

# Contents

<b>Introduction: Towards A Theory of Spacetime Theories</b> . . . . .	1
Dennis Lehmkuhl	
<b>Inertial Motion, Explanation, and the Foundations of Classical Spacetime Theories</b> . . . . .	13
James Owen Weatherall	
<b>A Primer on Energy Conditions</b> . . . . .	43
Erik Curiel	
<b>Background Independence, Diffeomorphism Invariance and the Meaning of Coordinates</b> . . . . .	105
Oliver Pooley	
<b>Gauge Theory of Gravity and Spacetime</b> . . . . .	145
Friedrich W Hehl	
<b>Paving the Way for Transitions—A Case for Weyl Geometry</b> . . . . .	171
Erhard Scholz	
<b>A Model-Theoretic Analysis of Space-Time Theories</b> . . . . .	225
Claus Beisbart	
<b>The Relativity and Equivalence Principles for Self-gravitating Systems</b> . . . . .	257
David Wallace	
<b>The Physical Significance of Symmetries from the Perspective of Conservation Laws</b> . . . . .	267
Adán Sus	

<b>Does Time Exist in Quantum Gravity?</b> .....	287
Claus Kiefer	
<b>Raiders of the Lost Spacetime</b> .....	297
Christian Wüthrich

Towards a Theory of Spacetime Theories

Lehmkuhl, D.; Schiemann, G.; Scholz, E. (Eds.)

2017, VIII, 335 p. 7 illus., Hardcover

ISBN: 978-1-4939-3209-2

A product of Birkhäuser Basel
