Contents

1 Multibody Dynamic Simulation of the Lunar Landing ............................................................... 1
   Huinam Rhee, Sang Jin Park, and Tae Sung Kim

2 Experimental and Numerical Approaches on Behavior of GLARE 5 Beams:
   Influences of Thickness and Stacking Sequence ................................................................. 7
   A. Seyed Yaghoubi and B. Liaw

3 A Spectrally Preconditioned Iterative Reduced Correction Algorithm for Vibro-acoustic Problems .......... 17
   Umut Tabak and Daniel J. Rixen

4 Numerical and Experimental Study of Local Cell Resonators to Obtain Low-Frequency
   Vibrational Stopbands in Periodic Lightweight Structures .................................................. 35
   Claus C. Claeys, Marianna Vivolo, Paul Sas, and Wim Desmet

5 Identification of Material Parameters in Biot’s Model by the Homogenization Method ................... 43
   Takashi Yamamoto, Shinichi Maruyama, Kazuhiro Izui, and Shinji Nishiwaki

6 Piezoelectric Typical Section for Wind Energy Harvesting ..................................................... 53
   Vagner Candido de Sousa, Douglas D’Assunção, and Carlos De Marqui Jr.

7 Nonlinear Testing and Models Comparison of Magneto-Mechanical Energy Scavengers ................. 63
   Elvio Bonisoli, Carlo Rosso, and Francesco Di Monaco

8 A Closed Form Solution to the Early-Time Underwater Explosion (UNDEX) Response
   of a Rectangular Air-Backed Ship Hull Panel ......................................................................... 71
   Frederick A. Costanzo

9 Passive Vibration Isolation and Absorber System for Earth Imaging
   from the International Space Station (ISS) ............................................................................ 87
   Jaganathan Ranganathan, Doug Olsen, and William Semke

10 Pseudovelocity Modal Stress Velocity Proportionality ................................................................ 95
    Howard A. Gaberson

11 Numerical Modeling of One-Dimensional Wave Propagation in Non-Homogeneous Materials .......... 111
    Arnaldo J. Mazzei Jr. and Richard A. Scott

12 Stiffness and Damping Characterisation for a Hydraulic Engine Mount ................................... 129
    C.B. Nel and A.J. Steyn

13 Characterization of Bio-Inspired Synthetic Hair Cell Sensors .................................................. 137
    Ezra Jampole, Noël Spurgeon, Trevor Avant, and Kevin Farinholt

32 Experimental Damage Diagnosis of a Model Three-Story Spatial Frame
S. Sabatino and E.K. Ervin

33 Detection of Shaft Cracks Using Vibration Signature Analysis
Surendra N. Suri Ganeriwala

34 Separation of Sine and Random Components from Vibration Measurements
Charlie Engelhardt, Mary Baker, Andy Mouron, and Håvard Vold

35 Post-Earthquake Damage Detection in Instrumented Buildings
Using Identified Dissipated Energy
Eric M. Hernandez and Geoff May

36 Ultrasonic Vibration Method for Damage Detection in Composite Aircraft Components
J.L. Rose, F. Yan, Y. Liang, and C. Borigo

37 Reliability of Dynamically Measured Flexibility Matrix on Damage Detection of Frame Structures
Hooman Monajemi, Hashim Abdul Razak, and Zubaidah Ismail

38 Wavelet Based Mode Shape Analysis for Damage Detection
Mario Algaba, Mario Solís, and Pedro Galván

39 Application of FE Model Updating for Damage Assessment of FRP Composite Beam Structure
O.A. Adediran, M.M. Abdel Wahab, W. Xu, and A.D. Crocombe

40 An Examination of Some Aspects of Factor Analysis in Damage Detection
Salma Mozaffari Kojidi and Dionisio P. Bernal

41 The Use of Continuous System Identification for Evaluation of Concrete E-Modulus Evolution: Laboratory and Field Applications
Rafael Aguilar, Luís F. Ramos, and Miguel Azenha

42 Temperature Effect on Ballistic Impact of Woven Graphite/Epoxy Composites
Yougashwar Budhoo, Feridun Delale, and Benjamin Liaw

