## Contents

**Preface** ................................................................. v
**Contributors** .......................................................... xi

**PART I  SALIVA AND OTHER ORAL FLUIDS**

1 Salivary Diagnostics Using Purified Nucleic Acids .................. 3
   **Paul D. Slowey**

2 RNA Sequencing Analysis of Salivary Extracellular RNA .......... 17
   **Blanca Majem, Feng Li, Jie Sun, and David T.W. Wong**

3 Qualitative and Quantitative Proteome Analysis of Oral Fluids in Health and Periodontal Disease by Mass Spectrometry ........ 37
   **Erdjan Salih**

4 Antioxidant Micronutrients and Oxidative Stress Biomarkers .... 61
   **Iain L.C. Chapple, Helen R. Griffiths, Mike R. Milward, Martin R. Ling, and Melissa M. Grant**

5 NMR-Based Metabolomics of Oral Biofluids ......................... 79
   **Horst Joachim Schirra and Pauline J. Ford**

6 Gene Therapy of Salivary Diseases .................................. 107
   **Bruce J. Baum, Sandra Afione, John A. Chiorini, Ana P. Cotrim, Corinne M. Goldsmith, and Changyu Zheng**

**PART II  MOLECULAR BIOSCIENCES**

7 The Oral Microbiota in Health and Disease: An Overview of Molecular Findings .................................................. 127
   **José F. Siqueira Jr. and Isabela N. Rôças**

8 Microbial Community Profiling Using Terminal Restriction Fragment Length Polymorphism (T-RFLP) and Denaturing Gradient Gel Electrophoresis (DGGE) ................................... 139
   **José F. Siqueira Jr., Mitsuo Sakamoto, and Alexandre S. Rosado**

9 Analysis of 16S rRNA Gene Amplicon Sequences Using the QIIME Software Package .................................................. 153
   **Blair Lawley and Gerald W. Tannock**

10 Adhesion of Yeast and Bacteria to Oral Surfaces .................. 165
    **Richard D. Cannon, Karl M. Lyons, Kenneth Chong, Kathryn Newsham-West, Kyoko Niimi, and Ann R. Holmes**

11 Quantitative Analysis of Periodontal Pathogens Using Real-Time Polymerase Chain Reaction (PCR) ............................. 191
    **Mª José Marin, Elena Figuero, David Herrera, and Mariano Sanz**
12 Methods to Study Antagonistic Activities Among Oral Bacteria
   Fengxia Qi and Jens Kreth
   203

13 Natural Transformation of Oral Streptococci by Use of Synthetic
   Pheromones
   Gabriela Salvadori, Roger Junge, Rabia Khan, Heidi A. Åmdal,
   Donald A. Morrison, and Fernanda C. Petersen
   219

14 Markerless Genome Editing in Competent Streptococci
   Roger Junge, Rabia Khan, Yanina Tovpeko, Heidi A. Åmdal,
   Fernanda C. Petersen, and Donald A. Morrison
   233

15 Tools and Strategies for Analysis of Genome-Wide and Gene-Specific
   DNA Methylation Patterns
   Aniruddha Chatterjee, Euan J. Rodger, Ian M. Morison, Michael R. Eccles,
   and Peter A. Stockwell
   249

16 Generating Multiple Base-Resolution DNA Methylomes Using Reduced
   Representation Bisulfite Sequencing
   Aniruddha Chatterjee, Euan J. Rodger, Peter A. Stockwell,
   Gwenn Le Mée, and Ian M. Morison
   279

17 A Protocol for the Determination of the Methylation Status
   of Gingival Tissue DNA at Specific CpG Islands
   Trudy J. Milne
   299

18 Genome-Wide Analysis of Periodontal and Peri-Implant Cells and Tissues
   Moritz Kebschull, Claudia Hülsmann, Per Hoffmann,
   and Panos N. Papapanou
   307

19 Differential Expression and Functional Analysis
   of High-Throughput -omics Data Using Open Source Tools
   Moritz Kebschull, Melanie Julia Fittler, Ryan T. Demmer,
   and Panos N. Papapanou
   327

20 Exploring Genome-Wide Expression Profiles Using Machine
   Learning Techniques
   Moritz Kebschull and Panos N. Papapanou
   347

PART III CELLS AND TISSUES

21 Embryonic Explant Culture: Studying Effects of Regulatory
   Molecules on Gene Expression in Craniofacial Tissues
   Katja Närbi
   367

22 Oral Epithelial Cell Culture Model for Studying the Pathogenesis
   of Chronic Inflammatory Disease
   Mike R. Milward, Martin R. Ling, Melissa M. Grant,
   and Iain L.C. Chapple
   381

23 Fabrication and Characterization of Decellularized Periodontal Ligament
   Cell Sheet Constructs
   Amro Farag, Cédryck Vaquette, Dietmar W. Hutmacher, P. Mark Bartold,
   and Saso Ivanovski
   403
