## Part I  Selective Catalytic Reduction Technology  

1  **Review of Selective Catalytic Reduction (SCR) and Related Technologies for Mobile Applications**  
3  
Timothy V. Johnson  
1.1 Introduction  
1.2 Regulatory Overview  
1.2.1 Heavy-Duty Truck Regulations  
1.2.2 Light-Duty Regulations  
1.3 Engine Developments  
1.3.1 Heavy-Duty Engines  
1.3.2 Light-Duty Diesel Engines  
1.4 SCR Technologies  
1.4.1 SCR System Introduction  
1.4.2 Urea Delivery System  
1.4.3 Alternative Sources for Ammonia and Systems  
1.4.4 DOC Overview  
1.4.5 SCR Catalysts  
1.4.6 Ammonia Slip Catalysts  
1.5 SCR System Design  
1.6 Onboard Generation of Ammonia Using Lean NOx Traps  
1.7 Outlook  
1.8 Conclusions  
1.8.1 Regulations and Engine Technologies  
1.8.2 Onboard Ammonia Delivery Systems and SCR Catalyst Systems  
1.8.3 Outlook  
References  

2  **SCR Technology for Off-highway (Large Diesel Engine) Applications**  
33  
Daniel Chatterjee and Klaus Rusch  
2.1 Introduction  
2.2 Off-highway Emission Legislation
Part II Catalysts

3 Vanadia-Based Catalysts for Mobile SCR ........................................ 65
   Jonas Jansson
   3.1 Introduction ......................................................... 65
   3.2 Legislation ......................................................... 66
   3.3 Main SCR Reactions .................................................. 67
   3.4 Urea Injection ........................................................ 68
   3.5 Properties of Vanadia SCR Catalyst ................................. 68
   3.6 Reaction Mechanism .................................................. 71
   3.7 Function/Principle Design ............................................ 73
   3.8 Dimensioning of SCR System ......................................... 76
   3.9 Effect of NO₂ ......................................................... 81
   3.10 Aging of Vanadia SCR Catalysts ..................................... 83
       3.10.1 Thermal Aging ................................................... 83
       3.10.2 Impact of Sulfur ............................................... 85
       3.10.3 Alkali Metals and Alkaline Earth Metals ..................... 87
       3.10.4 Oil Poisons ..................................................... 88
       3.10.5 Hydrocarbons ................................................... 90
       3.10.6 Arsenic and Lead .............................................. 91
       3.10.7 Biofuel .......................................................... 91
       3.10.8 In-use Aging Evaluation ........................................ 92
   3.11 Summary and Conclusions ............................................. 92
   References ................................................................... 93
4 Fe-Zeolite Functionality, Durability, and Deactivation.
Mechanisms in the Selective Catalytic Reduction (SCR)
of NO\textsubscript{x} with Ammonia ................................................. 97
Todd J. Toops, Josh A. Pihl and William P. Partridge
4.1 Introduction .......................................................... 97
4.2 Experimental Considerations in Evaluating
and Aging Catalysts .................................................... 99
4.3 Fe-Zeolite NO\textsubscript{x} Reduction Characteristics .......... 104
4.4 Durability, Aging Techniques, and Deactivation Mechanism
Affecting Performance .................................................. 111
4.5 Summary ............................................................. 118
References ............................................................... 119

5 Cu/Zeolite SCR Catalysts for Automotive Diesel NOX
Emission Control .......................................................... 123
Hai-Ying Chen
5.1 Introduction .......................................................... 123
5.2 Chemistry and Functionality of Cu/Zeolite SCR Catalysts ... 124
5.3 Deactivation Mechanisms of Cu/Zeolite SCR Catalysts .... 126
5.3.1 Hydrothermal Deactivation .................................... 126
5.3.2 Hydrocarbon Storage, Inhibition, and Poisoning ........... 132
5.3.3 Sulfur Poisoning ............................................... 133
5.3.4 Urea and Urea Deposit Related Catalyst
Deactivation ........................................................... 133
5.3.5 Chemical Poisoning ............................................. 134
5.4 Development of Small-Pore Zeolite Supported
Cu SCR Catalysts ...................................................... 135
5.5 Investigation on the Superior Hydrothermal Stability
of Small-Pore Zeolite Supported Cu SCR Catalyst ............. 140
5.6 Investigation on the Active Cu Sites in Small-Pore
Zeolite Supported Cu SCR Catalysts ............................. 142
5.7 Summary ............................................................. 143
References ............................................................... 144

6 Low-Temperature Selective Catalytic Reduction (SCR) of NO\textsubscript{x}
with NH\textsubscript{3} Over Zeolites and Metal Oxide-Based Catalysts
and Recent Developments of H\textsubscript{2}-SCR .......................... 149
Gongshin Qi, Lifeng Wang and Ralph T. Yang
6.1 Ammonia-SCR ......................................................... 149
6.1.1 Introduction ...................................................... 149
6.1.2 Catalysts and Mechanistic Aspects
of the Low-Temperature Ammonia-SCR ......................... 151
