The Reader’s Guide to a Unique Book of Its Kind	xvii
References.....	xxiii

Part I Sociophysics: Setting the Frame

1 What is Sociophysics About?	3
1.1 Science Fiction and Asimov’s Foundation Syndrome	3
1.2 What Makes Sense and What Does Not with Asimov’s Fictional Psychohistory	5
1.2.1 Predicting the Future Is Not Possible	5
1.2.2 Historical Vs. Ahistorical Sciences	7
1.2.3 Small Groups, Large Groups, Not so Simple.....	8
1.2.4 A Mathematician Could Not Have Done It, a Physicist Could, Maybe	9
1.3 A Parenthesis on the Fall of Empires	10
1.4 Time for New Paradigms	11
1.5 Sociophysics, a Possible Novel Hard Science: Not a Zero Risk Path.....	13
1.6 Discovering the Limits of Human Freedom Opens the path to Social Freedom	16
References.....	19
2 The Question: Do Humans Behave like Atoms?	21
2.1 My Basic Philosophy	21
2.2 Telling the Truth About What Indeed Physics Is and What It Is Not	23
2.3 Physics Does Not Care About Mathematical Rigor.....	27
2.4 Implementing a Physics-like Approach Outside Physics	28
2.5 But Indeed, Do Humans Behave Like Atoms?	29
2.6 Building Up an “Atom–Individual” Connection	31
2.7 Our Bare Methodology	34

- 2.8 To Sum up 37
- References 39
- 3 Sociophysics: The Origins 41**
 - 3.1 The First Days 42
 - 3.1.1 Breaking the Secret of Critical Phenomena 42
 - 3.1.2 The Physicist’s Corner 43
 - 3.2 The First Days, the First Fight 44
 - 3.3 From Claim to Demonstration 46
 - 3.4 The Story Behind the Scene 48
 - 3.5 More About Academic Freedom 51
 - 3.6 Surviving Within Physics by Not Playing Tennis 52
 - 3.7 Breaking the Gap with a Social Scientist 55
 - 3.8 Changing My Strategy: Back to the World of Physics 57
 - 3.9 The Secret One Shot International Seminar 58
 - 3.10 The Rising Sun of Sociophysics 58
 - 3.11 When Too Much Is Too much 60
 - 3.12 Claiming the Paternity of Sociophysics 61
 - 3.13 Reorientating My Strategy Again to Join a Social Sciences Group 63
 - References 66
- 4 Sociophysics: Weaknesses, Achievements, and Challenges 69**
 - 4.1 The Essential Challenges of Sociophysics 69
 - 4.2 Sociophysics: A New Field Is Emerging 70
 - 4.3 Deciding the Future of Sociophysics 71
 - 4.4 Sociophysics: Epistemological Foundations 72
 - 4.5 Flashback to the Origins 74
 - 4.6 The Soviet-Like Rewriting of the History of Sociophysics 75
 - 4.7 Fatherhood with a Touch of Humor 77
 - 4.8 Basic Weaknesses of Growing Sociophysics 79
 - 4.9 The Positive Achievements of Sociophysics so Far 81
 - 4.10 The First Sociophysics Successful Prediction of a Precise Event 83
 - 4.10.1 Taking Risks to Validate Sociophysics 84
 - 4.10.2 When the Prediction Turns Out to be True 85
 - 4.10.3 When a Prediction Fails 86
 - 4.11 Proposal to Establish a Road Map 86
 - 4.12 What the Climatologists Did with the IPCC Should Not Be Repeated 87
 - References 88

