# Contents

<b>1 Immunology for the Non-immunologist</b> .....	1
1 The Beginnings of Immunology .....	1
2 The Components of the Healthy Immune Response.....	2
2.1 White Blood Cells.....	4
2.2 Molecules.....	8
References.....	13
<b>2 Neurology for the Non-neurologist</b> .....	15
1 Organization of the Nervous System .....	15
1.1 Electrical Nature: Nerve Transmission and Neurotransmitters.....	15
1.2 Cells of the Nervous System.....	16
1.3 Structure of the Nervous System: CNS, PNS, Upper and Lower Motor Neurons.....	18
2 The Neurological Evaluation .....	21
2.1 Neurological Examination .....	21
2.2 Imaging of the Nervous System.....	22
2.3 EEG and EMG .....	23
References.....	24
<b>3 Neuroimmunology for the Non-neuroimmunologist</b> .....	25
1 The Beginnings of Neuroimmunology: Post-vaccinial Encephalomyelitis.....	25
2 Semple Rabies Vaccine Autoimmune Encephalomyelitis: Temporal Progression. Interplay Between the Nervous and Immune Systems .....	29
2.1 Stage 1. DAY 0: Exposure to the Antigen .....	29
2.2 Stage 2. Days 0–7: Lymph Node Drainage and Processing of Antigen in Peripheral Lymph Node.....	29
2.3 Stage 3. Days 7–10: Recruitment of Myelin-Specific Lymphocytes into the CNS .....	30
2.4 Stage 4. Days 10–20: Maximal Inflammation with Involvement of Local CNS Immunity, Including Cervical Lymph Nodes .....	30
2.5 Stage 5. Days 20 and Later: Recovery .....	31

3	The Tools of the Neuroimmunologist .....	31
4	Aspects of Inflammation in Neuroimmunology Unique to the Nervous System .....	32
5	The Necessity for Great Care in Classifying a Neuroimmunological Disease as “Autoimmune” .....	33
6	The Importance of Antibodies .....	34
	References.....	35
<b>4</b>	<b>The Prototypic Neuroimmunological CNS Disease:</b>	
	<b>Multiple Sclerosis, a Precipis</b> .....	37
1	Definition .....	37
2	Etiopathogenesis .....	37
3	Pathology .....	38
4	Genetics and Epidemiology .....	39
5	Clinical Manifestations .....	39
	5.1 Initial Symptoms.....	39
	5.2 The MS Attack.....	40
6	Natural History and Prognosis .....	42
7	MS Clinical Classifications.....	43
	7.1 “Form of MS” .....	44
	7.2 Disability.....	45
	7.3 Activity.....	45
	7.4 Severity .....	46
	References.....	46
<b>5</b>	<b>Multiple Sclerosis: Diagnosis</b> .....	49
1	History and Examination .....	50
2	Laboratory Findings.....	51
	2.1 Routine Studies: Blood, Urine, Chest X-Ray .....	51
	2.2 CNS Imaging .....	51
	2.3 Cerebrospinal Fluid Analysis.....	54
	References.....	55
<b>6</b>	<b>Multiple Sclerosis Mimics</b> .....	57
1	Cerebrovascular Disease/Stroke.....	58
2	Neurological Infections.....	60
	2.1 HIV .....	60
	2.2 Neurosyphilis .....	60
	2.3 Neurocysticercosis .....	61
	2.4 Lyme Disease .....	61
	2.5 Tropical Spastic Paraparesis .....	61
	2.6 Tuberculosis .....	61
	2.7 Brain Abscess.....	62
3	NMO .....	62
4	ADEM.....	63
5	Leukodystrophies .....	63

