## Contents

*Preface* .......................................................... v  
*Contributors* ................................................... ix

1 Genetically Defined Strains in Drug Development and Toxicity Testing ......... 1  
   *Michael F.W. Festing*

2 Simple, Efficient CRISPR-Cas9-Mediated Gene Editing in Mice:  
   Strategies and Methods .............................................. 19  
   *Benjamin E. Low, Peter M. Kutny, and Michael V. Wiles*

3 Mouse Sperm Cryopreservation and Recovery of Genetically  
   Modified Mice .......................................................... 55  
   *Benjamin E. Low, Rob A. Taft, and Michael V. Wiles*

4 Generation of Immunodeficient Mice Bearing Human Immune Systems  
   by the Engraftment of Hematopoietic Stem Cells  
   *Suheyla Hasgur, Ken Edwin Aryee, Leonard D. Shultz, Dale L. Greiner,  
     and Michael A. Brehm*

5 Generation of Human Liver Chimeric Mice for the Study  
   of Human Hepatotropic Pathogens ...................................... 79  
   *Markus von Schaewen, Gabriela Hrebikova, and Alexander Ploss*

6 Human FcRn Transgenic Mice for Pharmacokinetic Evaluation  
   of Therapeutic Antibodies ............................................. 103  
   *Derry C. Roopenian, Gregory J. Christianson, Gabriele Proetzel,  
     and Thomas J. Sproule*

7 A Humanized Mouse Model to Study Human Albumin  
   and Albumin Conjugates Pharmacokinetics  
   *Benjamin E. Low and Michael V. Wiles*

8 Germ-Free Mice Model for Studying Host–Microbial Interactions .......... 123  
   *Yogesh Bhattarai and Purna C. Kashyap*

9 Bridging Mice to Men: Using HLA Transgenic Mice to Enhance  
   the Future Prediction and Prevention of Autoimmune  
   Type 1 Diabetes in Humans ............................................ 137  
   *David V. Serreze, Marijke Niens, John Kulik, and Teresa P. DiLorenzo*

10 Mouse Models of Type 2 Diabetes Mellitus in Drug Discovery ............. 153  
    *Helene Baribault*

11 Cholesterol Absorption and Metabolism ..................................... 177  
    *Philip N. Howles*

12 Skin Diseases in Laboratory Mice: Approaches to Drug Target  
   Identification and Efficacy Screening .................................... 199  
   *John P. Sundberg, Kathleen A. Silva, Lloyd E. King Jr, and C. Herbert Pratt*
Contents

13 Chronic Myeloid Leukemia (CML) Mouse Model in Translational Research ........................................ 225
   Cong Peng and Shaoguang Li

14 Murine Model for Colitis-Associated Cancer of the Colon .................................................. 245
   Ashley J. Snider, Agnieszka B. Bialkowska, Amr M. Ghaleb,
   Vincent W. Yang, Lina M. Obeid, and Yusuf A. Hannun

15 Mouse Models for Studying Depression-Like States and Antidepressant Drugs ...................... 255
   Carisa L. Bergner, Amanda N. Smolinsky, Peter C. Hart,
   Brett D. Dufour, Rupert J. Egan, Justin L. LaPorte, and Allan V. Kalueff

16 Experimental Models of Anxiety for Drug Discovery and Brain Research .......................... 271
   Peter C. Hart, Carisa L. Bergner, Amanda N. Smolinsky,
   Brett D. Dufour, Rupert J. Egan, Justin L. LaPorte, and Allan V. Kalueff

17 Repetitive Behavioral Assessments for Compound Screening in Mouse Models of Autism Spectrum Disorders .................................................. 293
   Stacey J. Sukoff Rizzo

18 Better Utilization of Mouse Models of Neurodegenerative Diseases in Preclinical Studies: From the Bench to the Clinic ....................................... 311
   Christopher Janus, Carolina Hernandez, Victoria deLelys, Hanno Roder,
   and Hans Welzl

19 Neuromuscular Disease Models and Analysis ........................................................................... 349
   Robert W. Burgess, Gregory A. Cox, and Kevin L. Seburn

20 Bright-Field Imaging and Optical Coherence Tomography of the Mouse Posterior Eye ................. 395
   Mark P. Krebs, Mei Xiao, Keith Sheppard, Wanda Hicks,
   and Patsy M. Nishina

21 Mouse Models as Tools to Identify Genetic Pathways for Retinal Degeneration, as Exemplified by Leber’s Congenital Amaurosis .......................... 417
   Bo Chang

Index ........................................................................................................................................ 431
Mouse Models for Drug Discovery
Methods and Protocols
Proetzel, G.; Wiles, M.V. (Eds.)
2016, XI, 436 p. 63 illus., 37 illus. in color., Hardcover
A product of Humana Press
