Preface .................................................................................................................. v
Contributors ........................................................................................................... xiii

PART I MANIPULATION AND MODIFICATION OF IMMUNE CELLS: DENDRITIC CELLS

1 Single-Step Antigen Loading and Maturation of Dendritic Cells Through mRNA Electroporation of a Tumor-Associated Antigen and a TriMix of Costimulatory Molecules .......................................................... 3
   Daphné Benteyn, An M.T. Van Nuffel, Sofie Wilgenhof, and Aude Bonehill

2 Generation of Multiple Peptide Cocktail-Pulsed Dendritic Cells as a Cancer Vaccine ................................................................. 17
   Hyun-Ju Lee, Nu-Ri Choi, Manh-Cuong Vo, My-Dung Hoang, Youn-Kyung Lee, and Je-Jung Lee

3 Pulsing Dendritic Cells with Whole Tumor Cell Lysates .................................................................................................................. 27
   Laura Alaniz, Manglio M. Rizzo, and Guillermo Mazzolini

4 Antigen Trapping by Dendritic Cells for Antitumor Therapy ....................................................................................................... 33
   Chiranjib Pal

5 Ex Vivo Loading of Autologous Dendritic Cells with Tumor Antigens ....................................................................................... 41
   Manglio M. Rizzo, Laura Alaniz, and Guillermo Mazzolini

6 Tumor Antigen-/Cytokine-Pulsed Dendritic Cells in Therapy Against Lymphoma ........................................................................ 45
   Sumit K. Hira, Deepak Verma, and Partha P. Manna

7 Dendritic Cells Primed with Protein–Protein Fusion Adjuvant .................................................................................................... 57
   Liying Wang and Yongli Yu

8 Antigen-Specific mRNA Transfection of Autologous Dendritic Cells ...................................................................................... 77
   Fabian Benencia

9 Electroporation of Dendritic Cells with Autologous Total RNA from Tumor Material .......................................................... 87
   Francesca Milano and K.K. Krishnadath

10 Dendritic Cells Transfected with Adenoviral Vectors as Vaccines ......................................................................................... 97
    Joseph Senesac, Dmitry Gabrilovich, Samuel Pirruccello, and James E. Talmadge

11 Genetic Modification of Dendritic Cells with RNAi ........................................................................................................... 119
    Xiao-Tong Song
Contents

12 Fast Monocyte-Derived Dendritic Cell-Based Immunotherapy
   Gamal Ramadan

13 Intratumoral Injection of BCG-CWS-Pretreated Dendritic Cells Following Tumor Cryoablation
   Naoshi Kawamura, Masaru Udagawa, Tomonobu Fujita, Toshibaru Sakurai, Tomonori Yaguchi, and Yutaka Kawakami

14 Exploiting the CD1d-iNKT Cell Axis for Potentiation of DC-Based Cancer Vaccines
   Roeland Lameris, Fanke L. Schneider, Tanja D. de Gruijl, and Hans J. van der Vliet

PART II MANIPULATION AND MODIFICATION OF IMMUNE CELLS:
T LYMPHOCYTES AND NK CELLS

15 Modification of T Lymphocytes to Express Tumor Antigens
   Aaron E. Foster and Xiao-Tong Song

16 Genetic Modification of Mouse Effector and Helper T Lymphocytes Expressing a Chimeric Antigen Receptor
   Liza B. John, Tess M. Chee, David E. Gilham, and Phillip K. Darcy

17 Genetic Modification of Cytotoxic T Lymphocytes to Express Cytokine Receptors
   Serena K. Perna, Barbara Savoldo, and Gianpietro Dotti

18 Monitoring the Frequency and Function of Regulatory T Cells and Summary of the Approaches Currently Used to Inhibit Regulatory T Cells in Cancer Patients
   Chiara Camisaschi, Marcella Tazzari, Licia Rivoltini, and Chiara Castelli

19 Cytokine Activation of Natural Killer Cells
   Syh-Jae Lin, Pei-Tzu Lee, and Ming-Ling Kuo

PART III MANIPULATION AND MODIFICATION OF TUMOR CELLS

20 Loading of Acute Myeloid Leukemia Cells with Poly(I:C) by Electroporation
   Eva Lion, Charlotte M. de Winde, Viggo E.I. Van Tendeloo, and Evelien L.J.M. Smits

