Part I First Study the Science, Then Practice the Art

1 The Concept of Stress	3
Stress, Behavior, and Health	3
Defining Stress	5
Ten Key Concepts in the Study of Stress	7
Plan of the Book	13
References	13
2 The Anatomy and Physiology of the Human Stress Response	17
Neurological Foundations	17
Neural Transmission	18
Basic Neuroanatomy	21
A Systems Model of the Human Stress Response	24
Stressor Events	27
Cognitive–Affective Domain	28
Neurological Triggering Mechanisms	30
The Stress Response	31
The Neural Axes: Stress Response Via Neural Innervation of Target Organs	31
The “Fight-or-Flight” Response: The Neuroendocrine Axis	33
The Stress Response: A Summary	40
Target-Organ Activation	41
Coping	44
Summary	45
References	47
3 The Link from Stress Arousal to Disease	53
Selye’s “General Adaptation Syndrome”	54
Lachman’s Model	55
Sternbach’s Model	56

Kraus and Raab’s “Hypokinetic Disease” Model 56

Schwartz’s “Disregulation” Model 57

Conflict Theory of Psychosomatic Disease 58

Everly and Benson’s “Disorders of Arousal” Model 59

Summary 61

References 63

4 Stress-Related Disease: A Review 67

 Gastrointestinal Disorders 67

 Gastrointestinal Physiology 68

 Peptic Ulcers 68

 Ulcerative Colitis 70

 Irritable Bowel Syndrome 70

 Esophageal Reflux 71

 Cardiovascular Disorders 71

 Cardiovascular Physiology 72

 Essential Hypertension 74

 Vasospastic Phenomena 75

 Myocardial Ischemia and Coronary Artery Disease 75

 Respiratory Disorders 76

 Allergy 76

 Bronchial Asthma 76

 Hyperventilation 77

 Musculoskeletal Disorders 77

 Skin Disorders 78

 Immune System 78

 Innate Immunity 78

 Acquired Immunity 80

 Cell-Mediated Processes 80

 Humoral Responses 81

 Stress and Immune Functioning: Animal Studies 83

 Stress and Immune Function: Human Studies 84

 Psychological Manifestations of the Stress Response 91

 Summary 93

 References 95

5 Measurement of the Human Stress Response 105

 Stressor Scales 105

 Cognitive–Affective Correlate Scales 106

 Neurological Triggering Mechanisms 107

 Measuring the Physiology of the Stress Response 107

 Assessment of the Neural Axes 107

 Electrodermal Measures 107

 Electromyographic Measurement 108

 Cardiovascular Measurement 109

Assessment of the Neuroendocrine Axis	110
Assessment of the Endocrine Axes	111
Assessment of Target-Organ Effects	113
Physical Diagnosis	113
Psychological Diagnosis	113
Minnesota Multiphasic Personality Inventory—2	114
The Sixteen Personality Factor Questionnaire (16-PF)	114
Millon Clinical Multiaxial Inventory—II	115
Millon Clinical Multiaxial Inventory—III	115
Common Grief Response Questionnaire	117
Impact of Events Scale—Revised	117
Penn Inventory for Posttraumatic Stress Disorder (PENN)	117
Stanford Acute Stress Reaction Questionnaire	117
Taylor Manifest Anxiety Scale	117
State–Trait Anxiety Inventory	118
Affect Adjective Checklist	118
Subjective Stress Scale	118
Profile of Mood States	118
Connor Davidson Resilience Measure	119
Inventory of Complicated Grief Scale	119
Generalized Anxiety Disorder Questionnaire	119
Beck Anxiety Inventory	119
Symptom Checklist-90 Revised	120
Screen for Posttraumatic Stress Symptoms	120
Inventory of Psychosocial Functioning	120
The Assessment of Coping	121
Law of Initial Values	121
Summary	122
References	123
6 Personologic Diathesis and Human Stress	127
Historical Foundations	128
The Principle of Personologic Primacy	132
Personologic Psychotherapy and Stress-Related Disorders	133
Millon’s Personality Theory and Stress	134
Summary	138
References	139
7 Resilience: The Final Frontier	143

Part II The Treatment of the Human Stress Response

8 Psychotherapy: A Cognitive Perspective	157
Cognitive Primacy	158
Cognitive-Based Psychotherapy	160
Ellis’s Model	160
Beck’s Cognitive Therapy Model	161
Meichenbaum’s Stress Inoculation Training.....	163
Acceptance and Commitment Therapy.....	166
Summary	168
References.....	169

9 A Neurophysiological Rationale for the Use of the Relaxation Response: Neurological Desensitization.....	173
Disorders of Arousal	174
Psychiatric Disorders of Arousal	175
Somatic Disorders of Arousal.....	178
The Neurological Foundations of Limbic Hypersensitivity and the Disorders of Arousal.....	179
Ergotropic Tuning	179
Neurological Reverberation and Charging	180
Neuromuscular Set-Point Theory.....	181
Models of Neuronal Plasticity	182
The Relaxation Response.....	186
The Physiology of the Relaxation Response	187
Selecting a Relaxation Technique	189
Clinical Precautions and Undesirable Side Effects.....	190
Loss of Reality Contact.....	190
Drug Reactions.....	191
Panic States	191
Premature Freeing of Repressed Ideation	191
Excessive Trophotropic States	191
Summary	192
References.....	193

10 Meditation.....	201
History of Meditation.....	201
Types of Meditation	202
Mechanisms of Action	204
Therapeutic Hallmarks.....	207
Research on the Clinical Applications and Effects of Meditation	209

- How to Implement Meditation..... 211
 - Preparation 211
 - Components 211
 - Example Protocol..... 213
- Summary 216
- References..... 217

- 11 Voluntary Control of Respiration Patterns..... 223**
