Contents

Preface........................................................................................................... v
Contributors................................................................................................ xi

PART I OVERVIEW OF CEREBRAL ANGIOGENESIS

1 Cerebral Angiogenesis During Development: Who Is Conducting the Orchestra? ........................................................................... 3
   Ina M. Wittko-Schneider, Fabian T. Schneider, and Karl H. Plate
2 Cerebral Angiogenesis: A Realistic Therapy for Ischemic Disease? ......................................................................................... 21
   David A. Greenberg
3 Vascular Normalization in Cerebral Angiogenesis: Friend or Foe? ............................................................................................. 25
   Jisook Lee, Andrew Baird, and Brian P. Eliceiri
4 Pericytes and Adaptive Angioplasticity: The Role of Tumor Necrosis Factor-Like Weak Inducer of Apoptosis (TWEAK) .......... 35
   Paula Dore-Duffy

PART II ANIMAL MODELS OF CEREBRAL ANGIOGENESIS

5 Analysis of Angiogenesis in the Developing Mouse Central Nervous System ........................................................................... 55
   Nicole Ziegler, Karl H. Plate, and Stefan Liebner
6 Hypoxia-Induced Angiogenesis and Capillary Density Determination ...................................................................................... 69
   Constantinos P. Tsipis, Xiaoyan Sun, Kui Xu, and Joseph C. LaManna
7 The Middle Cerebral Artery Occlusion Model of Transient Focal Cerebral Ischemia ................................................................... 81
   Fudong Liu and Louise D. McCullough
8 A Mouse Model of Chronic Cerebral Hypoperfusion Characterizing Features of Vascular Cognitive Impairment ..................... 95
   Masafumi Ibara, Akihiko Taguchi, Takakuni Maki, Kazuo Washida, and Hidekazu Tomimoto
9 A Mouse Model of Permanent Focal Ischemia: Distal Middle Cerebral Artery Occlusion ...................................................... 103
   Kristian P. Doyle and Marion S. Buckwalter
10 A Method of Inducing Global Cerebral Ischemia .................................................................................................................... 111
    Gina Hadley, Michalis Papadakis, and Alastair M. Buchan
11 Induction of Cerebral Arteriogenesis in Mice ......................................................................................................................... 121
    André Duelsner, Nora Gatzke, Anja Bondke Persson, and Ivo R. Buschmann
12 Vessel Painting Technique for Visualizing the Cerebral Vascular Architecture of the Mouse ........................................... 127
Shea Hughes, Oleksandr Dashkin, and Richard Anthony DeFazio

13 Examining Cerebral Angiogenesis in Response to Physical Exercise ............. 139
Kiersten L. Berggren, Jacob J.M. Kay, and Rodney A. Swain

PART III METHODS OF EXAMINING CEREBRAL ANGIOGENESIS

14 Histological Assessment of Angiogenesis in the Hypoxic Central Nervous System ..................................................... 157
Moises Freitas-Andrade, Jacqueline Slinn, Claudie Charlebois, and Maria J. Moreno

15 Examining Vascular Remodeling in the Hypoxic Central Nervous System .... 177
Amin Boroujerdi, Jennifer V. Welser-Alves, and Richard Milner

16 Analysis of Cerebral Angiogenesis in Human Glioblastomas .................. 187
Michel Mittelbronn, Peter Baumgarten, Patrick N. Harter, and Karl H. Plate

17 Quantitative Cerebral Blood Flow Measurements Using MRI ................... 205
Eric R. Muir, Lora Talley Watts, Yash Vardhan Tiwari, Andrew Bresnen, Qiang Shen, and Timothy Q. Duong

18 Fluorescent Angiogenesis Models Using Gelfoam® Implanted in Transgenic Mice Expressing Fluorescent Proteins ............... 213
Robert M. Hoffman

19 Laser Speckle Contrast Imaging to Measure Changes in Cerebral Blood Flow ...................................................... 223
Ian R. Winship

20 Laser Doppler Flowmetry to Measure Changes in Cerebral Blood Flow ...... 237
Brad A. Sutherland, Tamer Rabie, and Alastair M. Buchan

PART IV DETERMINING THE ROLE OF CANDIDATE GENES IN CEREBRAL ANGIOGENESIS

21 Defining the Role of HIF and Its Downstream Mediators in Hypoxic-Induced Cerebral Angiogenesis .............................. 251
Xiaoyan Sun, Constantinos P. Tsipis, Girriso F. Benderro, Kui Xu, and Joseph C. LaManna

22 Inducible Gene Deletion in Glial Cells to Study Angiogenesis in the Central Nervous System ...................................... 261
Hye Shin Lee and Joseph H. McCarty

23 Bone Marrow Chimera Experiments to Determine the Contribution of Hematopoietic Stem Cells to Cerebral Angiogenesis ...................... 275
Marcia Regina Machein and Karl H. Plate
