## Contents

*Preface* .......................................................... v

*Contributors* .......................................................... ix

1 Genetic Approaches to Study Meiosis and Meiosis-Specific Gene Expression in *Saccharomyces cerevisiae* .......................................................... 1
   *Yona Kassir and David T. Stuart*

2 Quantitative Genome-Wide Measurements of Meiotic DNA Double-Strand Breaks and Protein Binding in *S. pombe* ........................................... 25
   *Randy W. Hyppa, Kyle R. Fowler, and Gerald R. Smith*

3 Sequencing Spo11 Oligonucleotides for Mapping Meiotic DNA Double-Strand Breaks in Yeast .......................................................... 51
   *Isabel Lam, Neeman Mobihullah, and Scott Keeney*

4 Ribosome Profiling for the Analysis of Translation During Yeast Meiosis .......................................................... 99
   *Caia Duncan and Juan Mata*

5 Selection of G1 Phase Yeast Cells for Synchronous Meiosis and Sporulation .......................................................... 123
   *David T. Stuart*

6 Fluorescent Protein as a Tool for Investigating Meiotic Recombination in *Neurospora* .......................................................... 133
   *Frederick J. Bowring, P. Jane Yeadon, and David E.A. Catcheside*

7 High-Throughput Screening to Identify Regulators of Meiosis-Specific Gene Expression in *Saccharomyces cerevisiae* .......................................................... 147
   *Yona Kassir*

8 Analysis of Meiotic Chromosome-Associated Protein Dynamics Using Conditional Expression in Budding Yeast .......................................................... 157
   *Amy J. MacQueen and Beth Rockmill*

9 In Vivo Imaging of Budding Yeast Meiosis .......................................................... 175
   *Michael G. Pollard and Jennifer C. Fung*

10 Sequential Immunofluorescent Light Microscopy and Electron Microscopy of Recombination Nodules During Meiotic Prophase I .......................................................... 187
    *Lorinda K. Anderson*

11 Flow Cytometry for the Isolation and Characterization of Rodent Meiocytes .......................................................... 217
    *Adriana Geisinger and Rosana Rodriguez-Casuriaga*

12 Imaging of Chromosome Dynamics in Mouse Testis Tissue by Immuno-FISH .......................................................... 231
    *Harry Scherthan*
Contents

13 Imaging Chromosome Separation in Mouse Oocytes
by Responsive 3D Confocal Timelapse Microscopy ................. 245
Simon I.R. Lane, Stephen Crouch, and Keith T. Jones

14 Live Imaging of Meiosis I in Late-Stage Drosophila melanogaster Oocytes ....... 255
Stacie E. Hughes and R. Scott Hawley

15 Microscopy Methods for Analysis of Spindle Dynamics
in Meiotic Drosophila Spermatocytes ................................ 265
Matthew S. Savoian

16 Drosophila Male Meiosis ........................................ 277
Silvia Bonaccorsi and Maurizio Gatti

17 Analysis of Chromatin Dynamics During Drosophila Spermatogenesis ......... 289
Tim Hundertmark, Ina Theofel, Zeynep Eren-Ghiani, David Miller,
and Christina Rathke

18 Quantitative Modeling and Automated Analysis of Meiotic Recombination ... 305
Martin A. White, Shunxin Wang, Liangran Zhang, and Nancy Kleckner

19 A Computational Approach to Study Gene Expression Networks ............ 325
Amir Rubinstein and Yona Kassir

Index ............................................................................. 335
Meiosis
Stuart, D.T. (Ed.)
2017, X, 337 p. 59 illus., 45 illus. in color., Hardcover
