# Contents

## Part I  Natural Product Drugs and Cancer Therapeutics

1. The Impact of Natural Products Upon Cancer Chemotherapy ................................................................. 3  
   A. Ganesan

2. Identification and Development of Vascular Disrupting Agents: Natural Products That Interfere with Tumor Growth ................................................................. 17  
   Andrea T. Hooper, Frank Loganzo, Chad May, and Hans-Peter Gerber

3. Discodermolide: Past, Present, and Future ................................................................. 39  
   Ross E. Longley

4. HDAC Inhibitors and Other Histone Modifying Natural Products as Emerging Anticancer Agents ................................................................. 59  
   Lilibeth A. Salvador and Hendrik Luesch

5. Natural Product Cytotoxins as Payloads for Antibody Drug Conjugates ................................................................. 97  
   Frank E. Koehn

## Part II  Advances in Natural Product Cancer Drug Discovery

6. Natural Product Scaffolds in Cancer Therapy ............................................................................. 123  
   Christian P. Mang and Lars Ole Haustedt

7. The Role of Genetic Engineering in Natural Product-Based Anticancer Drug Discovery ............................................................................. 175  
   Claudia Eva-Maria Unsin, Scott R. Rajski, and Ben Shen
8 Accessing Anti-cancer Natural Products by Plant Cell Culture ................................................................. 193
   Lisa M. Leone and Susan C. Roberts

9 Natural Products as Tools for Discovering New Cancer Targets ............................................................ 213
   John A. Beutler

Index......................................................................................................................................................... 239
Natural Products and Cancer Drug Discovery
Koehn, F.E. (Ed.)
2013, XII, 244 p., Hardcover
