

Contents

1	Examples	1	2
1.1	Review of Elementary Number Theory	1	3
1.2	The Field $\mathbb{Q}[i]$ and the Gauss Integers	8	4
1.3	Quadratic Integers	15	5
1.4	The Field $\mathbb{Q}[\sqrt{-3}]$ and the Eisenstein Integers	17	6
1.5	The Field $\mathbb{Q}[\sqrt{-5}]$	20	7
1.6	The Field $\mathbb{Q}[\sqrt{319}]$	23	8
2	A Crash Course in Ring Theory	27	9
2.1	Basic Definitions	27	10
2.2	Ideals, Homomorphisms, and Quotients	29	11
2.3	Principal Ideals	33	12
2.4	Operations on Ideals	36	13
2.5	Prime and Maximal Ideals	41	14
3	Lattices	45	15
3.1	Group Structure of Lattices	45	16
3.2	Linear Algebra Over \mathbb{Z}	48	17
3.3	Computing with Ideals	52	18
3.4	Lattice Quotients	55	19
4	Arithmetic in $\mathbb{Q}[\sqrt{D}]$	61	20
4.1	Quadratic Fields	61	21
4.2	The Ring of Integers	63	22
4.3	Unique Factorization of Ideals: The Road Map	67	23
4.4	Noether Rings	68	24
4.5	Standard Form of an Ideal	70	25
4.6	The Ideal Norm	73	26
4.7	Fractional Ideals	77	27
4.8	Unique Factorization of Ideals	80	28
4.9	Prime Ideals in \mathcal{O}	81	29

5	The Ideal Class Group and the Geometry of Numbers	87	30
5.1	The Ideal Class Group	87	31
5.2	Minkowski's Theorem	91	32
5.3	Application to Ideals	95	33
5.4	Some Ideal Class Group Computations	99	34
6	Continued Fractions	107	35
6.1	Motivation	107	36
6.2	Finite and Infinite Continued Fractions	110	37
6.3	Continued Fraction of an Irrational Number	114	38
6.4	Periodic Continued Fractions	116	39
6.5	Computing Quadratic Continued Fractions	121	40
6.6	Approximation by Convergents	124	41
6.7	The Group of Units of a Real Quadratic Field	127	42
7	Quadratic Forms	131	43
7.1	Motivation	131	44
7.2	Elementary Theory of Quadratic Forms	136	45
7.3	Parameter of a Quadratic Form	139	46
7.4	Linear Symmetries	141	47
7.5	Group Actions	144	48
7.6	Orientation	148	49
7.7	The Narrow Ideal Class Group	151	50
7.8	The Three Avatars	154	51
7.9	Reduced Positive Definite Forms	159	52
7.10	Reduced Indefinite Forms	165	53
7.11	Form Composition and Bhargava Cubes	172	54
	Appendix	185	55
	Hints to Selected Exercises	189	56
	References	193	57
	Index	195	58
