

Contents

| | |
|--|-----|
| Toy Models for D. H. Lehmer’s Conjecture II | 1 |
| Eiichi Bannai and Tsuyoshi Mieozaki | |
| On Representation of an Integer by $X^2 + Y^2 + Z^2$ and the Modular Equations of Degree 3 and 5 | 29 |
| Alexander Berkovich | |
| Almost Universal Ternary Sums of Squares and Triangular Numbers | 51 |
| Wai Kiu Chan and Anna Haensch | |
| Weighted Generating Functions for Type II Lattices and Codes | 63 |
| Noam D. Elkies and Scott Duke Kominers | |
| Quadratic Forms and Automorphic Forms | 109 |
| Jonathan Hanke | |
| Integral Positive Ternary Quadratic Forms | 169 |
| William C. Jagy | |
| Some Aspects of the Algebraic Theory of Quadratic Forms | 181 |
| R. Parimala | |
| On the Length of Binary Forms | 207 |
| Bruce Reznick | |
| Representation of Quadratic Forms by Integral Quadratic Forms | 233 |
| Rainer Schulze-Pillot | |
| Identifying the Matrix Ring: Algorithms for Quaternion Algebras and Quadratic Forms | 255 |
| John Voight | |

Quadratic and Higher Degree Forms

Alladi, K.; Bhargava, M.; Savitt, D.; Tiep, P.H. (Eds.)

2013, IX, 298 p., Hardcover

ISBN: 978-1-4614-7487-6