6	Other Conditions .....	63
6.1	Neurosarcoidosis .....	63
6.2	Subacute Combined Degeneration .....	65
6.3	Other Neuroinflammatory Diseases .....	65
	References .....	66
<b>7</b>	<b>Multiple Sclerosis Therapy</b> .....	<b>69</b>
1	Disease-Modifying Drugs .....	69
1.1	How Medications Become Approved for Use in MS ....	69
1.2	The Primary Endpoint .....	70
1.3	When Should One Treat with DMDs? .....	71
1.4	General Approach to Therapy .....	71
1.5	Current Agents .....	72
2	Symptomatic Therapies .....	78
	References .....	80
<b>8</b>	<b>Experimental Models of MS</b> .....	<b>83</b>
1	Animal Models of MS .....	83
1.1	Autoimmune .....	83
1.2	Viral .....	87
1.3	Demyelination Induced by Toxins .....	89
2	In Vitro Models of MS .....	89
3	Animal Models of Neuromyelitis Optica (NMO) and the Use of Passive Transfer Models .....	89
	References .....	90
<b>9</b>	<b>Guillain–Barré Syndrome (GBS) and Other Immune-Mediated Neuropathies</b> .....	<b>93</b>
1	Definition .....	93
2	Etiopathogenesis .....	93
3	Pathology .....	95
4	Epidemiology and Etiopathogenesis .....	95
5	Clinical Manifestations .....	96
6	Natural History and Prognosis .....	96
7	Classification .....	96
8	Diagnosis .....	97

	<b>Dermatomyositis .....</b>	<b>111</b>
1	Definition .....	111
2	Etiopathogenesis .....	111
3	Pathology .....	111
4	Genetics and Epidemiology .....	112
5	Clinical Manifestations .....	112
6	Natural History and Prognosis .....	112
7	Classification.....	112
8	Diagnosis.....	112
9	Therapy .....	113
10	Related Neuroimmunological Muscle Diseases .....	113
11	Experimental Models of Inflammatory Muscle Disease.....	114
	References.....	114
<b>12</b>	<b>A Introduction to Neurological Infections: Neuro-infectious</b>	
	<b>Disease as Part of Neuroimmunology .....</b>	<b>115</b>
1	General Rules of Neuro-infectious Diseases .....	116
1.1	Infection of the Nervous System Follows Systemic Infection .....	116
1.2	Neuro-infectious Diseases Should Be in the Differential Diagnosis in Many Patients with Difficult Neurological Syndromes Because of Their Reversibility with Antibiotics.....	116
1.3	Diagnosis by Identification of the Infectious Agent Is Ideal, but Sometimes Impossible.....	116
1.4	Prompt Recognition of Curable Infectious Diseases Is Critical.....	117
1.5	Therapy of Neuro-infectious Diseases Is Frequently More Difficult than Therapy of Infections Elsewhere in the Body .....	119
1.6	Always Keep HIV/AIDS in Mind.....	119
2	Lyme Meningitis: The Prototypic Meningitis.....	119
2.1	Definition .....	119
2.2	Etiopathogenesis .....	119
2.3	Clinical Manifestations .....	121
2.4	Natural History/Prognosis.....	122

2.5	Diagnosis.....	122
2.6	Therapy .....	123
2.7	Classification.....	123
2.8	Selected Important Infectious Meningitides .....	123
3	Herpes Simplex Encephalitis: The Prototypic CNS	
	Parenchymal Infection .....	125
3.1	Definition .....	125
3.2	Etiopathogenesis/Pathology/Genetics/ Epidemiology.....	125
3.3	Clinical Manifestations .....	126
3.4	Natural History and Prognosis .....	127
3.5	Diagnosis.....	127
3.6	Therapy .....	128
3.7	Other Important CNS Parenchymal Infections .....	128
3.8	Rabies, Poliomyelitis, and the Wonder of Vaccination .....	132
4	Infectious Neuritis: Neuropathies of Leprosy and Varicella Zoster Virus .....	133
4.1	Leprosy .....	134
4.2	VZV Infection.....	136
4.3	Immunosuppressed Patients.....	136
