

# Contents

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>Heavy-Tailed and Long-Tailed Distributions</b> .....	7
2.1	Heavy-Tailed Distributions .....	7
2.2	Characterisation of Heavy-Tailed Distributions in Terms of Generalised Moments .....	11
2.3	Lower Limit for Tails of Convolutions .....	14
2.4	Long-Tailed Functions and Their Properties .....	17
2.5	Long-Tailed Distributions .....	21
2.6	Long-Tailed Distributions and Integrated Tails .....	22
2.7	Convolutions of Long-Tailed Distributions .....	24
2.8	$h$ -Insensitive Distributions .....	31
2.9	Comments .....	38
2.10	Problems .....	39
<b>3</b>	<b>Subexponential Distributions</b> .....	43
3.1	Subexponential Distributions on the Positive Half-Line .....	43
3.2	Subexponential Distributions on the Whole Real Line .....	45
3.3	Subexponentiality and Weak Tail-Equivalence .....	49
3.4	The Class $\mathcal{S}^*$ of Strong Subexponential Distributions .....	53
3.5	Sufficient Conditions for Subexponentiality .....	57
3.6	Conditions for Subexponentiality in Terms of Truncated Exponential Moments .....	59
3.7	$\mathcal{S}$ Is a Proper Subset of $\mathcal{L}$ .....	62
3.8	Does $F \in \mathcal{S}$ Imply That $F_I \in \mathcal{S}$ ? .....	63
3.9	Closure Properties of the Class of Subexponential Distributions .....	65
3.10	Kesten's Bound .....	67
3.11	Subexponentiality and Randomly Stopped Sums .....	69
3.12	Comments .....	71
3.13	Problems .....	72

<b>4</b>	<b>Densities and Local Probabilities</b> .....	75
4.1	Long Tailed Densities and Their Convolutions .....	75
4.2	Subexponential Densities on the Positive Half-Line .....	79
4.3	Subexponential Densities on the Real Line .....	83
4.4	Sufficient Conditions for Subexponentiality of Densities .....	85
4.5	$\Delta$ -Long-Tailed Distributions and Their Convolutions .....	86
4.6	$\Delta$ -Subexponential Distributions .....	89
4.7	$\Delta$ -Subexponential Distributions on the Real Line .....	95
4.8	Sufficient Conditions for $\Delta$ -Subexponentiality .....	95
4.9	Local Asymptotics for a Randomly Stopped Sum .....	97
4.10	Local Subexponentiality of Integrated Tails .....	100
4.11	Comments .....	100
4.12	Problems .....	101
<b>5</b>	<b>Maximum of Random Walk</b> .....	103
5.1	Asymptotics for the Maximum of a Random Walk with a Negative Drift .....	104
5.2	Finite Time Horizon Asymptotics .....	108
5.3	Ladder Structure of Maximum of Random Walk .....	113
5.4	Taboo Renewal Measures .....	114
5.5	Asymptotics for the First Ascending Ladder Height .....	117
5.6	Tail of the Maximum Revisited .....	120
5.7	Local Probabilities of the Maximum .....	121
5.8	Density of the Maximum .....	122
5.9	Explicitly Calculable Ascending Ladder Heights .....	123
5.10	Single Server Queueing System .....	128
5.11	Ruin Probabilities in Cramér–Lundberg Model .....	130
5.12	Subcritical Branching Processes .....	133
5.13	How Do Large Values of $M$ Occur in Standard Cases? .....	136
5.14	Comments .....	140
5.15	Problems .....	141
	<b>Answers to Problems</b> .....	145
	<b>References</b> .....	151
	<b>Index</b> .....	155

An Introduction to Heavy-Tailed and Subexponential  
Distributions

Foss, S.; Korshunov, D.; Zachary, S.

2013, XI, 157 p., Hardcover

ISBN: 978-1-4614-7100-4
