Contents

1 Current and Future Assisted Reproductive Technologies for Mammalian Farm Animals .................................................... 1  
Peter J. Hansen

2 Current and Future Reproductive Technologies for Avian Species .......................................................... 23  
Ramesh Ramachandran

3 Current and Future Assisted Reproductive Technologies for Fish Species .......................................................... 33  
Gregory M. Weber and Cheng-Sheng Lee

4 Incorporation of Genetic Technologies Associated with Applied Reproductive Technologies to Enhance World Food Production .................................................... 77  
Robert A. Cushman, Tara G. McDaneld, Larry A. Kuehn, Warren M. Snelling, and Dan Nonneman

5 Impacts of Reproductive Technologies on Beef Production in the United States .................................................... 97  
Carl Dahlen, Jamie Larson, and G. Cliff Lamb

6 Impact of Reproductive Technologies on Dairy Food Production in the Dairy Industry .................................................... 115  
Jeffrey S. Stevenson

7 Impact of Swine Reproductive Technologies on Pig and Global Food Production .................................................... 131  
Robert V. Knox

8 Impacts of Reproductive Technologies on Beef Production in South America .................................................... 161  
José Luiz Moraes Vasconcelos, Ocilon Gomes de Sá Filho, and Reinaldo F. Cooke

9 An Australasian Perspective on the Role of Reproductive Technologies in World Food Production .................................................... 181  
Graeme B. Martin
10 A Perspective on the Impact of Reproductive Technologies on Food Production in Africa .................................................... 199
Esté van Marle-Köster and Edward C. Webb

11 International Perspectives on the Impacts of Reproductive Technologies on Food Production in Asia........ 213
Takeshi Osawa

12 International Perspectives on Impacts of Reproductive Technologies for World Food Production in Asia Associated with Poultry Production .......................................................... 229
Vishwajit S. Chowdhury, Halima Sultana, and Mitsuhiro Furuse

13 Beef Cattle in the Year 2050 ..................................................... 239
George E. Seidel Jr.

Index .................................................................................................. 245
Current and Future Reproductive Technologies and World Food Production
Lamb, G.C.; DiLorenzo, N. (Eds.)
2014, X, 249 p. 37 illus., 18 illus. in color., Hardcover
ISBN: 978-1-4614-8886-6
