Part I An Overview of Stellar Evolution

| | |
|---|----|
| 1. The Biology of Supernovae | 3 |
| Introduction | 3 |
| Spectra: Chemical Portraits of Stars..... | 3 |
| Photometry: Behavioral Studies of Stellar Death | 8 |
| The HR Diagram | 10 |
| The Power Sources of Nuclear Reactions in Stars..... | 15 |
| The Chemical Composition of Stars | 18 |
| Stellar Structure..... | 20 |
| Rotation and Angular Momentum | 25 |
| The Effects of Magnetism | 28 |
| The Biology of Supernovae..... | 31 |
| Supernova Taxonomy..... | 33 |
| Basic Identifying Features | 35 |
| Conclusions | 40 |
| 2. The Anatomy of Stellar Life and Death | 41 |
| Initial Conditions | 41 |
| The Life of a Star | 45 |
| The Main Sequence | 46 |
| β -Cephei Variables..... | 52 |
| The Neutron Star..... | 67 |
| The Fate of the Surrounding Star..... | 70 |
| Formation of Supernova Remnants..... | 73 |
| Messages From a Retreating Front | 76 |
| Conclusions | 79 |

Part II A Walk Across the Rooftops

| | |
|--|----|
| 3. Stellar Evolution at the Summit of the Main Sequence | 83 |
| Introduction | 83 |

| | |
|---|------------|
| Looking Deeper into the Controversy | 84 |
| A Problem with Wolves | 87 |
| The Humphrey-Davidson Limit | 89 |
| Luminous and Violent Blue Variables | 91 |
| Evolutionary Paths of the Most Massive Stars | 95 |
| Type II _n Supernovae | 97 |
| Explaining Type II _n Properties..... | 99 |
| Catching the Wave | 100 |
| From Imposter to Supernova..... | 103 |
| Direct Detonation of LBVs..... | 105 |
| Slow Blow: The Case of Supernova SN 2008iy..... | 106 |
| The Impact of Collisions (No Pun Intended!)..... | 109 |
| Conclusions | 116 |
| | |
| 4. Collapsars, Hypernovae and Long Gamma Ray Bursts | 119 |
| Introduction | 119 |
| From Star Wars to Star Death | 119 |
| Beppo-SAX to the Rescue..... | 120 |
| Of Fireballs and Jets..... | 123 |
| A Best Fit: The Collapsar Model..... | 126 |
| Hypernovae and Hyperbolae | 130 |
| Reconstructing the Supernova-GRB Connection | 136 |
| Supernova: Or Supranova? | 139 |
| XRFs and Type Ibc Supernovae..... | 142 |
| SN 2010jp: The First Jet-Powered Type II Supernova..... | 149 |
| Conclusions | 152 |
| | |
| 5. Death by Fallback..... | 153 |
| Introduction | 153 |
| The Mystery of Cygnus X-1 | 154 |
| Controversial Supernovae..... | 160 |
| Populations | 162 |
| Conclusions | 163 |
| | |
| 6. The Formation of Massive Stars by Collision and Their Fate..... | 165 |
| Introduction | 165 |
| A Lack of Interpersonal Skills: Harassment and Scandal | 166 |
| Conclusions | 173 |

