Contents

Preface .................................................................................................................. v
Contributors ......................................................................................................... xi

PART I  BACKGROUND: EPIGENETIC MECHANISM

1 Cancer Epigenetics: An Introduction .......................................................... 3
   Rajnee Kanwal, Karisma Gupta, and Sanjay Gupta

2 Community Resources and Technologies Developed Through the NIH Roadmap Epigenomics Program .................................................. 27
   John S. Satterlee, Andrea Beckel-Mitchener, Kim McAllister, Dena C. Procaccini, Joni L. Rutter, Frederick L. Tyson, and Lisa Helbling Chadwick

3 Epigenome-Wide Association Studies (EWAS): Past, Present, and Future . . 51
   James M. Flanagan

4 Epigenetic Biomarkers in Liver Cancer ...................................................... 65
   Krishna K. Banaudha and Mukesh Verma

PART II  CANCER SPECIFIC TYPE EPIGENETIC CHANGES

5 Cancer Type-Specific Epigenetic Changes: Gastric Cancer ...................... 79
   Danielle Queiroz Calcagno, Marília de Arruda Cardoso Smith, and Rommel Rodriguez Burbano

6 Beyond the Island: Epigenetic Biomarkers of Colorectal and Prostate Cancer ................................................................. 103
   Andrea J. Savio and Bharati Bapat

7 Prostate Cancer Epigenome ..................................................................... 125
   Swathi Chinaranagari, Pankaj Sharma, Nathan J. Bowen, and Jaideep Chaudhary

8 CpG Island Hypermethylation as a Biomarker for the Early Detection of Lung Cancer ........................................................ 141
   Yujin Kim and Duk-Hwan Kim

9 Analysis of DNA Methylation in Pancreatic Cancer: An Update ............ 173
   Christian Pilsarski and Robert Grützmann

10 Epigenetics of Urothelial Carcinoma ...................................................... 183
   Wolfgang A. Schulz, Evangelia A. Koutsogiannouli, Günter Nieisch, and Michèle J. Hoffmann
11 Epigenetics of Prostate Cancer .......................... 217
   Tawnya C. McKe and James V. Tricoli
12 Methylation Profile Landscape in Mesothelioma:
   Possible Implications in Early Detection, Disease Progression,
   and Therapeutic Options ............................... 235
   Xinbo Zhang, Naimei Tang, Arun K. Rishi, Harvey I. Pass,
   and Anil Wali

PART III METHODS AND TECHNOLOGIES USED
   FOR DETECTING EPIGENETIC CHANGES

13 Techniques to Access Histone Modifications and Variants in Cancer ........... 251
   Monica Tyagi, Shafqat A. Khan, Saikat Bhattacharya, Divya Reddy,
   Ajit K. Sharma, Bharat Khade, and Sanjay Gupta
14 Single Base Resolution Analysis of 5-Methylcytosine
   and 5-Hydroxymethylcytosine by RRBS and TAB-RRBS ....................... 273
   Maria A. Hahn, Arthur X. Li, Xiwei Wu, and Gerd P. Pfeifer
15 Quantitative DNA Methylation Analysis for Epigenotyping
   of Colorectal Cancer .................................... 289
   Atsushi Kaneda and Koichi Yagi
16 Histone Modifications Associated with Cancer
   Cell Migration and Invasion ................................ 301
   Miki Hieda, Nariaki Matsuura, and Hiroshi Kimura

PART IV FACTORS THAT INFLUENCE EPIGENETIC CHANGES IN CANCER

17 Aberrant Epigenetic Modifications in Radiation-Resistant
   Head and Neck Cancers .................................. 321
   Hon-Yi Lin, Tim Hui-Ming Huang, and Michael Wing-Yan Chan
18 Cancer-Associated Infectious Agents and Epigenetic Regulation ............. 333
   Vidya Vedham and Mukesh Verma
19 Toxicoepigenomics and Cancer: Implications for Screening .................. 355
   Mukesh Verma
20 Human Papilloma Virus (HPV) Modulation of the HNSCC Epigenome ......... 369
   Josena K. Stephen and Maria J. Worsham
21 Epigenetic Regulation of HIV, AIDS, and AIDS-Related Malignancies ....... 381
   Mukesh Verma
22 Epigenetics of Colorectal Cancer ................................ 405
   Wenji Yan and Mingzhou Guo
23 Epigenetics in Breast and Prostate Cancer .................................... 425
   Yanyuan Wu, Marianna Sarkissyan, and Jaydutt V. Vadgama
## PART V  FUTURE DIRECTIONS: RISK ASSESSMENT, DIAGNOSIS, TREATMENT, AND PROGNOSIS
