b> .....	79
4.1	Flasque Sheaves .....	79
4.2	Cohomology .....	81
4.3	Soft Sheaves .....	86
4.4	$C^\infty$ -Modules Are Soft .....	89
4.5	Mayer–Vietoris Sequence .....	90
4.6	Products* .....	93
<b>5</b>	<b>De Rham Cohomology of Manifolds</b> .....	97
5.1	Acyclic Resolutions .....	97
5.2	De Rham’s Theorem .....	100
5.3	Künneth’s Formula .....	102
5.4	Poincaré Duality .....	105
5.5	Gysin Maps .....	108
5.5.1	Projections .....	109
5.5.2	Inclusions .....	110
5.6	Fundamental Class .....	111
5.7	Lefschetz Trace Formula .....	113
<b>6</b>	<b>Riemann Surfaces</b> .....	117
6.1	Genus .....	117
6.2	$\bar{\partial}$ -Cohomology .....	122
6.3	Projective Embeddings .....	126
6.4	Function Fields and Automorphisms .....	130
6.5	Modular Forms and Curves .....	133
<b>7</b>	<b>Simplicial Methods</b> .....	137
7.1	Simplicial and Singular Cohomology .....	137
7.2	Cohomology of Projective Space .....	142
7.3	Čech Cohomology .....	144
7.4	Čech Versus Sheaf Cohomology .....	147
7.5	First Chern Class .....	150
<b>Part III Hodge Theory</b>		
<b>8</b>	<b>The Hodge Theorem for Riemannian Manifolds</b> .....	157
8.1	Hodge Theory on a Simplicial Complex .....	157
8.2	Harmonic Forms .....	159
8.3	The Heat Equation* .....	163
<b>9</b>	<b>Toward Hodge Theory for Complex Manifolds</b> .....	169
9.1	Riemann Surfaces Revisited .....	169
9.2	Dolbeault’s Theorem .....	172
9.3	Complex Tori .....	173

**10 Kähler Manifolds** . . . . . 179

    10.1 Kähler Metrics . . . . . 179

    10.2 The Hodge Decomposition . . . . . 183

    10.3 Picard Groups . . . . . 187

**11 A Little Algebraic Surface Theory** . . . . . 189

    11.1 Examples . . . . . 189

    11.2 The Neron–Severi Group . . . . . 193

    11.3 Adjunction and Riemann–Roch . . . . . 195

    11.4 The Hodge Index Theorem . . . . . 198

    11.5 Fibered Surfaces\* . . . . . 200

**12 Hodge Structures and Homological Methods** . . . . . 203

    12.1 Pure Hodge Structures . . . . . 203

    12.2 Canonical Hodge Decomposition . . . . . 205

    12.3 Hodge Decomposition for Moishezon Manifolds . . . . . 210

    12.4 Hypercohomology\* . . . . . 212

    12.5 Holomorphic de Rham Complex\* . . . . . 216

    12.6 The Deligne–Hodge Decomposition\* . . . . . 217

**13 Topology of Families** . . . . . 223

    13.1 Topology of Families of Elliptic Curves . . . . . 223

    13.2 Local Systems . . . . . 228

    13.3 Higher Direct Images\* . . . . . 230

    13.4 First Betti Number of a Fibered Variety\* . . . . . 235

**14 The Hard Lefschetz Theorem** . . . . . 237

    14.1 Hard Lefschetz . . . . . 237

    14.2 Proof of Hard Lefschetz . . . . . 239

    14.3 Weak Lefschetz and Barth’s Theorem . . . . . 241

    14.4 Lefschetz Pencils\* . . . . . 242

    14.5 Cohomology of Smooth Projective Maps\* . . . . . 247

**Part IV Coherent Cohomology**

**15 Coherent Sheaves** . . . . . 255

    15.1 Coherence on Ringed Spaces . . . . . 255

    15.2 Coherent Sheaves on Affine Schemes . . . . . 257

    15.3 Coherent Sheaves on  $\mathbb{P}^n$  . . . . . 259

    15.4 GAGA, Part I . . . . . 263

**16 Cohomology of Coherent Sheaves** . . . . . 265

    16.1 Cohomology of Affine Schemes . . . . . 265

    16.2 Cohomology of Coherent Sheaves on  $\mathbb{P}^n$  . . . . . 267

    16.3 Cohomology of Analytic Sheaves . . . . . 272

    16.4 GAGA, Part II . . . . . 274

**17 Computation of Some Hodge Numbers** ..... 279

17.1 Hodge Numbers of  $\mathbb{P}^n$  ..... 279

17.2 Hodge Numbers of a Hypersurface ..... 282

17.3 Hodge Numbers of a Hypersurface II ..... 285

17.4 Double Covers ..... 287

17.5 Griffiths Residues\* ..... 289

**18 Deformations and Hodge Theory** ..... 293

18.1 Families of Varieties via Schemes ..... 293

18.2 Semicontinuity of Coherent Cohomology ..... 297

18.3 Deformation Invariance of Hodge Numbers ..... 300

18.4 Noether–Lefschetz\* ..... 302

**Part V Analogies and Conjectures\***

**19 Analogies and Conjectures** ..... 307

19.1 Counting Points and Euler Characteristics ..... 307

19.2 The Weil Conjectures ..... 309

19.3 A Transcendental Analogue of Weil’s Conjecture ..... 312

19.4 Conjectures of Grothendieck and Hodge ..... 313

19.5 Problem of Computability ..... 317

19.6 Hodge Theory without Analysis ..... 319

**References** ..... 321

**Index** ..... 327
