Preface ................................................................. vii
Contributors ...................................................... xiii

PART I  HISTORICAL AND METHODOLOGY OVERVIEW

1 Overview of Mass Spectrometry-Based Metabolomics: Opportunities and Challenges .................................................. 3
   G.A. Nagana Gowda and Danijel Djukovic

PART II  GLOBAL LC-MS BASED METABOLIC PROFILING

2 Global Metabolic Profiling Using Ultra-Performance Liquid Chromatography/Quadrupole Time-of-Flight Mass Spectrometry ............... 15
   Yunpeng Qi, Yunlong Song, Haiwei Gu, Guorong Fan, and Yifeng Chai

3 LC-MS Profiling to Link Metabolic and Phenotypic Diversity in Plant Mapping Populations ............................................. 29
   Camilla B. Hill, Antony Bacic, and Ute Roessner

4 Mitochondrial Metabolomics Using High-Resolution Fourier-Transform Mass Spectrometry ............................................. 43
   Young-Mi Go, Karan Uppal, Douglas I. Walker, ViLinh Tran, Lauriane Dury, Frederick H. Strobel, Hélène Baubichon-Cortay, Kurt D. Pennell, James R. Roede, and Dean P. Jones

5 Sample Preparation Methods for LC-MS-Based Global Aqueous Metabolite Profiling .................................................... 75
   Antoni Beltran, Sara Samino, and Oscar Yanes

PART III  GLOBAL GC-MS AND CE-MS BASED METABOLIC PROFILING

6 Methods of Discovery-Based and Targeted Metabolite Analysis by Comprehensive Two-Dimensional Gas Chromatography with Time-of-Flight Mass Spectrometry Detection ........................................ 83

7 Analysis of Mouse Liver Metabolites by GC × GC–TOF MS. .............. 99
   Xue Shi, Xinmin Yin, and Xiang Zhang

8 Metabolite Fingerprinting by Capillary Electrophoresis-Mass Spectrometry ................................................................. 107
   Antonia Garcia, Shama Naz, and Coral Barbas
# Contents

## Part IV  Isotope Labeling Methods

9  Quantitative Metabolomic Profiling Using Dansylation Isotope Labeling and Liquid Chromatography Mass Spectrometry  
*Ruokun Zhou and Liang Li*  
127

10  Quantitative Analysis of Amino and Organic Acids by Methyl Chloroformate Derivatization and GC-MS/MS Analysis  
*Hans Fredrik Nyvold Kvitvang, Kåre A. Kristiansen, Stina K. Lien, and Per Bruheim*  
137

11  Stable Isotope-Labeled Tracers for Metabolic Pathway Elucidation by GC-MS and FT-MS  
*Richard M. Higashi, Teresa W.-M. Fan, Pawel K. Lorkiewicz, Hunter N.B. Moseley, and Andrew N. Lane*  
147

## Part V  Targeted Aqueous Metabolite Profiling

12  Multiplexed, Quantitative, and Targeted Metabolite Profiling by LC-MS/MRM  
*Ru Wei, Guodong Li, and Albert B. Seymour*  
171

## Part VI  Lipid and Bile Acid Profiling Methods

13  Multidimensional Mass Spectrometry-Based Shotgun Lipidomics  
*Miao Wang and Xianlin Han*  
203

14  Comprehensive Quantitative Determination of PUFA-Related Bioactive Lipids for Functional Lipidomics Using High-Resolution Mass Spectrometry  
*Mojgan Masoodi and Dietrich A. Volmer*  
221

15  Ultra-Performance Liquid Chromatography-Mass Spectrometry Targeted Profiling of Bile Acids: Application to Serum, Liver Tissue, and Cultured Cells of Different Species  
*Juan Carlos García-Cañaveras, María Teresa Donato, and Agustín Lahoz*  
233

## Part VII  Profiling Volatile Organic Compounds

16  Analysis of Volatile Organic Compounds in Exhaled Breath by Gas Chromatography-Mass Spectrometry Combined with Chemometric Analysis  
*Jan W. Dallinga, Agnieszka Smolinska, and Frederik-Jan van Schooten*  
251

17  Headspace SPME-GC-MS Metabolomics Analysis of Urinary Volatile Organic Compounds (VOCs)  
*Shucha Zhang and Daniel Raftery*  
265

## Part VIII  Profiling and Imaging Using Atmospheric Sampling Methods

18  Metabolite Profiling by Direct Analysis in Real-Time Mass Spectrometry  
*Christina M. Jones, María Eugenia Monge, and Facundo M. Fernández*  
275
