

# Contents

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>Literature Review</b> .....	3
2.1	An Overview of Aerodynamic Entrainment of Dust Particles into Air .....	3
2.2	Characterization of the Aerodynamic Forces Acting on a Solid Particle .....	4
2.3	Characterization of the forces Conserving the layer .....	10
2.4	Fundamental Studies of Particle Removal from Surfaces .....	12
2.5	Applied Research on Aerodynamic Entrainment Threshold .....	13
2.6	Applied Research on Aerodynamic Entrainment Mass Flux .....	19
2.7	Secondary Explosion Propagation Tests .....	25
2.8	Computational Simulation of Aerodynamic Dust Entrainment Phenomena .....	27
2.9	Gaps in Available Information .....	28
<b>3</b>	<b>Proposed Strawman Method</b> .....	29
3.1	An introduction to the Proposed Strawman Methodology .....	29
3.2	Estimation of Threshold Entrainment Velocity for Dust .....	30
3.3	Estimation of the Entrained Mass Flux .....	32
3.4	Comparisons with Large Scale Explosion Data .....	32
3.5	Estimation of the Dust Entrainment Caused by Primary Event Scenarios .....	38
3.6	Extension of the Strawman Method to Elevated Surfaces .....	46
<b>4</b>	<b>Validation Plan</b> .....	47
4.1	Uncertainties in the Mass Flux Correlation .....	47
4.2	Recommended Test Arrangement .....	48
4.3	Recommended Test Matrix .....	49

**Appendix A: Ad Hoc Methods to Characterize Material**

**Dustiness and Entrainability** ..... 51

    A.1 Particle Characterization ..... 51

    A.2 Cohesion Tests ..... 52

    A.3 Terminal Velocity Tests..... 54

    A.4 Dispersibility Tests ..... 55

**Appendix B: Alternative Mechanism on Dust Cloud Generation..... 59**

**Bibliography..... 63**

Towards Estimating Entrainment Fraction for Dust  
Layers

Ural, E.A.

2011, XVIII, 70 p. 28 illus., Softcover

ISBN: 978-1-4614-3371-2
