### PART I  Manipulation and Modification of Immune Cells:  
Dendritic Cells

1  Single-Step Antigen Loading and Maturation of Dendritic Cells  
Through mRNA Electroporation of a Tumor-Associated Antigen  
and a TriMix of Costimulatory Molecules  .......................... 3  
  *Daphné Benteyn, An M.T. Van Nuffel, Sofie Wilgenhof,*  
  *and Aude Bonehill*

2  Generation of Multiple Peptide Cocktail-Pulsed Dendritic  
Cells as a Cancer Vaccine ............................................. 17  
  *Hyun-Ju Lee, Nu-Ri Choi, Manh-Cuong Vo, My-Dung Hoang,*  
  *Youn-Kyung Lee,* and *Je-Jung Lee*

3  Pulsing Dendritic Cells with Whole Tumor Cell Lysates ............. 27  
  *Laura Alaniz, Manglio M. Rizzo,* and *Guillermo Mazzolini*

4  Antigen Trapping by Dendritic Cells for Antitumor Therapy ...... 33  
  *Chiranjib Pal*

5  Ex Vivo Loading of Autologous Dendritic Cells with Tumor Antigens ... 41  
  *Manglio M. Rizzo, Laura Alaniz,* and *Guillermo Mazzolini*

6  Tumor Antigen-/Cytokine-Pulsed Dendritic Cells  
in Therapy Against Lymphoma ........................................... 45  
  *Sumit K. Hira, Deepak Verma,* and *Partha P. Manna*

7  Dendritic Cells Primed with Protein–Protein Fusion Adjuvant .......... 57  
  *Liying Wang* and *Yongli Yu*

8  Antigen-Specific mRNA Transfection of Autologous Dendritic Cells ... 77  
  *Fabian Benencia*

9  Electroporation of Dendritic Cells with Autologous Total RNA  
from Tumor Material ....................................................... 87  
  *Francesca Milano* and *K.K. Krishnadath*

10 Dendritic Cells Transfected with Adenoviral Vectors as Vaccines ...... 97  
  *Joseph Senesac, Dmitry Gabrilovich, Samuel Pirruccello,*  
  *and James E. Talmadge*

11 Genetic Modification of Dendritic Cells with RNAi ..................... 119  
  *Xiao-Tong Song*
12 Fast Monocyte-Derived Dendritic Cell-Based Immunotherapy .......................... 131
   Gamal Ramadan

13 Intratumoral Injection of BCG-CWS-Pretreated
   Dendritic Cells Following Tumor Cryoablation ............................................. 145
   Naoshi Kawamura, Masaru Udagawa, Tomonobu Fujita,
   Toshibaru Sakurai, Tomonori Yaguchi, and Yutaka Kawakami

14 Exploiting the CD1d-iNKT Cell Axis for Potentiation
   of DC-Based Cancer Vaccines ................................................................. 155
   Roeland Lameris, Famke L. Schneiders, Tanja D. de Gruijl,
   and Hans J. van der Vliet

PART II MANIPULATION AND MODIFICATION OF IMMUNE CELLS:
   T LYMPHOCYTES AND NK CELLS

15 Modification of T Lymphocytes to Express Tumor Antigens ......................... 169
   Aaron E. Foster and Xiao-Tong Song

16 Genetic Modification of Mouse Effector and Helper T Lymphocytes
   Expressing a Chimeric Antigen Receptor .................................................. 177
   Liza B. John, Tess M. Chee, David E. Gilham, and Phillip K. Darcy

17 Genetic Modification of Cytotoxic T Lymphocytes
   to Express Cytokine Receptors .................................................................. 189
   Serena K. Perna, Barbara Savoldo, and Gianpietro Dotti

18 Monitoring the Frequency and Function of Regulatory T Cells
   and Summary of the Approaches Currently Used to Inhibit Regulatory
   T Cells in Cancer Patients ........................................................................ 201
   Chiara Camisaschi, Marcella Tazzari, Licia Rivoltini,
   and Chiara Castelli

19 Cytokine Activation of Natural Killer Cells ............................................... 223
   Syh-Jae Lin, Pei-Tzu Lee, and Ming-Ling Kuo

PART III MANIPULATION AND MODIFICATION OF TUMOR CELLS

20 Loading of Acute Myeloid Leukemia Cells
   with Poly(I:C) by Electroporation ................................................................. 233
   Eva Lion, Charlotte M. de Winde, Viggo F.I. Van Tendeloo,
   and Evelien L.J.M. Smits

