Preface ................................................................. v
Contributors ....................................................... xiii

PART I  MANIPULATION AND MODIFICATION OF IMMUNE CELLS: DENDRITIC CELLS

1 Single-Step Antigen Loading and Maturation of Dendritic Cells Through mRNA Electroporation of a Tumor-Associated Antigen and a TriMix of Costimulatory Molecules ............................................................ 3
   Daphné Benteyn, An M.T. Van Nuffel, Sofie Wilgenhof, and Aude Bonehill

2 Generation of Multiple Peptide Cocktail-Pulsed Dendritic Cells as a Cancer Vaccine ................................................................. 17
   Hyun-Ju Lee, Nu-Ri Choi, Manh-Cuong Vo, My-Dung Hoang, Youn-Kyung Lee, and Je-Jung Lee

3 Pulsing Dendritic Cells with Whole Tumor Cell Lysates ................................................................. 27
   Laura Alaniz, Manglio M. Rizzo, and Guillermo Mazzolini

4 Antigen Trapping by Dendritic Cells for Antitumor Therapy ................................................................. 33
   Chiranjib Pal

5 Ex Vivo Loading of Autologous Dendritic Cells with Tumor Antigens ................................................................. 41
   Manglio M. Rizzo, Laura Alaniz, and Guillermo Mazzolini

6 Tumor Antigen-/Cytokine-Pulsed Dendritic Cells in Therapy Against Lymphoma ................................................................. 45
   Sumit K. Hira, Deepak Verma, and Partha P. Manna

7 Dendritic Cells Primed with Protein–Protein Fusion Adjuvant ................................................................. 57
   Liying Wang and Yongli Yu

8 Antigen-Specific mRNA Transfection of Autologous Dendritic Cells ................................................................. 77
   Fabian Benencia

9 Electroporation of Dendritic Cells with Autologous Total RNA from Tumor Material ................................................................. 87
   Francesca Milano and K.K. Krishnadath

10 Dendritic Cells Transfected with Adenoviral Vectors as Vaccines ................................................................. 97
   Joseph Senesac, Dmitry Gabrilovich, Samuel Pirrucchello, and James E. Talmadge

11 Genetic Modification of Dendritic Cells with RNAi ................................................................. 119
   Xiao-Tong Song
PART II  MANIPULATION AND MODIFICATION OF IMMUNE CELLS:
   T LYMPHOCYTES AND NK CELLS

15 Modification of T Lymphocytes to Express Tumor Antigens  
   Aaron E. Foster and Xiao-Tong Song  

16 Genetic Modification of Mouse Effector and Helper T Lymphocytes  
   Expressing a Chimeric Antigen Receptor  
   Liza B. John, Tess M. Chee, David E. Gilham, and Phillip K. Darcy  

17 Genetic Modification of Cytotoxic T Lymphocytes  
   to Express Cytokine Receptors  
   Serena K. Perna, Barbara Savoldo, and Gianpietro Dotti  

18 Monitoring the Frequency and Function of Regulatory T Cells  
   and Summary of the Approaches Currently Used to Inhibit Regulatory  
   T Cells in Cancer Patients  
   Chiara Camisaschi, Marcella Tazzari, Licia Rivoltini,  
   and Chiara Castelli  

19 Cytokine Activation of Natural Killer Cells  
   Syh-Jae Lin, Pei-Tzu Lee, and Ming-Ling Kuo  

PART III  MANIPULATION AND MODIFICATION OF TUMOR CELLS

20 Loading of Acute Myeloid Leukemia Cells  
   with Poly(I:C) by Electroporation  
   Eva Lion, Charlotte M. de Winde, Viggo F.I. Van Tendeloo,  
   and Evelien L.J.M. Smits  

21 Autologous Tumor Cells Engineered to Express Bacterial Antigens  
   Vijayakumar K. Ramiya, Maya M. Jerald, Patricia D. Lawman,  
   and Michael J.P. Lawman  

