Part I Selective Catalytic Reduction Technology

1 Review of Selective Catalytic Reduction (SCR) and Related Technologies for Mobile Applications

Timothy V. Johnson

1.1 Introduction

1.2 Regulatory Overview

1.2.1 Heavy-Duty Truck Regulations

1.2.2 Light-Duty Regulations

1.3 Engine Developments

1.3.1 Heavy-Duty Engines

1.3.2 Light-Duty Diesel Engines

1.4 SCR Technologies

1.4.1 SCR System Introduction

1.4.2 Urea Delivery System

1.4.3 Alternative Sources for Ammonia and Systems

1.4.4 DOC Overview

1.4.5 SCR Catalysts

1.4.6 Ammonia Slip Catalysts

1.5 SCR System Design

1.6 Onboard Generation of Ammonia Using Lean NOx Traps

1.7 Outlook

1.8 Conclusions

References

6 Low-Temperature Selective Catalytic Reduction (SCR) of NO\textsubscript{x} with NH\textsubscript{3} Over Zeolites and Metal Oxide-Based Catalysts and Recent Developments of H\textsubscript{2}-SCR

Gongshin Qi, Lifeng Wang and Ralph T. Yang

6.1 Ammonia-SCR ........................................................... 149
  6.1.1 Introduction ........................................................... 149
  6.1.2 Catalysts and Mechanistic Aspects of the Low-Temperature Ammonia-SCR ...................... 151
6.2 H₂-SCR ........................................... 163
  6.2.1 Introduction .................................. 163
  6.2.2 Catalysts and Mechanistic Aspects of H₂-SCR .... 165
6.3 Challenges and Prospective .......................... 171
References ............................................. 172

Part III Mechanistic Aspects

7 Active Sites for Selective Catalytic Reduction ........ 181
Wolfgang Grünert
  7.1 Introduction .................................. 181
  7.2 Strategies and Methods for the Identification of Active Sites ... 182
  7.3 Supported Vanadia Catalysts ....................... 193
  7.4 Zeolite-Based Catalysts .......................... 198
    7.4.1 Fe Zeolites ................................ 198
    7.4.2 Cu Zeolites ............................... 206
  7.5 Recent Catalyst Development ........................ 208
  7.6 Concluding Remarks ................................ 210
References ............................................. 211

8 Mechanistic Aspect of NO–NH₃–O₂ Reacting System .... 221
Masaoki Iwasaki
  8.1 Introduction .................................. 221
  8.2 Steady-State Reaction Analysis ...................... 221
    8.2.1 NH₃/NO/O₂, NH₃/O₂, and NO/O₂ Reactions ...... 221
    8.2.2 Apparent Activation Energy .................... 223
    8.2.3 Apparent Reaction Orders ...................... 224
    8.2.4 Relationship with NO Oxidation Activity ...... 227
    8.2.5 Effect of Coexisting Gases and Poisoning .... 230
  8.3 Transient Reaction Analysis ........................ 233
    8.3.1 Periodic NH₃ Supply ........................ 233
    8.3.2 NO Pulse Reaction ........................... 237
    8.3.3 In Situ FT-IR Analysis ....................... 238
  8.4 Reaction Mechanisms ................................ 240
    8.4.1 Vanadium-Based Catalysts .................... 240
    8.4.2 Fe- or Cu-Exchanged Zeolite Catalysts ....... 242
  8.5 Conclusions ................................... 244
References ............................................. 244

System Development ............................................. 691  
Michel Weibel, Volker Schmeißer and Frank Hofmann  
22.1  Introduction .................................................... 692  
22.2  Modeling of the Exhaust Gas Aftertreatment System .... 693  
   22.2.1 Total System Simulation ................................. 693  
   22.2.2 Model Structure .......................................... 694  
   22.2.3 Kinetics and Parameterization ......................... 695  
22.3  Simulation Methods in the Development Process ........ 696  
   22.3.1 Demands of the Development Process ................ 696  
   22.3.2 The Virtual Testbench Concept ....................... 697  
   22.3.3 Development of an AdBlue® Dosing  
          Control Strategy ......................................... 697  
22.4  Outlook: On-board Model-Based SCR Control .......... 704  
22.5  Summary ........................................................ 705  
References ............................................................ 706