21 Autologous Tumor Cells Engineered to Express Bacterial Antigens
   Vijayakumar K. Ramiya, Maya M. Jerald, Patricia D. Lawman, and Michael J.P. Lawman

22 Tumor Cell Transformation Using Antisense Oligonucleotide
   Mohamed R. Akl and Nehad M. Ayoub

23 The Direct Display of Costimulatory Proteins on Tumor Cells as a Means of Vaccination for Cancer Immunotherapy
   Haval Shirwan, Esma S. Yolcu, Rajesh K. Sharma, Hong Zaho, and Orlando Grimany-Nuno
PART IV MANIPULATION OF IMMUNE/TUMOR INTERACTIONS

24 Cloning Variable Region Genes of Clonal Lymphoma Immunoglobulin for Generating Patient-Specific Idiotype DNA Vaccine 
Soung-chul Cha, Hong Qin, Ippei Sakamaki, and Larry Kwak ........................................ 289

Christian Kleist, Marco Randazzo, Janina Jiga, and Peter Terness .................................. 305

26 Invariant Chain-Peptide Fusion Vaccine Using HER-2/neu 
Sonia A. Perez, George E. Peoples, Michael Papamichail, and Constantin N. Baxevanis .......... 321

27 TLR-9 Agonist Immunostimulatory Sequence Adjuvants Linked to Cancer Antigens 
Hidekazu Shirota and Dennis M. Klinman ........................................................................... 337

28 Production of Multiple CTL Epitopes from Multiple Tumor-Associated Antigens. 
Rena Morita, Yoshikiko Hirohashi, Munehide Nakatsugawa, Takayuki Kanaseki, Toshikiko Torigoe, and Noriyuki Sato .......... 345

29 Preparation of Polypeptides Comprising Multiple TAA Peptides 
Bing Ni, Zhengcai Jia, and Yuzhang Wu .............................................................................. 357

30 Idiotype Vaccine Production Using Hybridoma Technology 
Susana Inoges, Ascensión López Díaz de Cerio, Helena Villanueva, Fernando Pastor, and Maurizio Bendandi .......... 367

31 Preparation of Cancer-Related Peptide Cocktails that Target Heterogeneously Expressed Antigens 
Reshu Gupta and Pradip P. Sachdeva ................................................................................ 389

PART V DELIVERY MECHANISMS

32 Making an Avipoxvirus Encoding a Tumor-Associated Antigen and a Costimulatory Molecule. 
Paul M. Howley, Kerrilyn R. Diener, and John D. Hayball .................................................. 407

33 Bacterial Vectors for the Delivery of Tumor Antigens 
Yan Wang, Bertrand Tousaint, and Audrey Le Gouëllec ......................................................... 429

34 Preparation of Peptide Microspheres Using Tumor Antigen-Derived Peptides 
Santwana Bhatnagar, Raza Ali Naqvi, Riyasat Ali, and D.N. Rao ........................................ 443

35 Production of Antigen-Loaded Biodegradable Nanoparticles and Uptake by Dendritic Cells 
Vijaya Bharti Joshi, Sean M. Geary, and Aliaser K. Salem ..................................................... 453

36 Development of Plasmid–Lipid Complexes for Direct Intratumoral Injection. 
Rama P. Kotipatruni and Ganji Purnachandra Nagaraju ....................................................... 467

Contents
PART VI  THE ADVANCES, CHALLENGES, AND FUTURE OF CANCER VACCINES

37  The Use of Dendritic Cells for Peptide-Based Vaccination in Cancer Immunotherapy .......................... 479
    Mohamed L. Salem

38  Advances in Host and Vector Development for the Production of Plasmid DNA Vaccines ..................... 505
    Juergen Mairhofer and Alvaro R. Lara

39  Challenges Facing the Development of Cancer Vaccines ...................................................... 543
    Mayer Fishman

40  Future of Cancer Vaccines ........................................................................................................... 555
    Hauke Winter, Bernard A. Fox, and Dominik Rüttinger

Index ........................................................................................................................................ 565
Cancer Vaccines
Methods and Protocols
Lawman, M.J.P.; Lawman, P.D. (Eds.)
2014, XVIII, 569 p. 80 illus., 42 illus. in color., Hardcover
A product of Humana Press