Part II Discovering the Wonderful (and Maybe Scary) World of Sociophysics

5 Sociophysics: An Overview of Emblematic Founding Models 93

5.1 In a Few Words 95

5.1.1 Decision Making 95

5.1.2 Bottom-up Democratic Voting 96

5.1.3 Terrorism 96

5.1.4 Coalitions Versus Fragmentation..... 96

5.1.5 Public Opinion 97

References..... 97

6 Universal Features of Group Decision Making..... 101

6.1 The Strike Phenomenon 101

6.1.1 The Model..... 102

6.1.2 The Operating Mechanism 102

6.1.3 The Overlap with the Physical Model 104

6.1.4 The Novel Counterintuitive Social Highlights 105

6.1.5 Achievements of the Model 106

6.2 How Do Groups Make Their Decisions? 106

6.2.1 The Symmetrical Individual Versus the Symmetrical Group 107

6.2.2 The Random Symmetry Breaking Choice 108

6.2.3 Anticipating the Group Choice..... 109

6.2.4 Individuals Are Often Not Symmetrical 111

6.2.5 Life Is Not a Paradise 113

6.2.6 Some Emblematic Illustrations of the Model..... 114

6.2.7 The Leader Effect 117

6.2.8 The Overlap with the Physical Model 118

6.2.9 The Model’s Achievements 118

References..... 119

7 The Dictatorship Paradox of Democratic Bottom-up Voting 121

7.1 The Local Majority Rule Model 123

7.2 Incorporating the Inertia Effect of Being the Ruler 123

7.3 From Probabilistic to Deterministic Voting..... 125

7.4 The Magic Formula for Presidency 126

7.5 A Simulation to Visualize the Dictatorship Effect of Democratic Voting 127

7.6 From Two to Three Competing Parties 129

7.7 The Overlap with the Physical Model 132

7.8 Achievements of the Model 135

References..... 137

8	The Dynamics of Spontaneous Coalition–Fragmentation Versus Global Coalitions	139
8.1	The Two-Country Problem	139
8.2	The Unstable Three-Country Problem	142
8.3	Superposing Current Pair Bonds to Historical Ones	149
8.4	From Binary to a Multiple Coalitions.....	151
8.5	The Overlap with the Physical Model	152
8.6	Achievements of the Model	153
	References.....	153
9	Terrorism and the Percolation of Passive Supporters	155
9.1	The Geometry of Terrorism	156
9.2	Local Versus Global Terrorism: A Unified Frame.....	160
9.3	What Is to Be Done?.....	163
9.4	The Various Flags of a Terrorist Group	165
9.5	The Overlap with the Physical Model	167
9.6	Achievements of the Model	168
	References.....	168
10	The Modeling of Opinion Dynamics	169
10.1	An Overview	169
10.2	Why Is Public Opinion Often Conservative?	171
10.3	The Local Majority Model and the Existence of Biases	173
10.4	The Appearance of Nonthreshold Dynamics	184
10.5	Mixing the Group Sizes	185
10.6	Heterogeneous Agents and the Contrarian Effect	188
10.7	Thresholdless Driven Coexistence	189
10.8	The One-Sided Inflexible Effect and the Global Warming Issue	191
10.9	The Thresholdless Case.....	193
10.10	Extending the Competition to Three Opinions	195
10.11	The Reshuffling Effect and Rare Event Nucleation	196
10.12	The Overlap with Physical Systems and Other Sociophysics Models	197
10.13	Achievements of the Model	198
10.14	In the Meantime.....	199
	References.....	200
11	By Way of Caution	203
 Part III Democratic Voting in Bottom-Up Hierarchical Structures: From Advantages and Setbacks to Dictatorship Paradoxes		
12	Highlights of the Part	209
12.1	Dictatorships Can Be Democratic.....	209

- 12.2 What It Is About 210
- 12.3 The Wonderful World of Democracy 210
- 12.4 Not Ruling Is Bad for You 211
- 12.5 Big Is Better 212
- 12.6 What Matters 213
- 12.7 The Strategic Key 214
- 12.8 Visualizing the Democratic-Driven Dictatorship Twist 215
- 12.9 The Key Configurations to Infiltrate a Party 215
- 12.10 Life Is More Risky with Three Competing Parties 220
- 12.11 Eastern European Communist Collapse Was Not Sudden 220
- References 221
- 13 Basic Mechanisms for the Perfect Democratic Structure 223**
 - 13.1 Starting from a Naive View of Former Communist Organizations 223
 - 13.2 Setting Up the Simplest Form of a Voting Process 225
 - 13.3 The Single Random Small Group Voting Scheme 227
 - 13.4 Fluctuations, Group Sizes, and Democratic Balance 229
 - 13.5 Limits of the Single Group Voting Scheme 231
 - 13.6 Including Even-Sized Voting Groups 232
 - 13.7 Setting Up the Perfect Democratic Structure 234
 - 13.8 The Dynamics Driven by Repeated Democratic Voting 240
 - 13.9 Some Comments About Zero 243
- 14 Going to Applications 247**
 - 14.1 The Practical Scheme 247
 - 14.2 The Physicist’s Corner: Trying to Be a Little More Mathematical 250
 - 14.3 The Magic Formula 256
 - 14.4 What It Means in Terms of Global Size 263
 - 14.5 The Physicist’s Corner: To Make It Simpler 264
 - 14.6 Putting a Limit on the Global Size 268
- 15 Touching on a Fundamental Aspect of Nature, Both Physical and Human 273**
 - 15.1 Phase Transitions and Critical Phenomena 273
 - 15.2 Revisiting the Practical Scheme 276
 - 15.3 Revisiting the Magic Formula 277
 - 15.4 Rare Dictatorial Events Versus Antidemocratic Ones 279
 - 15.4.1 Another Viewpoint 282
 - 15.4.2 The Physicist’s Corner 283
 - 15.5 From Rare Antidemocratic Events to the Radical Efficiency of Geometric Nesting 284
 - 15.5.1 Monitoring the Rare Antidemocratic Bottom Configurations 284
 - 15.5.2 When the Radical Efficiency Turns Nasty 286

