## Contents

### Section I  The Problem of Post-Traumatic Arthritis

1. Arthritis That Develops After Joint Injury: Is It Post-Traumatic Arthritis or Post-Traumatic Osteoarthritis?  
   Steven A. Olson and Farshid Guilak  
   Page 3

2. Post-Traumatic Arthritis: Definitions and Burden of Disease  
   Joseph A. Buckwalter and David T. Felson  
   Page 7

3. Arthritis After Joint Injury: The Military Experience  
   Jessica C. Rivera, Joseph C. Wenke, James R. Ficke, and Anthony E. Johnson  
   Page 17

### Section II  Experimental Models of Joint Injury

4. In Vitro Cartilage Explant Injury Models  
   Christopher T. Chen and Peter A. Torzilli  
   Page 29

5. Animal Models of Meniscal Injury in Post-Traumatic Arthritis  
   Chia-Lung Wu and Dianne Little  
   Page 41

6. Anterior Cruciate Transection/Disruption Models of Post-Traumatic Arthritis  
   Kelly A. Kimmerling and Farshid Guilak  
   Page 63

7. Closed Joint ACL Disruption Murine Model of PTA  
   Blaine A. Christiansen, Jasper H.N. Yik, and Dominik R. Haudenschild  
   Page 75

8. Whole Joint Models of Articular Injury and Articular Fracture  
   Bridgette D. Furman and Steven A. Olson  
   Page 87

9. Instability: Dynamic Loading Models  
   Todd McKinley  
   Page 101
10 Survey of Animal Models in Post-Traumatic Arthritis: Choosing the Right Model to Answer the Right Question ................................................................. 113
Bridgette D. Furman, Kelly A. Kimmerling, Chia-Lung Wu, Dianne Little, Farshid Guilak, and Steven A. Olson

Section III Peri-articular Tissues Response to Joint Injury

11 The Response of Cartilage to Injury ........................................ 121
Yang Wang and Alan J. Grodzinsky

12 The Response of the Subchondral Bone to Injury ............. 135
Steven R. Goldring

13 Genetic Variability in the Response to Injury ......................... 149
Muhammad Farooq Rai and Linda J. Sandell

14 Aging and Post-Traumatic Arthritis ..................................... 165
Richard F. Loeser, Cristin M. Ferguson, and Martin K. Lotz

15 Potential Mechanisms of PTA: Cell Death ......................... 185
Shawn P. Grogan, Martin K. Lotz, and Darryl D. D’Lima

16 Potential Mechanisms of PTOA: Inflammation .................... 201
Mary B. Goldring

17 Potential Mechanisms of PTA: Oxidative Stress ................. 211
Mitchell C. Coleman, Joseph A. Buckwalter, and James A. Martin

18 Potential Mechanism of PTA: Alterations in Joint Loading ........................................... 221
Timothy M. Wright and Suzanne A. Maher

Section IV Clinical Assessment and Treatment of Patients with Joint Injury

19 Imaging Specific to Cartilage Injury .................................... 237
Nathaniel E. Calixto, Aditi Guha, and Sharmila Majumdar

20 Outcomes of ACL Injury: The MOON Consortium .......... 259
Kurt P. Spindler and David N. Wasserstein

21 Current Treatment and Outcomes of Intra-articular Fractures ................................................................. 269
Brandi R. Hartley, Craig S. Roberts, and Peter V. Giannoudis

22 Non-arthroplasty Treatments for PTA in the Lower Extremity ................................................................. 285
Brandi R. Hartley and Craig S. Roberts

23 Results of Arthroplasty in Post-Traumatic Arthritis ............ 295
Antonia F. Chen and Javad Parvizi
### Section V  Developing and Future Assessment and Therapies