21 Autologous Tumor Cells Engineered to Express Bacterial Antigens ............. 243
   Vijayakumar K. Ramiya, Maya M. Jerald, Patricia D. Lawman,
   and Michael J.P. Lawman

22 Tumor Cell Transformation Using Antisense Oligonucleotide .................... 259
   Mohamed R. Akl and Nehad M. Ayoub

23 The Direct Display of Costimulatory Proteins on Tumor Cells
   as a Means of Vaccination for Cancer Immunotherapy ............................ 269
   Haval Shirwan, Esma S. Yolcu, Rajesh K. Sharma,
   Hong Zaho, and Orlando Grimany-Nuno
PART IV MANIPULATION OF IMMUNE/TUMOR INTERACTIONS

24 Cloning Variable Region Genes of Clonal Lymphoma Immunoglobulin for Generating Patient-Specific Idiotype DNA Vaccine .......................................................... 289
   Soung-chul Cha, Hong Qin, Ippei Sakamaki, and Larry Kwak

25 Heat Shock Proteins Purified from Autologous Tumors Using Antibody-Based Affinity Chromatography .......................................................... 305
   Christian Kleist, Marco Randazzo, Janina Jiga, and Peter Terness

26 Invariant Chain-Peptide Fusion Vaccine Using HER-2/neu ....................................... 321
   Sonia A. Perez, George E. Peoples, Michael Papamichail, and Constantin N. Baxevanis

27 TLR-9 Agonist Immunostimulatory Sequence Adjuvants Linked to Cancer Antigens .......................................................... 337
   Hidekazu Shirota and Dennis M. Klinman

28 Production of Multiple CTL Epitopes from Multiple Tumor-Associated Antigens .......................................................... 345
   Rena Morita, Yoshibiko Hirohashi, Munebide Nakatsugawa, Takayuki Kanasaki, Toshibiko Torigoe, and Noriyuki Sato

29 Preparation of Polypeptides Comprising Multiple TAA Peptides ........................................... 357
   Bing Ni, Zhengcai Jia, and Yuzhang Wu

30 Idiotype Vaccine Production Using Hybridoma Technology ........................................... 367
   Susana Inoges, Ascensión López Diaz de Cerio, Helena Villanueva, Fernando Pastor, and Maurizio Bendandi

31 Preparation of Cancer-Related Peptide Cocktails that Target Heterogeneously Expressed Antigens .......................................................... 389
   Reshu Gupta and Pradip P. Sachdeva

PART V DELIVERY MECHANISMS

32 Making an Avipoxvirus Encoding a Tumor-Associated Antigen and a Costimulatory Molecule .......................................................... 407
   Paul M. Howley, Kerrilyn R. Diener, and John D. Hayball

33 Bacterial Vectors for the Delivery of Tumor Antigens .......................................................... 429
   Yan Wang, Bertrand Toussaint, and Audrey Le Gouëllec

34 Preparation of Peptide Microspheres Using Tumor Antigen-Derived Peptides .................... 443
   Santwana Bhatnagar, Raza Ali Naqvi, Riyasat Ali, and D.N. Rao

35 Production of Antigen-Loaded Biodegradable Nanoparticles and Uptake by Dendritic Cells .......................................................... 453
   Vijaya Bharti Joshi, Sean M. Geary, and Aliager K. Salem

36 Development of Plasmid–Lipid Complexes for Direct Intratumoral Injection .......................................................... 467
   Rama P. Kotipatrani and Ganji Purnachandra Nagaraju
PART VI THE ADVANCES, CHALLENGES, AND FUTURE OF CANCER VACCINES

37 The Use of Dendritic Cells for Peptide-Based Vaccination in Cancer Immunotherapy ................................. 479
   Mohamed L. Salem

38 Advances in Host and Vector Development for the Production of Plasmid DNA Vaccines ......................... 505
   Juergen Mairhofer and Alvaro R. Lara

39 Challenges Facing the Development of Cancer Vaccines ................................................................. 543
   Mayer Fishman

40 Future of Cancer Vaccines ................................................................. 555
   Hauke Winter, Bernard A. Fox, and Dominik Rüttinger

Index ........................................................................................................ 565
Cancer Vaccines
Methods and Protocols
Lawman, M.J.P.; Lawman, P.D. (Eds.)
2014, XVIII, 569 p. 80 illus., 42 illus. in color., Hardcover
