

Contents

1	Nature, Number and Substance	1
1.1	Introduction	1
1.2	Reading: Aristotle, <i>On the Heavens</i>	2
1.2.1	Chapter 1	2
1.2.2	Chapter 2	3
1.2.3	Chapter 3	5
1.3	Study Questions	7
1.4	Exercises	8
1.5	Vocabulary	8
2	The Shape and Motion of the Heavens	9
2.1	Introduction	9
2.2	Reading: Aristotle, <i>On the Heavens</i>	10
2.2.1	Chapter 4	10
2.2.2	Chapter 5	12
2.2.3	Chapter 6	13
2.3	Study Questions	14
2.4	Exercises	15
2.5	Vocabulary	15
3	Harmony and Complexity	17
3.1	Introduction	17
3.2	Reading: Aristotle, <i>On the Heavens</i>	17
3.2.1	Chapter 7	17
3.2.2	Chapter 8	18
3.2.3	Chapter 9	20
3.2.4	Chapter 10	21
3.2.5	Chapter 11	21
3.2.6	Chapter 12	22
3.3	Study Questions	24
3.4	Exercises	25
3.5	Vocabulary	25

- 4 Earth at the Center of the World 27**
 - 4.1 Introduction 27
 - 4.2 Reading: Aristotle, *On the Heavens* 30
 - 4.2.1 Chapter 13 30
 - 4.2.2 Chapter 14 35
 - 4.3 Study Questions 37
 - 4.4 Exercises 38
 - 4.5 Vocabulary 39

- 5 The World of Ptolemy 41**
 - 5.1 Introduction 41
 - 5.2 Reading: Ptolemy, *The Almagest* 42
 - 5.2.1 Chapter 1: Preface 42
 - 5.2.2 Chapter 2: On the Order of the Theorems 44
 - 5.2.3 Chapter 3: That the Heaven Moves as a Sphere 44
 - 5.2.4 Chapter 4: The Earth Too is Generally Spherical
to Perception 46
 - 5.2.5 Chapter 5: The Earth Is in the Middle of the Heaven 47
 - 5.2.6 Chapter 6: The Earth Has the Ratio of a Point to the
Heavenly Things 49
 - 5.2.7 Chapter 7: The Earth Does not Make any Motion from
One Place to Another 49
 - 5.2.8 Chapter 8: There Are Two Different Primary Motions in
the Heaven 51
 - 5.2.9 Chapter 9: On the Individual Concepts 53
 - 5.3 Study Questions 53
 - 5.4 Exercises 55
 - 5.5 Vocabulary 60

- 6 Measuring the Tropical Year 61**
 - 6.1 Introduction 61
 - 6.2 Reading: Ptolemy, *The Almagest* 62
 - 6.2.1 Preface 62
 - 6.2.2 Chapter 1: On the Size of the Time of a Year 62
 - 6.3 Study Questions 69
 - 6.4 Exercises 70
 - 6.5 Vocabulary 72

- 7 Geometrical Tools 73**
 - 7.1 Introduction 73
 - 7.2 Reading: Ptolemy, *The Almagest* 75
 - 7.2.1 Book I, Chapter 12: On the Arc Between the Solstices 75
 - 7.2.2 Book V, Chapter 1: On the Construction of an Astrolabe
Instrument 77
 - 7.3 Study Questions 80

