
Contents

1 Mycoheterotrophy: An Introduction	1
Vincent S.F.T. Merckx	
2 Taxonomy and Classification	19
Vincent S.F.T. Merckx, John V. Freudenstein, Jonathan Kissling, Maarten J.M. Christenhusz, Raymond E. Stotler, Barbara Crandall-Stotler, Norman Wickett, Paula J. Rudall, Hiltje Maas-van de Kamer, and Paul J.M. Maas	
3 Biogeography and Conservation	103
Vincent S.F.T. Merckx, Erik F. Smets, and Chelsea D. Specht	
4 Subterranean Morphology and Mycorrhizal Structures	157
Stephan Imhof, Hugues B. Massicotte, Lewis H. Melville, and R. Larry Peterson	
5 Evolution and Diversification	215
Vincent S.F.T. Merckx, Constantijn B. Mennes, Kabir G. Peay, and József Geml	
6 Progress and Prospects for the Ecological Genetics of Mycoheterotrophs	245
D. Lee Taylor, Craig F. Barrett, Gemma E. Beatty, Sarah E. Hopkins, Aaron H. Kennedy, and Matthew R. Klooster	
7 Species Interactions of Mycoheterotrophic Plants: Specialization and its Potential Consequences	267
Richard J. Waterman, Matthew R. Klooster, Heiko Hentrich, and Martin I. Bidartondo	
8 The Physiological Ecology of Mycoheterotrophy	297
Nicole A. Hynson, Thomas P. Madsen, Marc-André Selosse, Iris K.U. Adam, Yuki Ogura-Tsujita, Melanie Roy, and Gerhard Gebauer	
Glossary	343
Index	345
