Preface ........................................................................................................ v
Contributors ............................................................................................ xi

PART I IN VITRO CHEMICAL GENETIC SCREENING

1 Identification of Therapeutic Small-Molecule Leads in Cultured Cells
   Using Multiplexed Pathway Reporter Readouts ..................................... 3
   Ozlem Kulak, Kiyoshi Yamaguchi, and Lawrence Lum

2 Applying the Logic of Genetic Interaction to Discover Small Molecules
   That Functionally Interact with Human Disease Alleles ....................... 15
   Ari D. Brettman, Pauline H. Tan, Khoa Tran, and Stanley Y. Shaw

3 Construction and Application of a Photo-Cross-Linked Chemical Array ..... 29
   Yasumitsu Kondoh, Kaori Honda, and Hiroyuki Osada

4 High Content Screening for Modulators of Cardiac Differentiation
   in Human Pluripotent Stem Cells ....................................................... 43
   Sean Spiering, Herman Davidovics, Paul J. Bushway, Mark Mercola,
   and Erik Willems

5 Small-Molecule High-Throughput Screening Utilizing
   Xenopus Egg Extract ........................................................................... 63
   Matthew R. Broadus, P. Renee Yew, Stephen R. Hann, and Ethan Lee

PART II IN VIVO CHEMICAL GENETIC SCREENING

6 Fission Yeast-Based High-Throughput Screens for PKA Pathway
   Inhibitors and Activators ..................................................................... 77
   Ana Santos de Medeiros, Grace Kwak, Jordan Vanderhoof, 
   Sam Rivera, Rachel Gottlieb, and Charles S. Hoffman

7 A Method for High-Throughput Analysis of Chronological Aging
   in Schizosaccharomyces pombe ........................................................... 93
   Jessica Stephan and Ann E. Ehrenhofer-Murray

8 Protocols for the Routine Screening of Drug Sensitivity
   in the Human Parasite Trichomonas vaginalis ..................................... 103
   Manal J. Natto, Anthonius A. Eze, and Harry P. de Koning

9 Chemical Genetic Screens Using Arabidopsis thaliana Seedlings
   Grown on Solid Medium ...................................................................... 111
   Thanh Theresa Dinh and Xuemei Chen

10 Small-Molecule Screening Using Drosophila Models
    of Human Neurological Disorders ..................................................... 127
    Mickael Poidevin, Feiran Zhang, and Peng Jin
11 High-Throughput Small-Molecule Screening in Caenorhabditis elegans
   Sunitha Rangaraju, Gregory M. Solis, and Michael Petrascheck 139

12 Whole-Organism Screening for Modulators of Fasting Metabolism
   Using Transgenic Zebrafish
   Philipp Gut and Didier Y.R. Stainier 157

13 High Content Screening for Modulators of Cardiovascular
   or Global Developmental Pathways in Zebrafish
   Charles H. Williams and Charles C. Hong 167

PART III SMALL MOLECULES IN CHEMICAL BIOLOGY

14 Extraction Methods of Natural Products from Traditional
   Chinese Medicines
   Jingyu Zhang, Jianying Han, Ayokunmi Oyeleye, Miaomiao Liu,
   Xueting Liu, and Lixin Zhang 177

15 Bioassay-Guided Identification of Bioactive Molecules
   from Traditional Chinese Medicines
   Jianying Han, Jingyu Zhang, Wenni He, Pei Huang, Ayokunmi Oyeleye,
   Xueting Liu, and Lixin Zhang 187

16 NMR Screening in Fragment-Based Drug Design: A Practical Guide.
   Hai-Young Kim and Daniel F. Wyss 197

17 Practical Strategies for Small-Molecule Probe Development
   in Chemical Biology
   Jonathan E. Hempel and Charles C. Hong 209

18 Principal Component Analysis as a Tool for Library Design:
   A Case Study Investigating Natural Products, Brand-Name Drugs,
   Natural Product-Like Libraries, and Drug-Like Libraries
   Todd A. Wenderski, Christopher F. Stratton, Renato A. Bauer,
   Felix Kopp, and Derek S. Tan 225

19 Small-Molecule Library Screening by Docking with PyRx
   Sargis Dallakyan and Arthur J. Olson 243

PART IV SMALL MOLECULE TARGET IDENTIFICATION

20 Fluorous Photoaffinity Labeling to Probe Protein-Small
   Molecule Interactions
   Weigang Huang and Qisheng Zhang 253

21 Identification of the Targets of Biologically Active Small Molecules
   Using Quantitative Proteomics
   Glòria Vendrell-Navarro, Andreas Brockmeyer, Herbert Waldmann,
   Petra Janning, and Slava Ziegler 263

22 Drug Affinity Responsive Target Stability (DARTS) for Small-Molecule
   Target Identification
   Melody Y. Pai, Brett Lomenick, Heejun Hwang, Robert Schiestl,
   William McBride, Joseph A. Loo, and Jing Huang 287
23 Chemical Genomic Profiling via Barcode Sequencing to Predict Compound Mode of Action ................................................................. 299
Jeff S. Piotrowski, Scott W. Simpkins, Sheena C. Li, Raamesh Deshpande, Sean J. McIlwain, Irene M. Ong, Chad L. Myers, Charlie Boone, and Raymond J. Andersen

24 Image-Based Prediction of Drug Target in Yeast ......................... 319
Shinsuke Ohnuki, Hiroki Okada, and Yoshikazu Ohyo

Index .................................................................................................................. 329
Chemical Biology
Methods and Protocols
Hempel, J.E.; Williams, C.H.; Hong, C.C. (Eds.)
