## Contents

| Preface | v |
| Contributors | ix |
| 1 Microarray Transposon Tracking for the Mapping of Conditionally Essential Genes in *Campylobacter jejuni* | 1 |
| Martin Stahl and Alain Stintzi |
| 2 Identifying Essential *Streptococcus sanguinis* Genes Using Genome-Wide Deletion Mutation | 15 |
| Lei Chen, Xiuchun Ge, and Ping Xu |
| 3 Defining Essential Genes and Identifying Virulence Factors of *Porphyromonas gingivalis* by Massively Parallel Sequencing of Transposon Libraries (Tn-seq) | 25 |
| Brian A. Klein, Margaret J. Duncan, and Linden T. Hu |
| 4 Identification of Essential Genes and Synthetic Lethal Gene Combinations in *Escherichia coli* K-12 | 45 |
| Hirotada Mori, Tomoya Baba, Katsushi Yokoyama, Rikiya Takeuchi, Wataru Nomura, Kazuichi Makishi, Yuta Otsuka, Hitomi Dose, and Barry L. Wanner |
| 5 Identification of Genes Essential for Leptospirosis | 67 |
| Thanatchaporn Bartpho and Gerald L. Murray |
| 6 Identifying Essential Genes in *Mycobacterium tuberculosis* by Global Phenotypic Profiling | 79 |
| 7 Essential Genes in the Infection Model of *Pseudomonas aeruginosa*-PCR-Based Signature-Tagged Mutagenesis | 97 |
| Irena Kukavica-Ibrulj and Roger C. Levesque |
| 8 Genome-Wide Synthetic Genetic Screening by Transposon Mutagenesis in *Candida albicans* | 125 |
| Brooke N. Horton and Anuj Kumar |
| 9 An Integrated Machine-Learning Model to Predict Prokaryotic Essential Genes | 137 |
| Jingyuan Deng |
| 10 A Statistical Framework for Improving Genomic Annotations of Transposon Mutagenesis (TM) Assigned Essential Genes | 153 |
| Jingyuan Deng |
| 11 A Proposed Essential Gene Discovery Pipeline: A *Campylobacter jejuni* Case Study | 167 |
| Mark Reuter, Duncan J.H. Gaskin, and Aline Metris |
12  Computational Prediction of Essential Metabolic Genes  
   Using Constraint-Based Approaches .......................... 183  
   Georg Basler

13  Three Computational Tools for Predicting Bacterial Essential Genes .... 205  
   Feng-Biao Guo, Yuan-Nong Ye, Lu-Wen Ning, and Wen Wei

14  Gene Essentiality Analysis Based on DEG 10, an Updated Database  
   of Essential Genes ........................................... 219  
   Feng Gao, Hao Luo, Chun-Ting Zhang, and Ren Zhang

15  Discovering Essential Domains in Essential Genes .................... 235  
   Yulan Lu, Yao Lu, Jingyuan Deng, Hui Lu, and Long Jason Lu

Index ................................................................. 247
Gene Essentiality
Methods and Protocols
Lu, L.J. (Ed.)
2015, XI, 248 p. 42 illus., 15 illus. in color., Hardcover
ISBN: 978-1-4939-2397-7