7.4	Exercises	81
7.5	Vocabulary	83
8	The Sun, the Moon and the Calendar	85
8.1	Introduction	85
8.2	Reading: Bede, <i>The Reckoning of Time</i>	86
8.2.1	Chapter 16: The Signs of the Twelve Months	86
8.2.2	Chapter 17: The Course of the Moon Through the Signs	89
8.2.3	Chapter 25: When and Why the Moon Appears to be Facing Upwards, Facing Downwards, or Standing Upright	90
8.2.4	Chapter 29: The Harmony of the Moon and the Sea	93
8.2.5	Chapter 30: Equinoxes and Solstices	96
8.3	Study Questions	98
8.4	Exercises	99
8.5	Vocabulary	100
9	From Astronomy to Cartography	101
9.1	Introduction	101
9.2	Reading: Waldseemuller, <i>Introduction to Cosmography</i>	102
9.2.1	Preface: To His Majesty Maximillian Cæsar Augustus Martinus Ilacomilus Wishes Good Fortune	102
9.2.2	Order of Treatment	103
9.2.3	Chapter I: Of the Principles of Geometry Necessary to an Understanding of the Sphere	104
9.2.4	Chapter II: Sphere, Axis, Poles, etc., Accurately Defined ..	104
9.2.5	Chapter III: Of the Circles of the Heavens	106
9.2.6	Chapter IV: Of a Certain Theory of the Sphere According to the System of Degrees	108
9.2.7	Chapter V: Of the Five Celestial Zones and the Application of These and of the Degrees of the Heavens to the Earth	109
9.2.8	Chapter VI: Of Parallels	112
9.3	Study Questions	112
9.4	Exercises	114
9.5	Vocabulary	116
10	Climates and Continents	117
10.1	Introduction	117
10.2	Reading: Waldseemuller, <i>Introduction to Cosmography</i>	117
10.2.1	Chapter VII: Of Climates	117
10.2.2	Chapter VIII: Of the Winds	119
10.2.3	Chapter IX: Of Certain Elements of Cosmography	122
10.2.4	Appendix	126
10.3	Study Questions	127

10.4 Exercises 127

10.5 Vocabulary 128

11 Heliocentrism: Hypothesis or Truth? 129

11.1 Introduction 129

11.2 Reading: Copernicus, *On the Revolutions of the Heavenly Spheres* 130

 11.2.1 Introduction: To the Reader Concerning the Hypotheses
 of this Work 130

 11.2.2 Preface and Dedication: To Pope Paul III 131

 11.2.3 Book I: Introduction 135

 11.2.4 Chapter 1: The World is Spherical 137

 11.2.5 Chapter 2: The Earth is Spherical too 137

 11.2.6 Chapter 3: How Land and Water Make up a Single Globe . 138

 11.2.7 Chapter 4: The Movement of the Celestial Bodies is
 Regular, Circular, and Everlasting—or Else Compounded
 of Circular Movements 139

11.3 Study Questions 140

11.4 Exercises 141

11.5 Vocabulary 142

12 Earth as a Wandering Star 143

12.1 Introduction 143

12.2 Reading: Copernicus, *On the Revolutions of the Heavenly Spheres* 143

 12.2.1 Chapter 5: Does the Earth Have a Circular Movement?
 And of its Place 144

 12.2.2 Chapter 6: On the Immensity of the Heavens in Relation
 to the Magnitude of the Earth 145

 12.2.3 Chapter 7: Why the Ancients Thought the Earth Was at
 Rest at the Middle of the World as Its Centre 147

 12.2.4 Chapter 8: Answer to the Aforesaid Reasons and Their
 Inadequacy 148

 12.2.5 Chapter 9: Whether Many Movements Can be Attributed
 to the Earth, and Concerning the Centre of the World 150

12.3 Study Questions 151

12.4 Exercises 152

12.5 Vocabulary 152

13 Re-ordering the Heavenly Spheres 153

13.1 Introduction 153

13.2 Reading: Copernicus, *On the Revolutions of the Heavenly Spheres* 154

 13.2.1 Chapter 10: On the Order of the Celestial Orbital Circles . 154

 13.2.2 Chapter 11: A Demonstration of the Threefold Movement
 of the Earth 165

13.3 Study Questions 168

13.4 Exercises 169

13.5 Vocabulary 172

- 14 Celestial Physics** 173
 - 14.1 Introduction 173
 - 14.2 Reading: Kepler, *Epitome of Copernican Astronomy* 174
 - 14.2.1 To the Reader 174
 - 14.2.2 First Book on the Doctrine of the Schemata: On the Position, Order, and Movement of the Parts of the World; or, on the System of the World 180
 - 14.3 Study Guide 183
 - 14.4 Exercises 183
 - 14.5 Vocabulary 184

- 15 Broken Spheres** 185
 - 15.1 Introduction 185
 - 15.2 Reading: Kepler, *Epitome of Copernican Astronomy* 186
 - 15.2.1 Chapter 1: On the Principal Parts of the World 186
 - 15.2.2 Chapter 2: On the Place of the Sun at the Centre of the World 190
 - 15.2.3 Chapter 3: On the Order of the Movable Spheres 193
 - 15.3 Study Questions 197
 - 15.4 Exercises 198
 - 15.5 Vocabulary 200

