Preface ................................................. v
Contributors ....................................... xi

PART I  RESOURCES FOR SYSTEMS GENETICS

1 Resources for Systems Genetics ........................ 3
   Robert W. Williams and Evan G. Williams

2 Heterogeneous Stock Populations for Analysis of Complex Traits .......... 31
   Leah C. Solberg Woods and Richard Mott

PART II  TOOLS FOR ANALYSIS AND INTEGRATION IN SYSTEMS GENETICS

3 Mouse Genome Informatics (MGI): Resources
   for Mining Mouse Genetic, Genomic, and Biological Data
   in Support of Primary and Translational Research .................. 47
   Janan T. Eppig, Cynthia L. Smith, Judith A. Blake, Martin Ringwald,
   James A. Kadin, Joel E. Richardson, and Carol J. Bult

4 GeneNetwork: A Toolbox for Systems Genetics .......................... 75
   Megan K. Mulligan, Khyobeni Mozhui, Pjotr Prins, and Robert W. Williams

5 Complex Trait Analyses of the Collaborative Cross:
   Tools and Databases .................................. 121
   Ramesh Ram and Grant Morahan

6 Integrative Functional Genomics for Systems Genetics
   in GeneWeaver.org .................................. 131
   Jason A. Bubier, Michael A. Langston, Erich J. Baker,
   and Elissa J. Chesler

7 A Suite of Tools for Biologists That Improve Accessibility
   and Visualization of Large Systems Genetics Datasets:
   Applications to the Hybrid Mouse Diversity Panel .................. 153
   Christoph D. Rau, Mete Civelek, Calvin Pan, and Aldons J. Lusis

8 Expression QTLs Mapping and Analysis: A Bayesian Perspective .......... 189
   Martha Imprialou, Enrico Petretto, and Leonardo Bottolo

9 Epigenetics and Control of RNAs .................................. 217
   Henrike Maatz, Sebastiaan van Heesch, Franziska Kreuchwig,
   Allison Faber, Eleonora Adami, Norbert Hubner,
   and Matthias Heinig

10 Integrating Multidimensional Data Sources to Identify Genes
    Regulating Complex Phenotypes ................................ 239
    Rupert W. Overall
11 RNA-Seq in the Collaborative Cross ................................. 251
  Richard Green, Courtney Wilkins, Martin T. Ferris, and Michael Gale Jr.

12 QTL Mapping and Identification of Candidate Genes in DO Mice:
   A Use Case Model Derived from a Benzene Toxicity Experiment ........ 265
   Dan Gatti, John E. French, and Klaus Schughart

13 Visualization of Results from Systems Genetics Studies
   in Chromosomai Context ........................................... 283
   Karen Y. Oróstica and Ricardo A. Verdugo

14 Using Baseline Transcriptional Connectomes in Rat to Identify
   Genetic Pathways Associated with Predisposition to Complex Traits .... 299
   Laura Saba, Paula Hoffman, and Boris Tabakoff

15 Precise Network Modeling of Systems Genetics Data
   Using the Bayesian Network Webserver ................................ 319
   Jesse D. Ziebarth and Yan Cui

16 Systems Genetics as a Tool to Identify Master Genetic Regulators
   in Complex Disease .................................................. 357
   Aida Moreno-Moral, Francesco Pesce, Jacques Behmoaras,
   and Enrico Petretto

Part III Systems Genetics Use Cases: Mapping
   and Combining Multiple Phenotypic Traits

17 Genomic Control of Retinal Cell Number: Challenges, Protocol,
   and Results ............................................................... 365
   Patrick W. Keeley, Irene E. Whitney, and Benjamin E. Reese

18 Systems Genetics Analysis to Identify the Genetic Modulation
   of a Glaucoma-Associated Gene ...................................... 391
   Sumana R. Chintalapudi and Monica M. Jablonski

19 Genetic Dissection of Variation in Hippocampal Intra- and Infrapyramidal
   Mossy Fibers in the Mouse ............................................ 419
   Anna Delprato and Wim E. Crusio

20 Complex Genetics of Cardiovascular Traits in Mice: F2-Mapping
   of QTLs and Their Underlying Genes ................................ 431
   Svitlana Podliesna, Connie R. Bezzina, and Elisabeth M. Lodder

21 Systems Genetics of Liver Fibrosis .................................. 455
   Rabea A. Hall and Frank Lammert

22 Systems Genetic Analysis of Iron and Its Regulation
   in Brain and Periphery ................................................ 467
   Byron C. Jones and Leslie C. Jellen

23 Systems Genetics of Obesity ......................................... 481
   Gudrun A. Brockmann, Danny Arends, Sebastian Heise, and Ayca Dogan

24 Social Interactions and Indirect Genetic Effects on Complex Juvenile
   and Adult Traits .................................................... 499
   David G. Ashbrook and Reinmar Hager
25  Complex Genetics of Behavior: BXDs in the Automated Home-Cage ........ 519
    Maarten Loos, Matthijs Verhage, Sabine Spijker, and August B. Smit

26  Integrative Analysis of Genetic, Genomic, and Phenotypic Data
    for Ethanol Behaviors: A Network-Based Pipeline for Identifying
    Mechanisms and Potential Drug Targets ........................................... 531
    James W. Bogenpohl, Kristin M. Mignogna, Maren L. Smith,
    and Michael F. Miles

27  Dissection of Host Susceptibility to Bacterial Infections and Its Toxins .... 551
    Aysar Nashef, Mahmoud Agbaria, Ariel Shusterman,
    Nicola Ivan Lorè, Alessandra Bragonzi, Ervin Wiess, Yael Houri-Haddad,
    and Fuad A. Iraqi

28  The Collaborative Cross Resource for Systems Genetics Research
    of Infectious Diseases .............................................................. 579
    Paul L. Maurizio and Martin T. Ferris

29  Using Systems Genetics to Understanding the Etiology of Complex Disease . 597
    Ramesh Ram and Grant Morahan

Index ................................................................................................. 607
Systems Genetics
Methods and Protocols
Schughart, K.; Williams, R.W. (Eds.)
2017, XIV, 609 p. 164 illus., 137 illus. in color. With online files/update., Hardcover
A product of Humana Press