- 15.6 More About Hierarchies 290
 - 15.6.1 Randomness Is Sufficient at the Bottom 290
 - 15.6.2 Geography and Multisize Combination
of Voting Groups 291
 - 15.6.3 A Digression of About a Fifty Percent
Score: What Is the Meaning of a Majority? 294
- References 295

16 Dictatorship Paradoxes of Democratic Voting

- in Hierarchical Structures 297**
 - 16.1 The Inertial Effect of Being in Power 297
 - 16.2 The Dramatic Effect of Tie Break Voting in the Single... 300
 - 16.3 Varying the Voting Group Size 302
 - 16.4 From the Perfect Democratic Structure to the Perfect... 305
 - 16.5 The Dynamics Driven by Repeated Democratic Voting 312
 - 16.5.1 The Physicist’s Corner 313
 - 16.6 From the Magic to the Machiavelli Formula 316
 - 16.6.1 The Physicist’s Corner 320
 - 16.7 Global Size, the Practical Scheme, the Magic Formula 323
 - 16.7.1 Global Size 324
 - 16.7.2 The Practical Scheme 325
 - 16.7.3 The Physicist’s Corner 327
 - 16.7.4 The Magic Formula 330
 - 16.7.5 The Physicist’s Corner 332
 - 16.7.6 The Super Magic Formula 336
 - 16.7.7 The Physicist’s Corner 337
 - 16.8 What Happens to the Rare Antidemocratic Events? 339
 - 16.8.1 The Minimum Number of Bottom Agents
to Win the Presidency 341
 - 16.8.2 The Associated Number of Different
Bottom Nasty Configurations 346
 - 16.8.3 The Actual Probability of a Nasty Bottom
Configuration 347
 - 16.9 All Bottom Minorities and Majorities Winning the Presidency . 348
 - 16.9.1 The Odd Case $r = 3$ 351
 - 16.9.2 The Even Case $r = 4$: The Challenging
View Point 356
 - 16.9.3 The Even Case $r = 4$: The Running Power
View Point 358
 - 16.9.4 The Physicist’s Corner 366
 - 16.10 The Worrying Power of Geometric Nesting or How
to Make Certain a Very Rare Event 367
 - 16.10.1 The Sudden and Unexpected Taking Over
of Large Institutions 368
 - 16.10.2 The Scary Lobbying 368

16.10.3 A Striking Idealized Illustration..... 369

16.10.4 Hint to Restore the Democratic Functioning 369

16.11 Softening the Inertia Principle..... 370

16.11.1 The Physicist’s Corner..... 373

16.11.2 Three Competing Opinions: It Becomes
Even More Counterintuitive 374

16.12 Communist Collapse and French FN Victory 374

16.12.1 Hierarchies Are Everywhere 375

References..... 376

**Part IV The Risky Business of Alliances in Bottom-Up
Democratic Voting with Three-Choice Competition**

17 Bottom-Up Democratic Voting in a Three-Choice Competition..... 379

17.1 Two Competing Parties in Short 380

17.1.1 The General Frame 380

17.1.2 Predicting the Results of Democratic Elections 380

17.1.3 The Bottom-Up Voting Dynamics 382

17.1.4 From Theoretical Principles to Reality 386

17.1.5 From Reality to Implementation 389

17.2 Three Competing Parties 390

17.2.1 Two Competing Parties, a One-Dimensional
Problem 391

17.2.2 Three Competing Parties, a Two-
Dimensional Problem..... 393

17.2.3 The Three-Party Bottom-Up Voting Flow 395

17.2.4 The Physicist’s Corner..... 402

17.3 The Bottom-Up Voting Flow Diagram..... 404

17.3.1 The Frequent Case of Two Large Opposing
Parties with a Small One in Between 406

17.3.2 Some General (α, β, γ) Case Snapshots 409

17.4 The “Golden Triangle” to Win the Presidency 411

References..... 413

18 So Sorry, That’s the End of the Tour! 423

19 I Thank You 427
