Preface ................................................................. vii
Contributors ....................................................... xiii

PART I TECHNOLOGY PREPARATION

1 Preparation of Single-Stranded DNA for Pyrosequencing by LATE-PCR .................. 3
   Huiyong Yang, Chao Liang, Zhiyao Chen, Bingjie Zou, Qinxin Song, and Guohua Zhou

2 A Simplified Protocol for Preparing Pyrosequencing Templates Based on LATE-PCR Using Whole Blood as Starting Material Directly .......................... 13
   Yunlong Liu, Haiping Wu, Hui Ye, Zhiyao Chen, Qinxin Song, Bingjie Zou, Jianzhong Rui, and Guohua Zhou

3 Improvement of LATE-PCR to Prepare Pyrosequencing Template ..................... 23
   Qinxin Song, Huiyong Yang, Bingjie Zou, Hideki Kambara, and Guohua Zhou

4 Pyrosequencing Templates Generated by Nicking PCR Products with Nicking Endonuclease ................................................................. 31
   Qinxin Song, Haiping Wu, Guohua Zhou, and Hideki Kambara

5 Pyrosequencing Templates Generated by Asymmetric Nucleic Acid Sequence-Based Amplification (Asymmetric-NASBA) .................................. 41
   Huning Jia, Zhiyao Chen, Haiping Wu, Hui Ye, Bingjie Zou, Qinxin Song, and Guohua Zhou

6 Gel Immobilization of Acrylamide-Modified Single-Stranded DNA Template for Pyrosequencing ............................................................... 51
   Pengfeng Xiao, Huan Huang, Bingjie Zou, Qinxin Song, Guohua Zhou, and Zuhong Lu

7 Multiplex PCR Based on a Universal Biotinylated Primer to Generate Templates for Pyrosequencing ............................................. 67
   Zhiyao Chen, Yunlong Liu, Hui Ye, Haiping Wu, Jinheng Li, Bingjie Zou, Qinxin Song, and Guohua Zhou

PART II TEMPLATE INNOVATION

8 A Novel Pyrosequencing Principle Based on AMP–PPDK Reaction for Improving the Detection Limit ................................................................. 79
   Guohua Zhou, Tomobaru Kajiyma, Mari Gotou, Akibiko Kishimoto, Shigeya Suzuki, and Hideki Kambara

9 Pyrosequencing Chemistry Coupled with Modified Primer Extension Reactions for Quantitative Detection of Allele Frequency in a Pooled Sample .......... 95
   Guohua Zhou, Masao Kamahori, Kazunori Okano, Gao Chuan, Kunio Harada, and Hideki Kambara
10 A Gel-Free SNP Genotyping Method Based on Pyrosequencing Chemistry Coupled with Modified Primer Extension Reactions Directly from Double-Stranded PCR Products .................................................. 115
Guohua Zhou, Hiromi Shirakura, Masao Kamahori, Kazunori Okano, Keiichiro Nagai, and Hideki Kambara

11 Improvement of Pyrosequencing to Allow Multiplex SNP Typing in a Pyrogram ................................................................. 129
Guohua Zhou, Mari Gotou, Tomoharu Kajiyama, and Hideki Kambara

12 Improvement of Pyrosequencing Sensitivity by Capturing Free Adenosine 5′-Phosphosulfate with Adenosine Triphosphate Sulfurylase ............... 145
Haiping Wu, Wenzuan Wu, Zhiyao Chen, Weipeng Wang, Bingjie Zou, Qinxin Song, Guohua Zhou, and Hideki Kambara

13 Using Polymerase Preference Index to Design imLATE-PCR Primers for an Efficient Pyrosequencing ........................................ 155
Qinxin Song, Xiemin Qi, Yiyun Shen, Yiru Jin, Bingjie Zou, and Guohua Zhou

PART III REAGENTS PREPARATION

14 Preparation of Thermal-Stable Biotinylated Firefly Luciferase and Its Application in Pyrosequencing ............................................... 169
Shuhui Zhu, Bingjie Zou, Haiping Wu, Yinjiao Ma, Ying Chen, Qinxin Song, and Guohua Zhou

15 Expression of Thermostable Recombinant Luciola lateralis Luciferase and Its Function on Setting Up of Heat-Stable Pyrosequencing System .... 179
Shu Xu, Bingjie Zou, Qinxin Song, and Guohua Zhou

16 Expression and Purification of ATP Sulfurylase from Saccharomyces cerevisias in Escherichia coli and Its Application in Pyrosequencing .......... 187
Juan Luo, Wenzuan Wu, Bingjie Zou, Qinxin Song, and Guohua Zhou

17 Characterization of Recombinant Escherichia coli Single-Strand Binding Protein and Its Application in Pyrosequencing ........................... 197
Jiapeng Wang, Bingjie Zou, Qinxin Song, and Guohua Zhou

18 Expression of PPDK from Microbispora rosea subsp. aerata in E. coli and Its Application in Pyrosequencing ................................. 207
Bingjie Zou, Qinxin Song, and Guohua Zhou

PART IV PYROSEQUENCING-BASED BIO-BARCODES

19 Construction of 3-Plex Barcodes for Differential Gene Expression Analysis with Pyrosequencing ................................................. 217
Xiaodan Zhang, Haiping Wu, Zhiyao Chen, Guohua Zhou, and Hideki Kambara

20 Development of Pyrosequencing-Based Multiplex Bioassay by Designing Barcodes Encoded with Artificially Designed Sequences .......... 231
Zhiyao Chen, Xiaodan Zhang, Xiqun Liu, Bingjie Zou, Haiping Wu, Qinxin Song, Hideki Kambara, and Guohua Zhou

Contents

32 Detection of Avian Influenza A Virus by Pyrosequencing ......................... 371
   Weipeng Wang, Haiping Wu, Bingjie Zou, Qinxin Song, and Guohua Zhou

33 Genotyping of Alcohol Dehydrogenase Gene by Pyrosequencing
   Coupled with Improved LATE-PCR Using Human
   Whole Blood as Starting Material ............................................. 381
   Zheng Xiang, Yunlong Liu, Xiaoqing Xing, Bingjie Zou, Qinxin Song,
   and Guohua Zhou

34 Pyrosequencing on a Single Cell ............................................... 391
   Qinxin Song, Huiyong Yang, Bingjie Zou, Hideki Kambara,
   and Guohua Zhou

Index ................................................................. 399
Advances and Clinical Practice in Pyrosequencing
