Preface ........................................................................................................... v
Contributors ................................................................................................. xv

PART I  NATIVE TAU PROTEIN: CONFORMATIONAL STUDIES
             AND TUBULIN INTERACTIONS

1 Conformational Dynamics of Intracellular Tau Protein Revealed
   by CD and SAXS .............................................................. 3
   Nalini Vijay Gorantla, Alexander V. Shkumatov,
   and Subashchandrabose Chinnathambi

2 Global Conformation of Tau Protein Mapped by Raman Spectroscopy ...... 21
   Nalini Vijay Gorantla, Puneet Khandelwal, Pankaj Poddar,
   and Subashchandrabose Chinnathambi

3 Molecular Dynamics Simulation of Tau Peptides for the Investigation
   of Conformational Changes Induced by Specific Phosphorylation Patterns ... 33
   Neha S. Gandhi, Predrag Kukic, Guy Lippens, and Ricardo L. Mancera

4 Tau Interaction with Tubulin and Microtubules: From Purified
   Proteins to Cells ................................................................. 61
   Tiphany De Bessa, Gilles Breuzard, Diane Allegro, François Devred,
   Vincent Peyrot, and Pascale Barbier

PART II  IN VITRO SELF-ASSOCIATION OF TAU PROTEIN:
                   OLIGOMER AND FIBRIL FORMATION

5 X-Ray Structural Study of Amyloid-Like Fibrils of Tau Peptides Bound
   to Small-Molecule Ligands ..................................................... 89
   Einav Tayeb-Fligelman and Meytal Landau

6 Detection and Quantification Methods for Fibrillar Products
   of In Vitro Tau Aggregation Assays ........................................... 101
   Niki Nanavaty, Lauren Lin, Samantha H. Hinckley, and Jeff Kuret

7 Fourier Transform Infrared (FTIR) Spectroscopy, Ultraviolet Resonance
   Raman (UVRR) Spectroscopy, and Atomic Force Microscopy (AFM)
   for Study of the Kinetics of Formation and Structural Characterization
   of Tau Fibrils .................................................................. 113
   Gayathri Ramachandran

8 Assays for the Screening and Characterization
   of Tau Aggregation Inhibitors ................................................ 129
   Janet E. Rickard, David Horsley, Claude M. Wischik,
   and Charles R. Harrington
9 Tau Oligomers as Pathogenic Seeds: Preparation and Propagation In Vitro and In Vivo .......................................................... 141
Julia E. Gerson, Urmi Sengupta, and Rakez Kayed

PART III  Tau Post-Translational Modifications

10 Mass Spectrometry Analysis of Lysine Posttranslational Modifications of Tau Protein from Alzheimer’s Disease Brain .............................................. 161
Stefani N. Thomas and Austin J. Yang

11 The Study of Posttranslational Modifications of Tau Protein by Nuclear Magnetic Resonance Spectroscopy: Phosphorylation of Tau Protein by ERK2 Recombinant Kinase and Rat Brain Extract, and Acetylation by Recombinant Creb-Binding Protein ...................... 179
Haoling Qi, Clément Despres, Sudhakaran Prabakaran, François-Xavier Cantrelle, Béatrice Chambraud, Jeremy Gunawardena, Guy Lippens, Caroline Smet-Nocca, and Isabelle Landrieu

12 Tag-Free Semi-Synthesis of the Tau Protein .................................. 215
Oliver Reimann, Caroline Smet-Nocca, and Christian P.R. Hackenberger

13 Production of O-GlcNAc Modified Recombinant Tau in E. coli and Detection of Ser400 O-GlcNAc Tau In Vivo ........................................... 237
Scott A. Yuzwa and David J. Vocadlo

PART IV  Detecting Tau Proteins, Their Modifications, Mutations and Interacting Partners

14 Two-Dimensional Electrophoresis Protocols to Analyze the Microtubule-Associated Tau Proteins from Several Biological Sources .......... 251
Nicolas Sergeant, Francisco-Jose Fernandez-Gomez, Helene Obriot, Sabiba Eddarkaoui, Valérie Buée-Scherrrer, and Luc Buée

15 A Simple Method to Avoid Nonspecific Signal When Using Monoclonal Anti-Tau Antibodies in Western Blotting of Mouse Brain Proteins ............... 263
Franck R. Petry, Samantha B. Nicholls, Sébastien S. Hébert, and Emmanuel Planel

16 Flow Cytometry Analysis and Quantitative Characterization of Tau in Synaptosomes from Alzheimer’s Disease Brains ............................. 273
Karen Hoppens Gylys and Tina Bilousova

17 In Vivo Microdialysis of Brain Interstitial Fluid for the Determination of Extracellular Tau Levels ....................................................... 285
Kaoru Yamada

18 Proximity Ligation Assay: A Tool to Study Endogenous Interactions Between Tau and Its Neuronal Partners .............................................. 297
Alexis Bretteville, Florie Demiautte, and Julien Chapuis

19 Finding MAPT Mutations in Frontotemporal Dementia and Other Tauopathies ................................................................. 307
Carol Dobson-Stone and John B. J. Kwok
## Part V Cellular and In Vivo Models of Tau Physiopathology
