Preface ................................................................. v
Contributors ....................................................... xi

PART I  A ROAD MAP TOWARD SYSTEMS MEDICINE

1 Systems Medicine: Sketching the Landscape ......................... 3
Marc Kirschner

2 Taking Bioinformatics to Systems Medicine ......................... 17
Antoine H.C. van Kampen and Perry D. Moerland

3 Systems Medicine: The Future of Medical Genomics, Healthcare,
and Wellness ...................................................... 43
Mansoor Saqi, Johann Pellet, Irina Roznovat, Alexander Mazein,
Stéphane Ballereau, Bertrand De Meulder, and Charles Auffray

4 Next-Generation Pathology .......................................... 61
Peter D. Caie and David J. Harrison

5 Training in Systems Approaches for the Next Generation
of Life Scientists and Medical Doctors ............................. 73
Damjana Rozman, Jure Acimovic, and Bernd Schmeck

6 Systems Medicine in Pharmaceutical Research and Development .................. 87
Lars Kuepfer and Andreas A. Schuppert

PART II  OPINIONS AND PERSEPCTIVES

7 Systems Medicine and Infection ...................................... 107
Ruth Bowness

8 Systems Medicine for Lung Diseases: Phenotypes and Precision Medicine
in Cancer, Infection, and Allergy .................................. 119
Bernd Schmeck, Wilhelm Bertrams, Xin Lai, and Julio Vera

9 Third-Kind Encounters in Biomedicine: Immunology Meets Mathematics
and Informatics to Become Quantitative and Predictive .......... 135
Martin Eberhardt, Xin Lai, Namrata Tomar, Shailendra Gupta,
Bernd Schmeck, Alexander Steinkasserer, Gerold Schuler, and Julio Vera

10 Systems Medicine in Oncology: Signaling Network Modeling
and New-Generation Decision-Support Systems .................. 181
Silvio Parodi, Giuseppe Riccardi, Nicoletta Castagnino, Lorenzo Tortolina,
Massimo Maffei, Gabriele Zoppoli, Alessio Nencioni, Alberto Ballestrero,
and Franco Patrone

11 Neurological Diseases from a Systems Medicine Point of View ........ 221
Marek Ostaszewski, Alexander Skupin, and Rudi Balling
PART III  SYSTEMS MEDICINE PROJECTS AND CASE STUDIES

12 Computational Modeling of Human Metabolism and Its Application to Systems Biomedicine .......................... 253
   Maike K. Aurich and Ines Thiele

13 From Systems Understanding to Personalized Medicine: Lessons and Recommendations Based on a Multidisciplinary and Translational Analysis of COPD .......................... 283
   Josep Roca, Isaac Cano, David Gomez-Cabrero, and Jesper Tegnér

14 RNA Systems Biology for Cancer: From Diagnosis to Therapy .......................... 305
   Raheleh Amirkhah, Ali Farazmand, Olaf Wolkenhauer, and Ulf Schmitz

15 Mathematical Models of Pluripotent Stem Cells: At the Dawn of Predictive Regenerative Medicine .......................... 331
   Pınar Pir and Nicolas Le Novère

PART IV  TOOLS AND METHODOLOGIES

16 Network-Assisted Disease Classification and Biomarker Discovery .......................... 353
   Sonja Strunz, Olaf Wolkenhauer, and Alberto de la Fuente

17 Anatomy and Physiology of Multiscale Modeling and Simulation in Systems Medicine .......................... 375
   Alexandru Mizeranschi, Derek Groen, Joris Borgdorff, Alfons G. Hoekstra, Bastien Chopard, and Werner Dubitzky

18 Mathematical and Statistical Techniques for Systems Medicine: The Wnt Signaling Pathway as a Case Study .......................... 405
   Adam L. MacLean, Heather A. Harrington, Michael P.H. Stumpf, and Helen M. Byrne

19 Modeling and Simulation Tools: From Systems Biology to Systems Medicine .......................... 441
   Brett G. Olivier, Maciej J. Swat, and Martijn J. Moné

Index .......................... 465
Systems Medicine
Schmitz, U.; Wolkenhauer, O. (Eds.)
2016, XIV, 478 p. 68 illus., 61 illus. in color., Hardcover
