

# Contents

## Part I The Psychology of Innovation: Attitude Adjustment

<b>1 Attitude Adjustment, Jargon, and Acronyms</b> .....	3
<b>2 Optimization: The Enemy of Innovation</b> .....	5
Exercises .....	14
<b>3 Parallel Universes</b> .....	15
Exercises .....	18

## Part II TRIZ Thinking and Problem Solving Tools

<b>4 The Ideal Result</b> .....	23
Exercises .....	31
<b>5 Identify and Use Resources</b> .....	33
(a) Substances/Materials .....	37
(b) Time.....	38
(c) Space.....	39
(d) Fields and Field Conversions .....	42
1. Mechanical Fields.....	43
2. Thermal .....	44
3. Chemical.....	44
(e) Information .....	45
(f) People and Their Skills .....	49
(g) “Negative” Resources.....	50
Exercises .....	52
Reference .....	53
<b>6 Whose Ideal Result and Whose Resources?</b> .....	55
Exercises .....	58

**7 Adding Useful Complexity: One Approach to the Ideal Result** ..... 61

**8 Trimming: Another Approach to the Ideal Result**..... 67  
Exercises ..... 71

**9 Inventive Principles: What Do Millions of Patents Teach Us?** ..... 73

Inventive Principle #1: Segmentation ..... 76

Inventive Principle #2: “Taking Out”/Trimming/Physical Separation..... 76

Inventive Principle #3: Local Quality ..... 77

Inventive Principle #4: Asymmetry ..... 78

Inventive Principle #5: Merging/Combining ..... 78

Inventive Principle #6: Universality..... 79

Inventive Principle #7: “Nested Doll” ..... 79

Inventive Principle #8: Anti-weight ..... 80

Inventive Principle #9: Preliminary Anti-action ..... 81

Inventive Principle #10: Preliminary Action (“Do It in Advance”)..... 81

Inventive Principle #11: Beforehand Cushioning ..... 82

Inventive Principle #12: Equipotentiality ..... 82

Inventive Principle #13: “Other Way Around”/Do It in Reverse ..... 83

Inventive Principle #14: Curvature/Spheroidality..... 83

Inventive Principle #15: Dynamics/Dynamism ..... 84

Inventive Principle #16: Partial or Excessive Action..... 85

Inventive Principle #17: Another Dimension..... 85

Inventive Principle #18: Mechanical Vibration..... 86

Inventive Principle #19: Periodic Action ..... 86

Inventive Principle #20: Continuity of Useful Action ..... 87

Inventive Principle #21: Skipping/Rushing Through..... 87

Inventive Principle #22: Blessing in Disguise/“Lemons into Lemonade” ..... 88

Inventive Principle #23: Use of Feedback ..... 89

Inventive Principle #24: “Intermediary” ..... 89

Inventive Principle #25: Self-service ..... 90

Inventive Principle #26: Copying..... 90

Inventive Principle #27: Cheap Short-Living Object..... 91

Inventive Principle #28: Mechanics Substitution..... 92

Inventive Principle #29: Pneumatics and Hydraulics ..... 93

Inventive Principle #30: Flexible Shells and Thin Films ..... 93

Inventive Principle #31: Porous Materials ..... 94

Inventive Principle #32: Color Changes ..... 94

Inventive Principle #33: Homogeneity ..... 95

Inventive Principle #34: Discarding and Recovering..... 95

Inventive Principle #35: Parameter Change..... 96

Inventive Principle #36: Phase Transitions ..... 96

Inventive Principle #37: Thermal Expansion ..... 97

Inventive Principle #38: Strong Oxidants .....	97
Inventive Principle #39: Inert Atmosphere .....	98
Inventive Principle #40: Composite Materials .....	98
Frequency of Principle Use .....	99
Exercises .....	103
References .....	104
<b>10 The TRIZ Contradiction Table .....</b>	<b>105</b>
TRIZ Parameter Definitions .....	106
Using the TRIZ Contradiction Table .....	109
Exercises .....	113
References .....	113
<b>11 TRIZ Separation Principles .....</b>	<b>131</b>
Business Case Study .....	138
Exercises .....	141
Reference .....	142
 <b>Part III TRIZ Strategy and Analytical Tools</b>	
<b>12 Lines of Product System Evolution .....</b>	<b>145</b>
Products, Systems, and Services Become More Dynamic and Responsive Over Time .....	146
Exercises .....	147
Oscillation Between Simplicity and Complexity .....	148
Exercises .....	150
Subsystem Parts Evolve at Different Rates .....	150
Exercises .....	151
Matching and Mismatching .....	152
Exercises .....	153
Evolution Along Field Lines .....	153
Exercises .....	154
<b>13 Combining Upward Integration with Lines of Evolution .....</b>	<b>157</b>
Upward Integration .....	157
Exercises .....	160
Combining Upward Integration with Lines of Evolution .....	160
Exercises .....	162
The TRIZ Cube .....	163
Exercises .....	164
 <b>Part IV Special Tools and Techniques, TRIZ Problem Modeling, and Integration of TRIZ with Other Tools</b>	
<b>14 Special TRIZ Tools .....</b>	<b>169</b>
(a) Smart Little People Modeling .....	169
(b) TRIZ in “Reverse” .....	169

- 15 TRIZ Problem Modeling**..... 173
- 16 Using TRIZ with Other Tools** ..... 177
  - Exercises ..... 179
  - Reference ..... 179
- Summary**..... 181
- Epilogue** ..... 183
- Trademarks**..... 185
- Resources and Additional Reading** ..... 187
- Templates for Your Use** ..... 189
  - 1. Optimization Graph ..... 189
  - 2. Different Views of the Ideal Result..... 189
  - 3. Substances and Material Resources ..... 190
  - 4. Space Resources..... 190
  - 5. Time Resources? ..... 190
  - 6. Informational Resources ..... 191
  - 7. Fields and Field Conversions ..... 191
  - 8. Negative Resources ..... 191
  - 9. Trimming Table..... 191
  - 10. 40 Inventive Principles..... 192
  - 11. Traditional Contradiction Table ..... 193
  - 12. Group Answers to the Contradictions in Innovation Problem..... 193
  - 13. Lines of Evolution Templates ..... 194
- Index** ..... 197

The Ideal Result

What It Is and How to Achieve It

Hipple, J.

2012, XVI, 192 p. 56 illus., 32 illus. in color. With online files/update., Softcover

ISBN: 978-1-4614-3706-2
