Part I Introduction to Food Components

1 Evaluation of Food Quality	3
Introduction	3
Aspects of Food Quality	3
Appearance	3
Texture	4
Flavor	4
Taste Sensitivity	5
Sensory Evaluation	6
Sensory Testing Procedure	7
Sensory Tests	7
Objective Evaluation	11
Food Rheology	11
Objective Measurement of Texture	13
Comparison of Subjective and Objective Evaluation	13
Conclusion	14
Notes	14
References	15
2 Water	17
Introduction	17
Chemistry of Water	17
Specific Heat and Latent Heat of Water	19
Vapor Pressure and Boiling Point	19
Vapor Pressure	19
Boiling Point	20
Water as a Dispersing Medium	20
Solution	20
Colloidal Dispersion	21
Suspension	21
Free, Bound, and Entrapped Water	21
Water Activity (A_w)	22
Role of Water in Food Preservation and Shelf Life of Food	22
Water Hardness and Treatments	23
Beverage Consumption Ranking	23
Conclusion	23

Notes	23
References	24

Part II Carbohydrates in Food

3 Carbohydrates in Food: An Introduction	27
Introduction	27
Monosaccharides	27
Examples of Monosaccharides	27
Disaccharides	30
Glycosidic Bonds	30
Examples of Disaccharides	31
Various Properties of Sugars	32
Sweetness	32
Formation of Solutions and Syrups	32
Body and Mouthfeel	32
Fermentation	32
Preservatives	33
Reducing Sugars	33
Caramelization	33
Sugar Alcohols	33
Oligosaccharides	33
Polysaccharides	33
Dextrins and Dextrans	34
Starch	34
Pectins and Other Polysaccharides	34
Conclusion	35
Notes	36
Bibliography	37
4 Starches in Food	39
Introduction	39
Starch Sources in the Diet	39
Starch Structure and Composition	40
Gelatinization Process in Cooking	40
Factors Requiring Control in Gelatinization	42
Gelation or Setting of Gelatinized Starch Pastes	
During Cooling	44
Amylose	44
Amylopectin	44
Gels	44
Retrogradation	44
Syneresis	45
Separating Agents and Lump Formation	46
Modified Starches	46
Waxy Starches	47
Starch Uses in Food Systems	48
Cooking with Starch	48

Appearance	48
Use of a Double Boiler	48
Tempering	49
White Sauce	49
Liquid	49
Nutritive Value of Starch	49
Safety of Starches	49
Conclusion	50
Notes	50
References	51
5 Pectins and Gums	53
Introduction	53
Pectic Substances	53
Pectins	54
Pectin Gel Formation	54
Pectin Sources	56
Some Principles of Making Jelly	57
Gums	57
Seed Gums	58
Plant Exudates	58
Microbial Exudates	58
Seaweed Polysaccharides	59
Synthetic Gums	60
Conclusion	60
Notes	60
References	61
6 Grains	63
Introduction	63
Cereals Definition	63
Structure of Cereal Grains	64
Composition of Cereal Grains	65
Common Cereal Grains and Their Uses	67
Wheat	67
Rice	71
Corn	73
Other Grains	73
Barley	74
Millet	74
Oats	74
Quinoa	75
Rye	75
Triticale	75
Non-cereal “Flours”	75
Cooking Cereals	75
Breakfast Cereals	76
Pasta	76
Nutritive Value of Grains	77