| | |
|---|------------|
| 7. Electron-Capture Supernovae | 175 |
| Introduction | 175 |
| Supernova or Imposter? | 175 |
| The Troubling Fates of Intermediate Mass Stars | 176 |
| Limiting Factors | 178 |
| Post Main Sequence Evolution | 180 |
| The Cassino da Urca | 183 |
| Many Roads Lead to Rome | 190 |
| Did the Progenitor of SN 2008S Spend Too Much Time at the Roulette Table? | 191 |
| SN 2009md: A Faint Type IIP Supernova with a Troubling Origin | 193 |
| A Coda from the Distant Past: Type I.5 Supernovae | 196 |
| Conclusion | 198 |
| | |
| 8. Ultra-luminous Type II_n Supernovae..... | 199 |
| Introduction | 199 |
| Taking the Pulse | 199 |
| A Lethal Pulse: SN 2006gy and 2006tf as Pulsational Pair-Instability Supernovae..... | 205 |
| SN 2008es: An Ultra-Luminous Type II-L Supernova..... | 211 |
| A Deadly Couple Embrace: Was SN 2007bi the First Pair Instability Supernova? | 217 |
| Was Pair Instability a Common Cause of Death in the Early Universe? | 225 |
| Conclusion..... | 227 |
| | |
| 9. The Magnetar Model for Ultra-Luminous Supernovae .. | 229 |
| Introduction | 229 |
| The Magnetar Model | 230 |
| SN 2006aj and the X-ray Flashes | 235 |
| Conclusions | 236 |
| | |
| 10. The Mysterious SN 2005ap and Luminous Blue Flashes | 239 |
| Introduction | 239 |
| SN 2005ap | 239 |
| Arrival of the White Knights | 242 |
| The PPI Model | 244 |
| The Magnetar Model | 246 |
| The Buried GRB Model | 247 |

| | |
|--|-----|
| Are These Blue Explosions Pair-Instability Events? | 248 |
| Pan-STARRS Events | 248 |
| Can We Tie Up All the Loose Ends? | 249 |
| Conclusions | 250 |

Part III Thermonuclear Supernovae

| | |
|--|------------|
| 11. Hypotheses and an Oxymoron | 255 |
| Introduction | 255 |
| What Astronomers Know | 255 |
| What Astronomers Think They Know | 257 |
| What Astronomers Don't Know | 258 |
| Mechanisms and Scenarios | 258 |
| The Single-Degenerate Scenario | 259 |
| More Problems | 262 |
| A Precious Few | 263 |
| Double-Degenerate Models | 265 |
| The Explosion | 267 |
| SN 2011fe: A Defining Type Ia Supernova | 271 |
| Conclusions | 274 |
| | |
| 12. Are there Super-Chandrasekhar Supernovae? | 275 |
| Introduction | 275 |
| Type Ia Supernovae: A Reprise | 275 |
| SN 1991T | 276 |
| SN 2003fg: Too Bright for Its Own Good? | 278 |
| Loneliness in a Crowd | 280 |
| Conclusions | 283 |
| | |
| 13. The Good, the Bad and the Ugly | |
| Thermonuclear Supernovae | 285 |
| Introduction | 285 |
| R Corona Borealis: Born Again Stars | 286 |
| Mergers of More Massive White Dwarf Stars | 289 |
| AM CVn Systems | 293 |
| Type .Ia Supernovae: Descendants | |
| of AM CVn Binaries? | 295 |
| Record Breaking Type .Ia Supernova | |
| or Something Else? | 299 |
| Do Some Type Ia Supernovae Explode | |
| Without Detonation? | 302 |
| SN 2008ha: A Cousin of SN 2005hk? | 305 |

PTF 09dav: Something Else? 310
 SN 2005E: *Lex Parsimoniae*..... 313
 Conclusions 318

Part IV In Flagrate Delicto

**14. The Mysterious Case of V838 Monocerotis
 and the Red Novae**..... 323
 Introduction 323
 V838 Moncerotis 324
 V4332 Sagittarii 330
 A Stellar Merger Caught in the Act..... 331
 M85's Red Nova..... 335
 The Case of the Optical Transient NGC 300 OT..... 336
 Once Red, Now Blue 338
 What Do These Collisions Tell Us About
 Stellar Eruptions? 338
 The Great Eruption of Eta Carinae: A Reprise..... 339
 Conclusions 342

15. Between Scylla and Charybdis..... 343
 Introduction 343
 Type IIa? 343
 What Might the New Scheme Be Based Upon? 347
 Conclusions 350

Glossary 351

Index 365
