10 Use of Fourier-Transform Infrared (FTIR) Microscopy Method for Detection of Phyto-Fungal Pathogens
Vitaly Erukhimovitch and Mahmoud Huleihel

11 Diagnosis of Parasitic Fungi in the Plankton: Technique for Identifying and Counting Infective Chytrids Using Epifluorescence Microscopy
Télesphore Sime-Ngando, Serena Rasconi, and Mélanie Gerphagnon

12 Fungal Cell Wall Analysis
Pilar Pérez and Juan C. Ribas

13 Histopathological Technique for Detection of Fungal Infections in Plants
Vijai Kumar Gupta and Brejesh Kumar Pandey

14 Development of Media for Growth and Enumeration of Fungi from Water
Segula Masaphy

15 Sabouraud Agar for Fungal Growth
Janelle M. Hare

16 A Method for the Formation of Candida Biofilms in 96 Well Microtiter Plates and Its Application to Antifungal Susceptibility Testing
Christopher G. Pierce, Priya Uppuluri, and Jose L. Lopez-Ribot

17 Screening for Compounds Exerting Antifungal Activities
Jean-Paul Ouedraogo, Ellen L. Lagendijk, Cees A.M.J.J. van den Hondel, Arthur F.J. Ram, and Vera Meyer

18 Fluorescence In Situ Hybridization of Uncultured Zoosporic Fungi
Télesphore Sime-Ngando, Marlène Jobard, and Serena Rasconi

19 Staining Techniques and Biochemical Methods for the Identification of Fungi
Jeyabalan Sangeetha and Devarajan Thangadurai

20 Protocol for the In Vivo Quantification of Superoxide Radical in Fungi
Konstantinos Grintzalis, Ioannis Papapostolou, and Christos Georgiou

21 Isolation of Intact RNA from Sorted S. cerevisiae Cells for Differential Gene Expression Analysis
Jeannette Vogt, Frank Stahl, Thomas Scheper, and Susann Müller

22 Quantitative PCR Analysis of Double-Stranded RNA-Mediated Gene Silencing in Fungi
José J. de Vega-Bartol, Vega Tello, Jonathan Niño, Virginia Casado, and José M. Díaz-Mínguez
Contents

23 Semi-Nested PCR Approach to Amplify Large 18S rRNA Gene Fragments for PCR-DGGE Analysis of Soil Fungal Communities ......................................................... 289
   Miruna Oros-Sichler and Kornelia Smalla

24 Proteomic Protocols for the Study of Filamentous Fungi ........ 299
   Raquel González Fernández and Jesús V. Jorrín Novo

25 Detection and Quantification of Endoprotease Activity Using a Coomassie Dye-Binding Assay ........................................ 309
   Anthony J. O’Donoghue and Cathal S. Mahon

26 Protocol of a LightCycler™ PCR Assay for Detection and Quantification of Aspergillus fumigatus DNA in Clinical Samples of Neutropenic Patients ........................................ 315
   Birgit Spiess and Dieter Buchheidt

27 Application of Polymerase Chain Reaction and PCR-Based Methods Targeting Internal Transcribed Spacer Region for Detection and Species-Level Identification of Fungi........ 321
   K. Lily Therese, R. Bagyalakshmi, and H.N. Madhavan

28 Real-Time PCR Assay in Fungi .................................................. 331
   Naomichi Yamamoto

29 Quantitative Sampling Methods for the Analysis of Fungi: Air Sampling ................................................................. 337
   Mary C. O’Loughlin, Katherine D. Turner, and Kevin M. Turner

30 Transformation of Filamentous Fungi in Microtiter Plate .... 343
   Bianca Gielesen and Marco van den Berg

31 Molecular Fingerprinting of Fungal Communities in Soil ...... 349
   Roberto A. Geremia and Lucie Zinger

32 Development of Microsatellite Markers from Fungal DNA Based on Shotgun Pyrosequencing ........................................... 357
   Shaobin Zhong

33 Multiplex and Quantifiable Detection of Infectious Fungi Using Padlock Probes, General qPCR, and Suspension Microarray Readout ......................................................... 363
   Magnus Jobs, Ronnie Eriksson and Jonas Blomberg

