Contents

Introduction ................................................................. vii
Preface: A Brief History of Bacterial Therapy of Cancer .................................................. ix
Contributors ............................................................... xv

1 Tumor-Targeting Salmonella typhimurium A1-R: An Overview .................................. 1
   Robert M. Hoffman

2 Enhancement of Tumor-Targeted Delivery of Bacteria with Nitroglycerin Involving Augmentation of the EPR Effect .................................................. 9
   Jun Fang, Liao Long, and Hiroshi Maeda

3 Oral Delivery of Tumor-Targeting Salmonella to Treat Cancer in Mice .................. 25
   Dongping Wei and Lijun Jia

4 Microfluidic Device to Quantify the Behavior of Therapeutic Bacteria in Three-Dimensional Tumor Tissue .................................................. 35
   Emily L. Brackett, Charles A. Swofford, and Neil S. Forbes

5 Tumor-Targeting Therapy Using Gene-Engineered Anaerobic-Nonpathogenic Bifidobacterium longum .................................................. 49
   Shun’ichiro Taniguchi, Yuko Shimatani, and Minoru Fujimori

6 Noninvasive In Vivo Imaging to Follow Bacteria Engaged in Cancer Therapy .......... 61
   Sara Leschner and Siegfried Weiss

7 In Vivo Bioluminescence Imaging of Intratumoral Bacteria .................................. 69
   Michelle Cronin, Ali R. Akin, Kevin P. Francis, and Mark Tangney

8 Employment of Salmonella in Cancer Gene Therapy ........................................ 79
   Che-Hsin Lee

9 Development of a Targeted Gene-Delivery System Using Escherichia coli .......... 85
   Chung-Jen Chiang, Chib-Hsiang Chang, Yun-Peng Chao, and Ming-Ching Kao

10 Isolation and Analysis of Suppressor Mutations in Tumor-Targeted msbB Salmonella .................................................. 95
    K. Brooks Low, Sean R. Murray, John Pawelek, and David Bermudes

11 Determination of Plasmid Segregational Stability in a Growing Bacterial Population .................................................. 125
    M. Gabriela Kramer

12 Visualization of Anticancer Salmonella typhimurium Engineered for Remote Control of Therapeutic Proteins .................................................. 135
    Vu H. Nguyen and Jung-Joon Min

13 Methods for Tumor Targeting with Salmonella typhimurium A1-R .................. 143
    Robert M. Hoffman and Ming Zhao
Contents

14  Salmonella typhimurium A1-R and Cell Cycle Decoy Therapy of Cancer  . . . . . .  165
    Robert M. Hoffman and Shuya Yano
15  Future of Bacterial Therapy of Cancer ................................. 177
    Robert M. Hoffman

Index ......................................................................................... 185
Bacterial Therapy of Cancer
Methods and Protocols
Hoffman, R. (Ed.)
2016, XVI, 186 p. 43 illus., 33 illus. in color., Hardcover
ISBN: 978-1-4939-3513-0
