## Part I Radiation Damage

1 The Radiation Damage Event ........................................... 3  
1.1 Neutron–Nucleus Interactions ..................................... 4  
  1.1.1 Elastic Scattering ............................................. 4  
  1.1.2 Inelastic Scattering .......................................... 12  
  1.1.3 (n, 2n) Reactions ............................................. 14  
  1.1.4 (n, γ) Reactions ............................................... 16  
1.2 Interactions Between Ions and Atoms ............................ 18  
  1.2.1 Interatomic Potentials ....................................... 19  
  1.2.2 Collision Kinematics ........................................ 26  
1.3 Energy Loss .......................................................... 45  
  1.3.1 Energy Loss Theory ........................................... 45  
  1.3.2 Range Calculations .......................................... 60  

References ......................................................................... 75

2 The Displacement of Atoms .............................................. 77  
2.1 Elementary Displacement Theory .................................. 77  
  2.1.1 Displacement Probability ..................................... 78  
  2.1.2 The Kinchin and Pease Model for Atom Displacements ... 80  
  2.1.3 The Displacement Energy ..................................... 82  
  2.1.4 The Electron Energy Loss Limit ............................. 87  
2.2 Modifications to the K–P Displacement Model ................. 90  
  2.2.1 Consideration of $E_d$ in the Energy Balance .......... 90  
  2.2.2 Realistic Energy Transfer Cross Sections .............. 90  
  2.2.3 Energy Loss by Electronic Excitation ................... 92  
  2.2.4 Effects of Crystallinity ...................................... 95

---

Movies accompanying the text are located at: http://rmsbook2ed.engin.umich.edu/movies/
2.3 The Displacement Cross Section

2.3.1 Elastic Scattering

2.3.2 Inelastic Scattering

2.3.3 \((n, 2n)\) and \((n, \gamma)\) Displacements

2.3.4 Modifications to the K–P Model and Total Displacement Cross Section

2.4 Displacement Rates

2.5 Correlation of Property Changes and Irradiation Dose

2.6 Displacements from Charged Particle Irradiation

References

3 The Damage Cascade

3.1 Displacement Mean Free Path

3.2 Primary Recoil Spectrum

3.3 Cascade Damage Energy and Cascade Volume

3.4 Computer Simulation of Radiation Damage

3.4.1 Binary Collision Approximation (BCA) Method

3.4.2 Molecular Dynamics (MD) Method

3.4.3 Kinetic Monte Carlo (KMC) Method

3.5 Stages of Cascade Development

3.6 Behavior of Defects Within the Cascade

References

4 Point Defect Formation and Diffusion

4.1 Properties of Irradiation-Induced Defects

4.1.1 Interstitials

4.1.2 Multiple Interstitials

4.1.3 Interstitial–Impurity Complexes

4.1.4 Vacancies

4.1.5 Multiple Vacancies

4.1.6 Solute–Defect and Impurity–Defect Clusters

4.2 Thermodynamics of Point Defect Formation

4.3 Diffusion of Point Defects

4.3.1 Macroscopic Description of Diffusion

4.3.2 Mechanisms of Diffusion

4.3.3 Microscopic Description of Diffusion

4.3.4 Jump Frequency, \(\Gamma\)

4.3.5 Jump Frequency, \(\omega\)

4.3.6 Equations for \(D\)

4.4 Correlated Diffusion

4.5 Diffusion in Multicomponent Systems

4.6 Diffusion Along High-Diffusivity Paths

References
## 5 Radiation-Enhanced Diffusion and Defect Reaction Rate Theory

- **5.1 Point Defect Balance Equations**
  - 5.1.1 Case 1: Low Temperature, Low Sink Density
  - 5.1.2 Case 2: Low Temperature, Intermediate Sink Density
  - 5.1.3 Case 3: Low Temperature, High Sink Density
  - 5.1.4 Case 4: High Temperature
  - 5.1.5 Properties of the Point Defect Balance Equations
  - 5.1.6 Deficiencies of the Simple Point Defect Balance Model
  - 5.1.7 Point Defect Balance Equations in the Presence of Cascades
- **5.2 Radiation-Enhanced Diffusion**
- **5.3 Defect Reactions**
  - 5.3.1 Defect Production
  - 5.3.2 Recombination
  - 5.3.3 Loss to Sinks
  - 5.3.4 Sink Strengths
- **5.4 Reaction Rate-Controlled Processes**
  - 5.4.1 Defect–Void Interaction
  - 5.4.2 Defect–Dislocation Interaction
- **5.5 Diffusion-Limited Reactions**
  - 5.5.1 Defect–Void Reactions
  - 5.5.2 Defect–Dislocation Reactions
- **5.6 Mixed Rate Control**
- **5.7 Defect–Grain Boundary Reactions**
- **5.8 Coherent Precipitates and Solutes**
- **5.9 Point Defect Recovery**

10 Unique Effects of Ion Irradiation

10.1 Ion Irradiation Techniques
10.2 Composition Changes
  10.2.1 Sputtering
  10.2.2 Gibbsian Adsorption
  10.2.3 Recoil Implantation
  10.2.4 Cascade (Isotropic, Displacement) Mixing
  10.2.5 Combination of Processes Affecting Surface Compositional Changes
  10.2.6 Implant Redistribution During Ion Implantation
10.3 Other Effects of Ion Implantation
  10.3.1 Grain Growth
  10.3.2 Texture
  10.3.3 Dislocation Microstructure
10.4 High-Dose Gas Loading: Blistering and Exfoliation
10.5 Solid Phases and Inert Gas Bubble Lattices
10.6 Displacements Due to Electronic Excitation
10.7 Ion Beam-Assisted Deposition
  10.7.1 Microstructure
  10.7.2 Residual Stress
  10.7.3 Film Texture