- 16 Kepler’s Third Law** 201
 - 16.1 Introduction 201
 - 16.2 Reading: Kepler, *Epitome of Copernican Astronomy* 201
 - 16.2.1 Chapter 1: How Many and of What Sort are the Movements? 202
 - 16.2.2 Chapter 2: Concerning the Causes of the Movement of the Planets 203
 - 16.2.3 Chapter 3: On the Revolution of the Solar Body Around its Axis and its Effect in the Movement of the Planets ... 211
 - 16.3 Study Questions 211
 - 16.4 Exercises 212
 - 16.5 Vocabulary 213

- 17 Kepler’s First and Second Laws** 215
 - 17.1 Introduction 215
 - 17.2 Reading: Kepler, *Epitome of Copernican Astronomy* 216
 - 17.2.1 Introduction 216
 - 17.2.2 Chapter 1: The Causes of the True Irregularities 217
 - 17.2.3 Chapter 2: On the Causes of Irregularity in Longitude ... 221
 - 17.3 Study Questions 223
 - 17.4 Exercises 223
 - 17.5 Vocabulary 225

18	Mountains on the Moon	227
18.1	Introduction	227
18.2	Reading: Galileo, <i>The Sidereal Messenger</i>	228
18.2.1	To the Most Serene Cosimo II de' Medici, Fourth Grand Duke of Tuscany	228
18.2.2	Astronomical Message Containing and Explaining Observations Lately Made with the Aid of a New Spyglass Regarding the Moon's Surface, the Milky Way, Nebulous Stars, an Innumerable Multitude of Fixed Stars, and Also Regarding Four Planets Never Before Seen, Which Have Been Named Medicean Stars	230
18.3	Study Questions	243
18.4	Exercises	243
18.5	Vocabulary	247
19	The Medician Stars	249
19.1	Introduction	249
19.2	Reading: Galileo, <i>The Sidereal Messenger</i>	249
19.2.1	The Sidereal Messenger (continued)	249
19.3	Study Questions	256
19.4	Exercises	257
19.5	Vocabulary	258
20	The Luminosity of Variable Stars	259
20.1	Introduction	259
20.2	Reading: Leavitt, <i>Periods of 25 variable stars in the small magellanic cloud</i>	260
20.2.1	Periods of 25 Variable Stars in the Small Magellanic Cloud	260
20.3	Study Questions	263
20.4	Exercises	264
20.5	Vocabulary	264
21	Galactic Spectra	265
21.1	Introduction	265
21.2	Reading: Slipher, <i>Nebulae</i>	265
21.2.1	Nebulae	265
21.3	Study Questions	270
21.4	Exercises	271
21.5	Vocabulary	272
22	Measuring Astronomical Distances	273
22.1	Introduction	273
22.2	Reading: Shapley, <i>Galaxies</i>	273
22.2.1	The Astronomical Toolhouse	273

22.2.2	The Abundance of Cepheid Variables	274
22.2.3	The Period-Luminosity Relation and the Light Curves of Cepheids	276
22.3	Study Questions	281
22.4	Exercises	282
22.5	Vocabulary	283
23	A New Theory of Gravity	285
23.1	Introduction	285
23.2	Reading: Einstein, <i>Relativity</i>	286
23.2.1	XVIII: Special and General Principle of Relativity	286
23.2.2	XIX: The Gravitational Field	288
23.2.3	XX: The Equality of Inertial and Gravitational Mass as an Argument for the General Postulate of Relativity	290
23.2.4	XXI: In what Respects are the Foundations of Classical Mechanics and of the Special Theory of Relativity Unsatisfactory?	292
23.2.5	XXII: A Few Inferences from the General Principle of Relativity	293
23.2.6	XXIII: Behaviour of Clocks and Measuring-Rods on a Rotating Body of Reference	295
23.3	Study Questions	297
23.4	Exercises	298
23.5	Vocabulary	299
24	Euclid, Gauss and Mercury’s Orbit	301
24.1	Introduction	301
24.2	Reading: Einstein, <i>Relativity</i>	302
24.2.1	XXIV: Euclidean and non-Euclidean Continuum	302
24.2.2	XXV: Gaussian Co-ordinates	303
24.2.3	XXVI: The Space–time Continuum of the Special Theory of Relativity Considered as a Euclidean Continuum	306
24.2.4	XXVII: The Space–time Continuum of the General Theory of Relativity is not a Euclidean Continuum	307
24.2.5	XXVIII: Exact Formulation of the General Principle of Relativity	308
24.2.6	XXIX: The Solution of the Problem of Gravitation on the Basis of the General Principle of Relativity	309
24.3	Study Questions	312
24.4	Exercises	313
24.5	Vocabulary	313
25	A Finite Universe with No Boundary	315
25.1	Introduction	315
25.2	Reading: Einstein, <i>Relativity</i>	315

