Contents

Preface .............................................................................................................. v
Contributors ..................................................................................................... ix

1 The Immortal Senescence ........................................................................... 1
Anna Bianchi-Smiraglia, Brittany C. Lipchick, and Mikhail A. Nikiforov

2 Senescence Phenotypes Induced by Ras in Primary Cells ......................... 17
Lena Lau and Gregory David

3 Cellular Model of p21-Induced Senescence ................................................. 31
Michael Shuttman, Bey-Dih Chang, Gary P. Schools, and Eugenia V. Broude

4 Detecting Markers of Therapy-Induced Senescence in Cancer Cells ........ 41
Dorothy N.Y. Fan and Clemens A. Schmitt

5 Genome-Wide miRNA Screening for Genes Bypassing Oncogene-Induced
   Senescence .................................................................................................. 53
Maria V. Guijarro and Amancio Carnero

6 Detection of Dysfunctional Telomeres in Oncogene-Induced Senescence .... 69
Priyanka L. Patel and Utz Herbig

7 RT-qPCR Detection of Senescence-Associated Circular RNAs .............. 79
Amaresh C. Panda, Kotb Abdelmohsen, and Myriam Gorospe

8 Autophagy Detection During Oncogene-Induced Senescence
   Using Fluorescence Microscopy ................................................................ 89
Masako Narita and Masashi Narita

9 Detecting the Senescence-Associated Secretory Phenotype (SASP)
   by High Content Microscopy Analysis ......................................................... 99
Priya Hari and Juan Carlos Acosta

10 Sudan Black B, The Specific Histochemical Stain for Lipofuscin:
    A Novel Method to Detect Senescent Cells ........................................... 111
Konstantinos Evangelou and Vassilis G. Gorgoulis

11 Using [U-13C6]-Glucose Tracer to Study Metabolic Changes
    in Oncogene-Induced Senescence Fibroblasts ....................................... 121
Katerina I. Leonova and David A. Scott

12 Detection of the Ubiquitinome in Cells Undergoing
    Oncogene-Induced Senescence .............................................................. 127
Hengrui Zhu, Linh Le, Hsin-Yao Tang, David W. Speicher,
    and Rugang Zhang

13 Detection of Reactive Oxygen Species in Cells Undergoing
    Oncogene-Induced Senescence .............................................................. 139
Rabii Ameziane-El-Hassani and Corinne Dupuy