34 Rapid Deletion Plasmid Construction Methods for Protoplast and Agrobacterium-based Fungal Transformation Systems ................................................................. 375

35 Improved Transformation Method for Alternaria Brassicicola and Its Applications ......................................................... 395
   Yangrae Cho, Akhil Srivastava, and Christopher Nguyen
36 Methods for High-Quality DNA Extraction from Fungi .......... 403
Vijai Kumar Gupta, Maria G. Tuohy, and Rajeeva Gaur

37 Production of Recombinant Proteins from Pichia pastoris: Interfacing Fermentation and Immobilized Metal Ion Affinity Chromatography ............................................. 407
Berend Tolner, Gaurav Bhavsar, Bride Foster, Kim Vigor, and Kerry Chester

38 Development of a Real-Time Quantitative PCR Assay for the Assessment of Uncultured Zoosporic Fungi ............ 421
Télesphore Sime-Ngando and Marlène Jobard

39 Nucleic and Protein Extraction Methods for Fungal Exopolysaccharide Producers ........................................... 427
Jochen Schmid, Dirk Mueller-Hagen, Volker Sieber, and Vera Meyer

40 Directed Evolution of a Fungal Xylanase for Improvement of Thermal and Alkaline Stability ............................................. 435
Dawn Elizabeth Stephens, Suren Singh, and Kugen Permaul

41 Genome Shuffling Protocol for the Pentose-Fermenting Yeast Scheffersomyces stipitis .......................................................... 447
Paramjit K. Bajwa, Nicole K. Harner, Terri L. Richardson, Sukhdeep Sidhu, Marc B. Habash, Jack T. Trevors, and Hung Lee

42 Detection and Identification of Fungal Microbial Volatile Organic Compounds by HS-SPME-GC–MS .................... 455
Bernhard Kluger, Susanne Zeilinger, Gerlinde Wiesenberger, Denise Schöfbeck, and Rainer Schuhmacher

43 Transformation Methods for Slow-Growing Fungi ............... 467
Suman Mukherjee and Rebecca Creamer

44 Enzymatic Saccharification of Lignocellulosic Biomass .......... 475
Manimaran Ayyachamy, Vijai Kumar Gupta, Finola E. Cliffe, and Maria G. Tuohy

45 Protoplast Fusion Techniques in Fungi ............................. 483
Annie Juliet Gnanam

46 Large-Scale Production of Lignocellulolytic Enzymes in Thermophilic Fungi ................................................................. 489
Manimaran Ayyachamy, Mary Shier, and Maria G. Tuohy

47 Panfungal PCR Method for Detection of Aflatoxigenic Molds ................................................................. 495
Malik M. Ahmad, Pravej Alam, M.Z. Abdin, and Saleem Javed

48 Protocols for the Quantification of dsDNA and Its Fragmentation Status in Fungi ......................................................... 501
Ioannis Papapostolou, Konstantinos Grintzalis, and Christos Georgiou
49 Rapid Identification and Detection of Pathogenic Fungi by Padlock Probes
Clement K.M. Tsui, Bin Wang, Cor D. Schoen, and Richard C. Hamelin

50 Drug-Induced Permeabilization in Fungi
Maria D. Mayan, Alexandra McAleenan, and Priscilla Braglia

51 Extraction and Characterization of Taxol: An Anticancer Drug from an Endophytic and Pathogenic Fungi
M. Pandi, P. Rajapriya, and P.T. Manoharan

52 Identification of Mycotoxigenic Fungi Using an Oligonucleotide Microarray
Eugenia Barros

53 DNA Microarray-Based Detection and Identification of Fungal Specimens
Minna Mäki

54 Bioinformatic Protocols and the Knowledge-Base for Secretomes in Fungi
Gengkon Lum and Xiang Jia Min

55 High-Throughput Functional Annotation and Data Mining of Fungal Genomes to Identify Therapeutic Targets
Gagan Garg and Shoba Ranganathan

56 Application of Support Vector Machines in Fungal Genome and Proteome Annotation
Sonal Modak, Shimantika Sharma, Prashant Prabhakar, Akshay Yadav, and V.K. Jayaraman

57 Bioinformatics Tools for the Multilocus Phylogenetic Analysis of Fungi
Devarajan Thangadurai and Jeyabalan Sangeetha