25.2.1 XXX: Cosmological Difficulties of Newton’s Theory 315

25.2.2 XXXI: The Possibility of a “finite” and yet “unbounded”
Universe 316

25.2.3 XXXII: The Structure of Space According to the General
Theory of Relativity 319

25.3 Study Questions 320

25.4 Vocabulary 320

26 The Structure of the Universe 321

26.1 Introduction 321

26.2 Reading: Hubble, *The Realm of the Nebulae* 321

26.2.1 The Exploration of Space 322

26.2.2 Characteristics of the Observable Region 324

26.2.3 Distances of Nebulae 324

26.2.4 Distribution of Nebulae 325

26.2.5 Velocity–Distance Relation 326

26.2.6 The Observable Region as a Sample of the Universe 331

26.3 Study Questions 333

26.4 Exercises 333

26.5 Vocabulary 334

27 Measuring the Potentially Infinite 335

27.1 Introduction 335

27.2 Reading: Lemaitre, *The Primeval Atom* 336

27.2.1 Introduction 336

27.2.2 Is the World Infinite? 337

27.2.3 The Distance of the Stars 339

27.2.4 The Border of Naught 341

27.2.5 Space Which is Finite and Without Boundary 342

27.2.6 Properties of Finite, Homogeneous Space, Without
Boundary 344

27.2.7 An Euclidean Map of Elliptical Space 344

27.2.8 The Possibility of an Experimental Check on the
Ellipticity of Real Space 347

27.2.9 Space and Matter: Einstein’s Relation 348

27.2.10 The World of Nebulae 348

27.2.11 Does the Size of Space Vary? 350

27.3 Study Questions 351

27.4 Exercises 353

27.5 Vocabulary 353

28 The Birth of the Big Bang 355

28.1 Introduction 355

28.2 Reading: Lemaitre, *The Primeval Atom* 355

28.2.1 Introduction 355

28.2.2 Buffon’s Cosmogony 357

28.2.3 Kant’s Cosmogony 358

28.2.4 Laplace’s Cosmogony 360

28.2.5 The Primeval Atom 361

28.2.6 The Three Periods of Expansion 364

28.2.7 Experimental Verifications 364

28.2.8 Geometry 366

28.3 Study Questions 367

28.4 Exercises 369

28.5 Vocabulary 369

29 The Primeval Atom 371

29.1 Introduction 371

29.2 Reading: Lemaitre, *The Primeval Atom* 371

29.2.1 Introduction 371

29.2.2 Closed Space 372

29.2.3 Elliptical Space 373

29.2.4 Space of Variable Radius 374

29.2.5 The Primeval Atom 374

29.2.6 The Formation of Clouds 375

29.2.7 Cosmic Repulsion 376

29.2.8 The Universe of Friedmann 378

29.2.9 Einstein’s Equilibrium 379

29.2.10 The Significance of Clusters of Nebulae 380

29.2.11 The Findings of De Sitter 380

29.2.12 The Proper Motion of Nebulae 381

29.2.13 The Formation of Stars 382

29.2.14 The Distribution of Densities in Nebulae 382

29.2.15 Distribution of Supergiant Stars 383

29.2.16 The Uniform Abundance of the Elements 384

29.2.17 Cosmic Rays 384

29.2.18 Conclusion 384

29.3 Study Questions 385

29.4 Exercises 387

29.5 Vocabulary 387

Bibliography 389