What Foods Are in the Grains Group?	77
Safety of Grains	80
Conclusion	80
Notes	80
References	82
7 Vegetables and Fruits	83
Introduction	83
Structure and Composition of Cell Tissue	83
Chemical Composition of Plant Material	84
Carbohydrate	84
Protein	85
Fat	85
Vitamins	85
Minerals	86
Water	86
Phytochemicals (More in Appendices)	86
Turgor Pressure	86
Pigments and Effects of Additional Substances	87
Chlorophyll	87
Carotenoids	88
Anthocyanin	90
Anthoxanthin	91
Betalaines	92
Tannins	92
Flavor Compounds	92
Allium	92
Brassica	93
Organic Acids	93
Concentrates, Extracts, Oils, Spices, and Herbs	93
Vegetable Classifications	94
Harvesting and Postharvest Changes	94
Ripening	95
Enzymatic Oxidative Browning	96
Cooking Effect	96
Water Retention/Turgor	96
Color	97
Texture	97
Flavor	97
Nutritive Value	97
Fruits—Unique Preparation and Cooking Principles	98
Fruit Preparation	98
Fruit Juices and Juice Drinks	99
Grading Vegetables and Fruits	99
Organically Grown Vegetables and Fruits	99
Biotechnology (More in Appendices)	100
Irradiation	102
Vegetarian Food Choices	102

Labeling of Vegetables and Fruits	103
Nutrition Facts	103
Label Terms	103
Nutritive Value of Vegetables and Fruits	104
(USDA)	104
Nutrient Losses	108
Safety of Vegetables and Fruits	111
Conclusion	111
Notes	112
References	113

Part III Proteins in Food

8 Proteins in Food: An Introduction	117
Introduction	117
Amino Acids	117
General Structure of Amino Acids	117
Categories of Amino Acids	118
Protein Structure and Conformation	118
Primary Structure	120
Secondary Structure	120
Tertiary Structure	121
Quaternary Structure	121
Interactions Involved in Protein Structure and Conformation	122
Reactions and Properties of Proteins	122
Amphoteric	122
Isoelectric Point	122
Water-Binding Capacity	122
Salting-in and Salting-out	123
Denaturation	123
Hydrolysis of Peptides and Proteins	124
Maillard Browning	124
Enzymes	124
Functional Roles of Proteins in Foods	125
Conjugated Proteins	126
Protein Quality	127
Nutrition: See More in Specific Food Commodity Chapters	128
Conclusion	128
Notes	128
References	131
9 Meat, Poultry, Fish, and Dry Beans	133
Introduction	133
Characteristics of Meat	134
Physical Composition of Meat	134
Chemical Composition of Meat	136
Water	136

Protein	136
Fat	138
Carbohydrates	138
Vitamins and Minerals	138
Muscle Contraction in Live Animals	138
Structure of the Myofilaments of Muscle	138
Muscle Contraction	139
Energy for Contraction	139
Postmortem Changes in the Muscle	139
Ultimate pH	140
Aging or Conditioning of Meat	141
Meat Pigments and Color Changes	141
Meat-Handling Process	142
USDA Inspections	142
Kosher Inspection	143
Halal Certification	144
Grading of Meat	144
Hormones and Antibiotics	145
Animal Welfare Approval	145
Cuts of Meat	145
Primal or Wholesale Cuts	145
Subprimal Cuts	146
Retail Cuts	146
Cooking Meat	146
Effects of Cooking on Muscle Proteins	148
Effects of Cooking on Collagen	148
Effect of Cooking on Fat	148
Methods of Cooking	148
Other Factors Significant in Cooking	149
Alterations to Meat	149
Processed Meat	149
Curing and Smoking of Meat	150
FDA Ruling on Curing and Smoking	151
Restructured Meat	151
Tenderizing, Artificial Tenderizing	152
Poultry	153
Fish	153
Dry Beans and Peas (Legumes) as Meat Alternatives	156
Legumes	157
Quorn as a Meat Alternative	159
Nutritive Value of Meat, Poultry, and Fish	159
Safety of Meat, Poultry, and Fish	167
Conclusion	169
Notes	170
References	171

Part IV Fats in Food

12 Fat and Oil Products	233
Introduction	233
Structure and Composition of Fats	233
Glycerides	233
Minor Components of Fats and Oils	234
Structure of Fatty Acids	235
Isomerism	236
Nomenclature of Fatty Acids	237
Geneva or Systematic Nomenclature	237
The Omega Naming System	238
Properties of Fats and Oils	239
Polymorphism	239
Melting Points	240

