Contents

Preface ............................................................... v
Contributors ............................................................ xiii

Part I  Reviews

1 Application of Multiplex Biomarker Approaches to Accelerate Drug Discovery and Development .......................... 3
   Hassan Rahmoune and Paul C. Guest

2 The Application of Multiplex Biomarker Techniques for Improved Stratification and Treatment of Schizophrenia Patients .......... 19
   Johann Steiner, Paul C. Guest, Hassan Rahmoune, and Daniel Martins-de-Souza

3 Multiplex Biomarker Approaches in Type 2 Diabetes Mellitus Research ...................................................... 37
   Susan E. Ozanne, Hassan Rahmoune, and Paul C. Guest

4 LC-MS², Multiplex MS/MS, Ion Mobility, and Label-Free Quantitation in Clinical Proteomics ........................................ 57
   Gustavo Henrique Martins Ferreira Souza, Paul C. Guest, and Daniel Martins-de-Souza

5 Phenotyping Multiple Subsets of Immune Cells In Situ in FFPE Tissue Sections: An Overview of Methodologies .................. 75
   James R. Mansfield

Part II  Statistical Considerations

6 Identification and Clinical Translation of Biomarker Signatures: Statistical Considerations .................................................. 103
   Emanuel Schwarz

7 Opportunities and Challenges of Multiplex Assays: A Machine Learning Perspective .............................................. 115
   Junfang Chen and Emanuel Schwarz

Part III  Protocols

8 Multiplex Analyses Using Real-Time Quantitative PCR ................................................................. 125
   Steve F.C. Hawkins and Paul C. Guest

9 Multiplex Analysis Using cDNA Transcriptomic Profiling .......................................................... 135
   Steve F.C. Hawkins and Paul C. Guest

10 Multiplex Single Nucleotide Polymorphism Analyses ...................................................... 143
    Steve F.C. Hawkins and Paul C. Guest
11 Pulsed SILAC as a Approach for miRNA Targets Identification in Cell Culture ................................................................. 149
   *Daniella E. Duque-Guimarães, Juliana de Almeida-Faria, Thomas Prates Ong, and Susan E. Ozanne*

12 Blood Bio-Sampling Procedures for Multiplex Biomarkers Studies. .................. 161
   *Paul C. Guest and Hassan Rahmoun* 

13 Multiplex Immunoassay Profiling ......................................................... 169
   *Laurie Stephen*

14 Multiplex Sequential Immunoprecipitation of Insulin Secretory Granule Proteins from Radiolabeled Pancreatic Islets. .................... 177
   *Paul C. Guest*

15 Two Dimensional Gel Electrophoresis of Insulin Secretory Granule Proteins from Biosynthetically-Labeled Pancreatic Islets .................... 187
   *Paul C. Guest*

   *Sheila Garcia, Paulo A. Baldasso, Paul C. Guest, and Daniel Martins-de-Souza* 

17 Simultaneous Two-Dimensional Difference Gel Electrophoresis (2D-DIGE) Analysis of Two Distinct Proteomes ........................................... 205
   *Adriano Aquino, Paul C. Guest, and Daniel Martins-de-Souza*

18 Selective Reaction Monitoring for Quantitation of Cellular Proteins .............. 213
   *Vitor M. Faça*

19 Characterization of a Protein Interactome by Co-Immunoprecipitation and Shotgun Mass Spectrometry ................................................................. 223
   *Giuseppina Maccarrone, Juan Jose Bonfiglio, Susana Silberstein, Christoph W. Turck, and Daniel Martins-de-Souza*

20 Using $^{15}$N-Metabolic Labeling for Quantitative Proteomic Analyses. .............. 235
   *Giuseppina Maccarrone, Alon Chen, and Michaela D. Filiou*

21 Multiplex Measurement of Serum Folate Vitamers by UPLC-MS/MS .................. 245
   *Sarah Meadows*

22 UPLC-MS/MS Determination of Deuterated 25-Hydroxyvitamin D 
   ($d_3$-25OHD$_3$) and Other Vitamin D Metabolites for the Measurement of 25OHD Half-Life. .......................................................... 257
   *Shima Assar, Inez Schoenmakers, Albert Koulman, Ann Prentice, and Kerry S. Jones*

23 iTRAQ-Based Shotgun Proteomics Approach for Relative Protein Quantification .......................................................... 267
   *Erika Velásquez Núñez, Gilberto Barbosa Domont, and Fábio César Sousa Nogueira*

24 $^1$H NMR Metabolomic Profiling of Human and Animal Blood Serum Samples .......................................................... 275
   *João G.M. Pontes, Antonio J.M. Brasil, Guilherme C.F. Cruz, Rafael N. de Souza, and Ljubica Tasic*
Lab-on-a-Chip Multiplex Assays

Harald Peter, Julia Wienke, and Frank F. Bier

Multiplex Smartphone Diagnostics

Juan L. Martinez-Hurtado, Ali K. Yetisen, and Seok-Hyun Yun

Development of a User-Friendly App for Assisting Anticoagulation Treatment

Johannes Vegt

Multiplex Biomarker Approaches to Enable Point-of-Care Testing and Personalized Medicine

Paul C. Guest

Index

PART IV  FUTURE DIRECTIONS
Multiplex Biomarker Techniques
Methods and Applications
Guest, P.C. (Ed.)
2017, XV, 317 p. 59 illus., 48 illus. in color., Hardcover