22 Tumor Cell Transformation Using Antisense Oligonucleotide  
   Mohamed R. Akl and Nebad M. Ayoub  

23 The Direct Display of Costimulatory Proteins on Tumor Cells  
   as a Means of Vaccination for Cancer Immunotherapy  
   Haval Shirwan, Esma S. Yolcu, Rajesh K. Sharma,  
   Hong Zaho, and Orlando Grimany-Nuno
PART IV  MANIPULATION OF IMMUNE/TUMOR INTERACTIONS

24 Cloning Variable Region Genes of Clonal Lymphoma Immunoglobulin for Generating Patient-Specific Idiotype DNA Vaccine .......................... 289
   Soung-chul Cha, Hong Qin, Ippei Sakamaki, and Larry Kwak
25 Heat Shock Proteins Purified from Autologous Tumors Using Antibody-Based Affinity Chromatography .................. 305
   Christian Kleist, Marco Randazzo, Janina Jiga, and Peter Terness
26 Invariant Chain-Peptide Fusion Vaccine Using HER-2/neu .................. 321
   Sonia A. Perez, George E. Peoples, Michael Papamichail, and Constantin N. Baxevanis
27 TLR-9 Agonist Immunostimulatory Sequence Adjuvants Linked to Cancer Antigens .......................................... 337
   Hidekazu Shirota and Dennis M. Klinman
28 Production of Multiple CTL Epitopes from Multiple Tumor-Associated Antigens .......................... 345
   Rena Morita, Yoshibiko Hirohashi, Munehide Nakatsugawa, Takayuki Kanasaki, Toshiko Torigoe, and Noriyuki Sato
29 Preparation of Polypeptides Comprising Multiple TAA Peptides ........... 357
   Bing Ni, Zhengcai Jia, and Yuzhang Wu
30 Idiotype Vaccine Production Using Hybridoma Technology ................. 367
   Susana Inoges, Ascensión López Díaz de Cerio, Helena Villanueva, Fernando Pastor, and Maurizio Bendandi
31 Preparation of Cancer-Related Peptide Cocktails that Target Heterogeneously Expressed Antigens ..................... 389
   Reshu Gupta and Pradip P. Sachdeva

PART V  DELIVERY MECHANISMS

32 Making an Avipoxvirus Encoding a Tumor-Associated Antigen and a Costimulatory Molecule .......................... 407
   Paul M. Howley, Kerrilyn R. Diener, and John D. Hayball
33 Bacterial Vectors for the Delivery of Tumor Antigens .......................... 429
   Yan Wang, Bertrand Toussaint, and Audrey Le Gouëllec
34 Preparation of Peptide Microspheres Using Tumor Antigen-Derived Peptides .......................................... 443
   Santwana Bhatnagar, Raza Ali Naqvi, Riyasat Ali, and D.N. Rao
35 Production of Antigen-Loaded Biodegradable Nanoparticles and Uptake by Dendritic Cells .......................... 453
   Vijaya Bharti Joshi, Sean M. Geary, and Allyaser K. Salem
36 Development of Plasmid–Lipid Complexes for Direct Intratumoral Injection .......................................... 467
   Rama P. Kotipatrungi and Ganji Purnachandra Nagaraju
PART VI  THE ADVANCES, CHALLENGES, AND FUTURE OF CANCER VACCINES

37  The Use of Dendritic Cells for Peptide-Based Vaccination in Cancer Immunotherapy  ........................................  479
    Mohamed L. Salem

38  Advances in Host and Vector Development for the Production of Plasmid DNA Vaccines ................................  505
    Juergen Mairhofer and Alvaro R. Lara

39  Challenges Facing the Development of Cancer Vaccines .................................................................  543
    Mayer Fishman

40  Future of Cancer Vaccines ..................................................................................................................  555
    Hauke Winter, Bernard A. Fox, and Dominik Rüttinger

Index .................................................................  565
