Contents

Part I  Methods of Production of Cement-Waste Forms

1  A Summary of IAEA Coordinated Research Project on Cementitious Materials for Radioactive Waste Management .......................................................... 3
   Z. Drace and M.I. Ojovan

2  R&D on Cementation of Pulp with Complex Physical and Chemical Composition Stored in Tanks at the Mining Chemical Combine ......................................... 13

3  Cementation in High Energy Mixer of ILW Surrogate Slurry. Demonstration of the Process at Semi-industrial Scale .................. 21
   G. Cardinal, P. Regnard, E. Tronche, and L. Donnet

Part II  Physico-Chemical Processes Occurring in Cement-Waste Forms at Early Age

4  Hydration of Blended Cements .......................................................... 33
   B. Lothenbach

5  Application of a Sub-lattice Model to Predictions of Cement Hydrate Chemistry ................................................................. 43

6  Characterization and Solubility Determination of the Solid-Solution Between AFm-I₂ and AFm-SO₄ .......... 57
   L. Aimoz, E. Wieland, D.A. Kulik, B. Lothenbach, M.A. Glaus, and E. Curti
Part III Influence of External and Internal Factors on Long Term Properties of Cement-Waste Package and Cement Barriers

7 Coupling Between Leaching and Mechanical Behaviour of Concrete ................................................. 69
J.M. Torrenti, T. de Larrard, and F. Benboudjema

8 Coupled Mechanical and Chemo-Transport Model for the Simulation of Cementitious Materials Subjected to External Sulfate Attack ........................................ 85
B. Bary, N. Leterrier, E. Deville, and P. Le Bescop

9 Micro- and Macroscopic Investigations of Actinide Binding in Cementitious Materials ............................................. 93
E. Wieland, R. Dähn, X. Gaona, N. Macé, and J. Tits

10 A New Radionuclide Sorption Database for Benchmark Cement Accounting for Geochemical Evolution of Cement ........... 103

11 On the Determination of the Diffusion Coefficient of Ionic Species Through Porous Materials ............................................. 113
H. Mercado, S. Lorente, and X. Bourbon

12 Moisture Transport Properties of Cement-Based Materials for Engineered Barriers in Radioactive Waste Disposal ............ 125
X.Y. Pang, K.F. Li, and C.Q. Li

13 Simulation of Gas Hydrogen Diffusion Through Partially Water Saturated Monomodal Materials ............................................. 135
C. Boher, S. Lorente, F. Frizon, and F. Bart

14 Microbial Catalysis of Redox Reactions in Concrete Cells of Nuclear Waste Repositories: A Review and Introduction ........... 147
A. Albrecht, A. Bertron, and M. Libert

15 Leaching of Nuclear Waste Glass in Cement Pore Water: Effect of Calcium in Solution ............................................. 161
S. Depierre, F. Frizon, S. Gin, and F. Angeli

Part IV Emerging and Alternative Cementitious Systems

16 Alternative Binders to Ordinary Portland Cement for Radwaste Solidification and Stabilization .......................... 171
C. Cau-dit-Coumes
