Contents

Preface ................................................................. v
Contributors ........................................................... ix

1 Reporter Gene Technologies for Imaging Cell Fates in Hematopoiesis .......... 1
Sophie Kusy and Christopher H. Contag

2 Flow Cytometry for Hematopoietic Cells ........................................... 23
Daniela S. Krause, Michelle E. DeLelys, and Frederic I. Preffer

3 Isolation and Characterization of Mesenchymal Stem Cells ....................... 47
Sedat Odabas, A. Eser Elçin, and Y. Murat Elçin

4 Methods for Functional Analysis of Stem Cells ...................................... 65
Michelle Escobedo-Cousin, J. Alejandro Madrigal, and Aurore Saudemont

5 An Overview of HLA Typing for Hematopoietic Stem Cell Transplantation .... 73
Katy Latham, Ann-Margaret Little, and J. Alejandro Madrigal

6 HLA Typing with Sequence-Specific Oligonucleotide Primed PCR (PCR-SSO) and Use of the Luminex™ Technology .................. 87
Klara Dalva and Meral Beksaç

7 Sequence-Based Typing of HLA: An Improved Group-Specific Full-Length Gene Sequencing Approach .................................. 101
Christina E.M. Voorter, Fausto Palusci, and Marcel G.J. Tilanus

8 Molecular Typing Methods for Minor Histocompatibility Antigens ............. 115
Eric Spierings

9 Natural Killer Cells and Killer-Cell Immunoglobulin-Like Receptor Polymorphisms: Their Role in Hematopoietic Stem Cell Transplantation .......................................................... 139
Jennifer Schellekens, Katia Gagne, and Steven G.E. Marsh

10 Methods of Detection of Immune Reconstitution and T Regulatory Cells by Flow Cytometry .................................................... 159
Richard Charles Duggleby and J. Alejandro Madrigal

11 Molecular Methods Used for Detection of Minimal Residual Disease Following Hematopoietic Stem Cell Transplantation in Myeloid Disorders .................................................. 187
Ahmet H. Elmaagacli

12 Molecular Methods for Detection of Minimal Residual Disease Following Transplantation in Lymphoid and Plasma Cell Disorders .......... 209
Paolo Corradini and Cristiana Carniti