Plastic Fats	241
Composition of Dietary Fats and Oils	241
Production and Processing Methods	243
Deodorized Oils	243
Rendered Fat	243
Modification of Fats	243
Hydrogenation	243
Interesterification	244
Acetylation	245
Winterization	245
Deterioration of Fats	245
Hydrolytic Rancidity	245
Oxidative Rancidity or Autoxidation	246
Prevention of Autoxidation	246
Shortening and Shortening Power of Various Fats and Oils	247
Tenderization Versus Flakiness Provided by Fats and Oils	248
Emulsification (See Chap. 13)	249
Frying	250
Smoke Point	250
Changes During Frying	251
Low-Fat and No-Fat Foods	251
Fat Replacements	251
Carbohydrate-Derived Fat Replacements	252
Examples of Carbohydrate-Based Fat Replacers	253
Fat-Derived Fat Replacements	254
Examples of Fat-Based Fat Replacers	255
Protein-Derived Fat Replacements	256
Examples of Protein-Based Fat Replacers	257
Nutritive Value of Fats and Oils	257
Safety of Fats and Oils	258
Conclusion	258
Notes	259
References	261
13 Food Emulsions and Foams	263
Introduction	263
Emulsions	263
Definition	263
Surface Tension	264
Surface-Active Molecules	264
Emulsion Formation	265
Emulsifiers	266
Natural Emulsifiers	267
Synthetic Emulsifiers or Surfactants	268
Examples of Emulsions	269
Factors Affecting Emulsion Stability	270
Foams	270

Comparison Between Foams and Emulsions	271
Foam Formation	271
Foam Stability	271
Foaming Agents	272
The Effect of Added Ingredients on Foam Stability	272
Anti-foaming Agents and Foam Suppressants	273
Other Colloidal Systems	274
Conclusion	274
Notes	274
Bibliography	276

Part V Sugars, Sweeteners

14 Sugars, Sweeteners, and Confections	279
Introduction	279
Sources of Sugar	279
Roles of Sugar in Food Systems	279
Sweetness	279
Tenderness	280
Browning	280
Types of Sugars and Sugar Syrups	280
Syrups (Liquids)	281
Properties of Sucrose	282
Solubility	282
Types of Solutions	282
Elevation of Boiling Point	283
Formation of Invert Sugar	283
Hygroscopicity	284
Fermentable	284
Sugar Substitutes	284
Artificial or High-Intensity Sweeteners	284
Sugar Alcohols (Polyols)	286
Novel Sweeteners	288
Confections	289
Major Candy Types: Crystalline and Amorphous Candies	290
Factors Influencing Degree of Crystallization and Candy Type	290
Ripening	292
Nutritive Value of Sugars and Sweeteners	292
Safety	293
Conclusion	293
Notes	294
References	295

Part VI Baked Products

15 Baked Products: Batters and Dough	299
Introduction	299
Classes of Batters and Dough	299
Gluten	300
Function of Various Ingredients in Batters and Dough	302
Flour Function	302
Liquids Function	303
Leavening Agents Function	303
Eggs Function	304
Fat Function	304
Salt Function	305
Sugar Function	305
The Leavening Process of Baked Products	306
Air as a Leavening Agent	306
Steam as a Leaven	307
Carbon Dioxide as a Leaven	307
Chemical Production of CO ₂	307
Biological Production of CO ₂	309
Ingredients in Specific Baked Products	310
Yeast Bread Ingredients	310
Quick Bread Ingredients	310
Pastry Ingredients	311
Cake Ingredients	312
Mixing Methods for Various Batters and Doughs	313
Biscuits	313
Cakes	313
Muffins	313
Pastries	314
Pour Batters	314
Dough, Yeast Dough	314
Baking Batters and Doughs	315
Altitude-Adjusted Baking	315
Storage of Baked Products	316
Nutritive Value of Baked Products	316
Reduced-Fat and No-Fat Baked Products	316
Safety Issues in Batters and Doughs	316
Microbial Hazards	316
Nonmicrobial Hazards	317
Conclusion	317
Notes	317
References	319