43 Spatial Noise Component Identification Based on Different Vibro-Acoustic Data Sets
Gian Marco Revel, Milena Martarelli, and Paolo Chiariotti

44 Improving Test Rig Performance Using Passive Components
Anders T. Johansson and Thomas J.S. Abrahamsson

45 Continuous Scanning LDV by Signal Re-sampling Method: A New Signal Processing Approach
P. Castellini, F. Sopranzetti, M. Martarelli, and E.P. Tomasini

46 Design of High Impedance Test Rig for Composite Structures Vibration Measurements
D. Di Maio, S. Berardi, N. Vitale, and David J. Ewins

47 Technique to Measure the Dynamic Behavior of Road Bike Wheels
Julien Lépine, Yvan Champoux, and Jean-Marc Drouet

48 Sensor Nodes for the Dynamic Assessment of Alpine Skis
M. Bassetti, F. Braghin, F. Castelli-Dezza, S. Negrini, and P. Pennacchi

49 The Use of Stereo-Photogrammetry to Precisely Determine 3D-Positions, Motions and Deformations on Sports Equipment
Hagen Berger, Oliver Erne, and Markus Klein

50 Experimental Assessment of Bobsleigh Dynamics and Ice-Skate Contact Forces
Francesco Braghin, Federico Cheli, Stefano Melzi, and Edoardo Sabbioni
51 Instrumented Rowing Machine for Optimized Training ........................................................... 499
M. Bassetti, Francesco Braghin, Federico Cheli, and Stefano Maldifassi

52 An Experimental Study of Climbers Performances Based on Hand-Grip Force Measurement .......... 507
Francesco Braghin, Federico Cheli, Stefano Maldifassi, Edoardo Sabbioni, and Marco Sbrosi

53 Structural Analysis of the Effects of Wing Payload Pods on Small UAS ........................................ 515
Kaci J. Lemler and William H. Semke

54 Response of Nuclear Containment Structure to Aircraft Crash ................................................... 525
M.A. Iqbal, P. Bhargava, S. Rai, and M.R. Sadique

55 Application of Analytical Methods for Advanced Flight Flutter Test ........................................... 537
Wolfgang Luber

56 A Novel Modal Combination Rule Under Multi-component Ground Motion ....................................... 551
Ayan Sadhu and Vinay Kumar Gupta

57 A Dynamic Model Tailored to Flexible Launch Vehicle Umbilical Analysis ...................................... 565
Joseph P. Atkinson, Rory N. Thomas, and Roy C. Burton

58 A Novel Optimization Strategy for Command Shaping Control ................................................... 581
Khaled A. Alghanim, Khaled A. Alhazza, and Ziyad N. Masoud

59 Sensitivities of Eigenvalues and Eigenvectors from Complex Perturbations .................................. 589
Dionisio Bernal

60 A Review of Uncertainty Quantification of Estimation of Frequency Response Functions .................. 595
Christopher Majba, Randall Allemang, and Allyn Phillips

61 Variability Improvement of Key Inaccurate Node Groups – VIKING .............................................. 603
Louis Thibault, Adam Butland, and Peter Avitabile

62 A Reduced Model Approximation Approach Using Model Updating Methodologies ....................... 625
Tim Marinone, Adam Butland, and Peter Avitabile

63 Passive Noise Reduction Using the Modally Enhanced Dynamic Absorber ..................................... 637
Christopher Page, Peter Avitabile, and Christopher Niezrecki

64 Identifying the Modes Excited in a Tennis Racket by a Forehand Drive ......................................... 649
G. Banwell, J.R. Roberts, S. Mohr, and S.J. Rothberg

65 The Benefits of Duffing-type Nonlinearities and Electrical Optimisation of a Randomly Excited Energy Harvester ................................................................. 657
F.L. Green, K. Worden, K. Atallah, and N.D. Sims
Topics in Modal Analysis II, Volume 6
Allemang, R.; De Clerck, J.; Niezrecki, C.; Blough, J.R. (Eds.)
2012, X, 674 p. 579 illus., Hardcover
