

Contents

Introduction: Towards A Theory of Spacetime Theories	1
Dennis Lehmkuhl	
Inertial Motion, Explanation, and the Foundations of Classical Spacetime Theories	13
James Owen Weatherall	
A Primer on Energy Conditions	43
Erik Curiel	
Background Independence, Diffeomorphism Invariance and the Meaning of Coordinates	105
Oliver Pooley	
Gauge Theory of Gravity and Spacetime	145
Friedrich W Hehl	
Paving the Way for Transitions—A Case for Weyl Geometry	171
Erhard Scholz	
A Model-Theoretic Analysis of Space-Time Theories	225
Claus Beisbart	
The Relativity and Equivalence Principles for Self-gravitating Systems	257
David Wallace	
The Physical Significance of Symmetries from the Perspective of Conservation Laws	267
Adán Sus	

Does Time Exist in Quantum Gravity?	287
Claus Kiefer	
Raiders of the Lost Spacetime	297
Christian Wüthrich