Part VII Aspects of Food Processing

16 Food Preservation	323
Introduction	323
Food Preservation	323
Heat Preservation	324
Methods of Heat Transfer	324
Heat Treatment Methods: Mild or Severe	324
Mild Heat Treatment	325
Severe Heat Treatment	326
The Effect of Heat on Microorganisms	327
Selecting Heat Treatments	328
Refrigeration Preservation	330
Freezing Preservation	331
Freezing Methods	331
Problems Associated with Freezing	332
Dehydration Preservation	333
Concentration to Preserve Food	334
Methods of Concentration	334
Changes During Concentration	335
Added Preservatives	335
Radiation to Preserve Food	335
Microwave Heating	335
Irradiation	336
Ohmic Heating	338
Induction Heating	338
High-Pressure Processing	339
Other Preservation Techniques	339
Nutritive Value of Preserved Foods	340
Safety of Preserved Foods	340
Conclusion	341
Notes	341
References	342
17 Food Additives	343
Introduction	343
Definition of Food Additives	344
Function of Food Additives	345
Legislation and Testing for Additives	346
Delaney Clause	347
Nutrition Labeling Education Act (NLEA)	347
Major Additives Used in Processing	347
Anticaking Agents and Free-Flow Agents	350
Antimicrobials	350
Antioxidants	351
Bleaching and Maturing Agents	351
Bulking Agents	351
Coloring Agents	351

Curing Agents	353
Dough Conditioners/Dough Improvers	354
Edible Films	354
Emulsifiers	354
Enzymes	354
Fat Replacers	354
Firming Agents	355
Flavoring Agents	355
Fumigants	356
Humectants	356
Irradiation	356
Leavening Agents	356
Lubricants	356
Nutrient Supplements	356
pH Control Substances	357
Preservatives	358
Pre- and Probiotics	358
Propellants	358
Sequestrants	358
Solvents	358
Stabilizers and Thickeners	359
Surface-Active Agents	360
Sweeteners	360
Sweeteners, Alternative (Chap. 14)	360
Nutrient Supplements in Food	361
Endorsement of Nutrient Supplementation in Foods	362
Vitamins and Minerals Manufactured for Addition to Foods	362
Functional Foods (See More in Appendices)	362
Phytochemicals (See More in Appendices)	363
Nutraceuticals (more in Appendices)	363
Formulating a New Product with Vitamin or Mineral Addition	363
Safety	364
Conclusion	364
Notes	365
References	366
18 Food Packaging	367
Introduction	367
Types of Packaging Containers	368
Packaging Functions	368
Packaging Materials	369
Other Packaging Materials	373
Controlling Packaging Atmosphere	374
FDA: Benefits of ROP	375
Cook-Chill	376
Modified Atmosphere Packaging	376
Controlled Atmosphere Storage and Packaging	377

Sous Vide	377
Vacuum Packaging	378
FDA: Safety Concerns	379
Active Packaging Technologies	379
Aseptic Packaging	380
Flexible Packaging	380
Freezer Packaging Protection	381
Freezer Burn	381
Cavity Ice	381
Tamper-Evident Banding and Sleeve Labeling	381
Manufacturing Concerns in Packaging	382
Selection of Packaging Materials	382
Migration from Packaging Materials	382
Packaging Lines at Processing Plants and Foodservice Operations	383
Packaging with Radio-Frequency Identification Tags	383
Packaging as a Communication and Marketing Tool	383
Environmental Considerations and Packaging	384
Safety Considerations and Packaging	384
Packaged Food and Irradiation	385
Government Concerns in Packaging	387
Packaging of the Future	387
Conclusion	388
