## Contents

*Preface* .................................................................................................................. v
*Contributors* ........................................................................................................... ix

1 Diverse Functions and Mechanisms of Mammalian Long Noncoding RNAs .......................... 1
   *Callie R. Merry, Courtney Niland, and Ahmad M. Khalil*

2 Sequence-Defined Oligoaminoamides for the Delivery of siRNAs ................................. 15
   *Dian-Jang Lee, Ernst Wagner, and Taavi Lehto*

3 A Biochemical Approach to Identify Direct MicroRNA Targets ........................................ 29
   *Murugan Subramanian, Xiao Ling Li, Toshifumi Hara, and Ashish Lal*

4 Native Gel Analysis for Mammalian MicroRNPs Assembled from Pre-MicroRNAs ......... 39
   *Xuhang Liu and Zissimos Mourelatos*

5 Identification and Validation of miRNA Target Sites Within Nontraditional miRNA Targets ................................................................. 53
   *Scott T. Younger and David R. Corey*

6 Fractionation of Non-polyadenylated and Ribosomal-Free RNAs from Mammalian Cells .......................................................... 69
   *Qing-Fei Yin, Ling-Ling Chen, and Li Yang*

7 Affinity Purification of Long Noncoding RNA–Protein Complexes from Formaldehyde Cross-Linked Mammalian Cells .......................... 81
   *Chenguang Gong and Lynne E. Maquat*

8 RNA Pulldown Protocol for In Vitro Detection and Identification of RNA-Associated Proteins ........................................................................... 87
   *Oskar Marín-Béjar and Maite Huarte*

9 nRIP-seq: A Technique to Identify RNA Targets of an RNA Binding Protein on a Genome-Wide Scale ................................................................. 97
   *Jing Crystal Zhao*

10 Analysis of the Subcellular Distribution of RNA by Fluorescence In Situ Hybridization .................................................................................. 107
    *Shinichi Nakagawa*

11 RNA Fluorescence In Situ Hybridization in Cultured Mammalian Cells .......................... 123
    *Vidisha Tripathi, Jingyi Fei, Taekjip Ha, and Kannanganattu V. Prasanth*

12 Locating RNAs In Situ with FISH-STIC Probes ................................................................ 137
    *John R. Sinnamon and Kevin Czapinski*

13 Rapid and Efficient Elimination of Specific Nuclear Noncoding RNAs in Mammalian Cells with Antisense Oligonucleotides .......................... 149
    *Tetsuro Hirose and Taro Mannen*
14 On Using Magnesium and Potassium Ions in RNA Experiments ............... 157
   Neena Grover
15 Studying the Affinity, Kinetic Stability, and Specificity of RNA/Protein
   Interactions: SINE ncRNA/Pol II Complexes as a Model System ............... 165
   James A. Goodrich and Jennifer F. Kugel

Index ................................................................. 179
Regulatory Non-Coding RNAs
Methods and Protocols
Carmichael, G.G. (Ed.)
2015, X, 181 p. 39 illus., 10 illus. in color., Hardcover
ISBN: 978-1-4939-1368-8
